It's possible. I didn't notice if they did. I was into Hour of the
Time and WLS way back then.

It would be nice to see some other troops go in against The Taliban...

Send them All Home To Allah , or wherever

Lack of flexibility might mean many, Many civilian casualties..

"HD Radio Marketing: Change is Coming"

"The date is no surprise. It was a 2-year deal. It ends in January.I agree it's time to re-assess. The problem with the licensing plan is two very different groups with different agendas pay the fee. Which is why neither is happy. Broadcasters pay for the encoder, and they're not happy with the radios, and electronics manufacturers pay for the decoder, and they're not happy with anything. They see no demand, and therefore, no return on their investment.I think the best bet is for everyone to walk away at the end of this deal, and leave iBiquity to think about what went wrong."

"Maybe the date is no surprise to you, George. But the lack of renewal of that deal for a later date might be a surprise to some."

http://www.hear2.com/2007/07/hd-radio-market.html#comments

"HD Radio - what's the holdup?"

"The way I see it, there are at least two very large barriers standing in the way... The lack of subsidies, however, has really made it difficult for iBiquity to move things along. Moreover, the slow adoption rate has kept the company's operating expense burn rate high, which has in turn delayed investors' payoff. If the burn rate is high enough and the rate of adoption is slow enough, well, let's just say that's not a good thing."

http://www.news.com.com/8301-10784_3-9750405-7.html

"Finally, A Good Use for HD Radio"

"That's why I was happy to hear that even the folks at iBiquity are looking at other options. They have to."

I occasionally record Pete Peters for those that don't have shortwave.
I caught his substitute loon Applegate a few days ago:

About 10 Mbytes. You need winamp or videolan to play it.

The U.S. should be more concerned about the number of civilian
casualties in both Afganistan and Iraq. In the eyes of the world,
these deaths put the country on a par with the "terrorists,' plus we
end up recruiting more terrorists than we kill.
So much for blood and guts... See Samantha Power's article in the
Sunday NYT.

Missing controller?

Get a Wellbrook! With a good tuner, you don't need the front end
filtering that the Kiwa provides.

Band allocations and time zone conversions for the USA. Includes broadcast
bands used outside the USA. For multi-use bands, primary usage is shown.
Some stations operate outside official bands. Information is from Oct 2005
FCC rules and Jan 2006 NTIA manual, see Chapter 4 of:
http://www.ntia.doc.gov/osmhome/redbook/redbook.html

Frequencies are in kHz. Usual spacing in shortwave broadcast bands is
5 kHz. Frequencies above 10000 kHz tend to propagate better during the day;
frequencies below 10000 kHz tend to propagate better at night.

WARNINGS AND DISCLAIMERS

Connecting unapproved devices to phone lines may be illegal in your area. Telephone lines present a potential shock hazard. Do not use this antenna for transmitting. Use at your own risk.

INTRODUCTION

This article describes how to use a phone line as a shortwave receiving antenna. Performance will vary depending on the kind of phone line you have. Overhead lines usually make okay antennas, while underground lines
| usually don't. Phone lines carrying DSL service may be unsuitable because
| DSL operates over a wide spectrum. A phone line antenna will generally pick up more power line noise than a dedicated antenna, so don't expect to
| use it for DX work. Nevertheless, I found that it outperformed the
| telescopic whip antennas built into many portables.

A reader sent in this suggestion: If you're concerned about connecting the phone line directly to the receiver, try wrapping the phone cord several times around the receiver's telescopic whip antenna instead. Performance may not be as good as a direct connection, but it will probably be better than the whip antenna by itself.

Someone else wrote asking about lightning protection. I haven't thought much about it because thunderstorms are rare in my area. Most phone lines have lightning arrestors on them where they enter the house, but the lightning arrestors may pass enough energy during a lightning strike damage a receiver. My suggestion is to disconnect the antenna when not in use if you experience frequent thunderstorms.

HOW TO DO IT

The simplest connection is a single capacitor between the phone line and receiver. The capacitor eliminates all phone line voltages, including
| ringing, so that they will not harm the receiver. The capacitor should
| be rated 250 volts or higher.

```
Phone line RF connector
red .01 uF center cond. / \
or o--------||-----------------------------|-o | To receiver
green \ /
50 ohm coax |
ground |
or o-----------------------------------------+
N.C. shield
```

N.C. = no connect. I originally connected the phone line ground (yellow wire) to this terminal, but reception was better without it (if you do this, play it safe and put a .01 uF capacitor in series). If another ground is available, you can connect it to this terminal.

If you are picking up local AM or FM radio stations on the shortwave bands, it is likely that your receiver is overloaded. Inexpensive and portable receivers usually lack the filtering needed to eliminate this interference, but you can make your own filters. Filters can also be
| purchased from shortwave dealers (see below for recommendations).

A high-pass filter can be used to remove signals below the shortwave bands. It rejects interference from local AM stations and presents a high impedance to the phone line at audio frequencies so that the phone line remains balanced.

A low-pass filter can be used to remove signals above the shortwave bands. It rejects interference from FM and TV stations, as well as VHF 2-way radio transmitters. If you use both filters, connect the output of the first filter to the input of the second (don't forget to connect their ground terminals together). It doesn't matter which filter is connected first.

These filters also work well with random wire antennas. Just connect the antenna in place of the phone line.

The filter(s) should be connected to the phone line in this manner:

```
Phone line RF connector
red -------- center cond. / \
or o----| |-------------------------|-o | To receiver
green | | \ /
| FILTER | 50 ohm coax |
ground | | |
or o----| |----------------------------+
N.C. -------- shield
```

```
| RECOMMENDED FILTERS
|
| If you don't want to make your own filters, the following have good
| performance, are well-built and affordable:
|
| Model 400 BCB interference filter (3.5 MHz highpass)

|
```

| Model 420 HF lowpass filter (30 MHz lowpass)
| http://www.iceradioproducts.com/filtersrf.html#3
| (scroll down a bit to see the model 420)
|
| If you have a random-wire antenna, the following unit will provide
| impedance matching and lightning protection (connect antenna to 450-ohm
| terminal):
|
| Model 182A beverage matching unit

FILTER PLANS

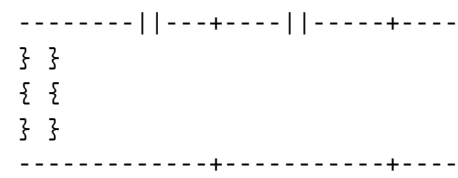
The original credit for the high-pass and low-pass filters goes to Paul Blumstein and John Shalamskas, respectively. Edited versions of their articles are included here:

Date: 09 Jan 91 00:54:08 GMT
From: paulb@harley.TTI.COM (Paul Blumstein)
Subject: BC Band Hi-Pass Filter

The following ascii-schematic diagram is a high pass filter that will filter out Broadcast Band (MW) stations. I found it a great boon to my shortwave listening since local MW stations overload my ATS-803A front end & appear in SW, especially with a long antenna.

If you remember my antenna saga, I went from 50 feet to 150 feet & had overload problems causing me to cut back to 50 feet. (Even at 50 feet, I still have some MW interference). I took the advice of Gary Coffman and looked up filters in the ARRL Handbook. With the filter in place, I intend to try to increase my antenna length again.

Anywho, here is the filter, for interested parties.



The outer capacitors are 1500 pf ceramic disks.
The inner capacitor is 820 pf ceramic disk.
The squiggly things are coils (two total). Each one is 2.7 uh.
(a close value will do).

Subject: Re: BC Band Hi-Pass Filter

I built the filter that Paul Blumstein posted recently and measured it on a gain-phase analyzer. Here are its characteristics:

100 kHz -120dB
500 kHz -68dB

1000 kHz -38dB
1600 kHz -15dB
2100 kHz -3dB

The source and load impedances were 50 ohms. Because the filter has five elements, the attenuation is 30dB per octave. The measurements confirmed this.

This filter seems to be a good compromise between interference attenuation and passband response. There is very little attenuation in the 120m band and above. It could use a little more attenuation at the upper end of MW, which could be done with more stages or a higher cutoff frequency. Alternatively, you could build two of these filters and put them in series. (Since two 1500pF capacitors in series are really 750pF, you could eliminate one cap.)

Just for fun, I put 470 ohms in series with the input to see how the filter performed with an antenna mismatch. The response was:

100 kHz -105dB
500 kHz -60dB
1000 kHz -35dB
1600 kHz -15dB
2300 kHz -3dB

These figures are normalized to the passband response of -15dB, which is due to the impedance mismatch between the source and load and would have been there without the filter. Hence, the filter works almost as well in spite of the mismatch, which is good news to those who use long-wire antennas.

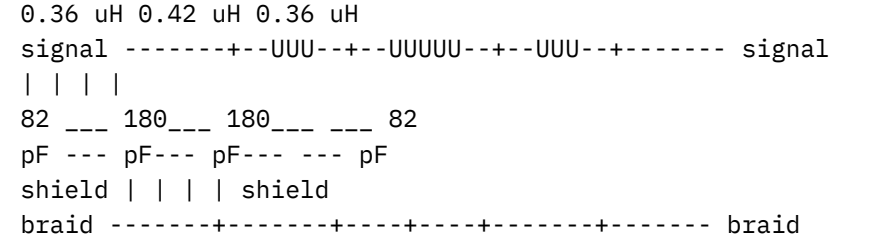
Subject: Construction of filters for SW reception

Several people have asked for construction details of the filters I built for my DX-440.

The high-pass filter helped some, but in my location the VHF/UHF broadcasters are also causing problems. So, I dug out the ARRL handbook and chose a 7-element Chebyshev low-pass design that is -3 dB at 35 MHz, -20 dB at 43 MHz, and -50 dB at 64 MHz (all calculated; it works well in practice!)

LOW-PASS FILTER (Rejects FM, TV, etc.)



|
chassis ground

I had to do a little more improvising at this point. I used .33 uH instead of .36, and .66 uH instead of .42, but it works fine.

The 5-lug terminal strips were perfect for these circuits, since there are 4 lugs plus a grounded lug. All "ground" connections go to the lug that is mounted to the chassis, and the other 4 lugs are used for each of the connections on the signal line. One terminal strip is used per filter. Since both filters were necessary to clean up the hash, I am going to put them both into one box when I get the time.

The proper way to connect them is in series, i.e.

signal in ------- filter 1 -------- filter 2 -------- signal out

There is no difference between ends. They are "bilateral" which means you can't possibly hook them up backwards. (In the above schematics, left and right ends are interchangeable.)

COIL WINDING

You can make the coils yourself using this formula:

L = 0.2 * B^2 * N^2 / (3B + 9A + 10C)

L is the inductance, in uH
A is the length of the coil, in inches
B is the mean diameter of the coil, in inches
C is the diameter of the wire, in inches
N is the number of turns

For small wire, you can assume C = 0.

Parts for the filters can be obtained from the following source:

Until you realize it's a simulcast...

The World Service was fun when you could get a good signal (I could
hear the air handlers in Bush House). Being off-beam is for DXers,
not program listeners.

Yeah, that is a good thing to do. No doubt there
are many articles on the "all dots" problem. Googling
should work too.
People talk about the potting compound but I
don't think bad solder joints should be under
emphasized. The single sided boards used in these
radios are quite susceptible to bad solder joints.
Thermal cycling over the years stresses them till
they lose continuity.

Hi,

Here is a link to a site that will give you information on how to dissemble the radio. http://www.tesp.com/sw100faq.htm#fixed

I once fitted new ribbon cables to mine and found it to be quite tricky and required a large illuminated magnifying glass and very steady hands!

As regards the removal of corrosion, I have never found a cure for it's removal on other pieces of electronic equipment.

Good luck,

Tom

Once the corrosion has begun, there's no way to reverse the damage,
only stop the corrosive action. Various recommendations suggest using a
thick backing soda paste followed by vigorous and careful rinsing.

I've used this method with mixed results.

The biggest issue, once the corrosion has begun, is that the hard
plate is removed from the base metal, so oxidation is likely to occur
once corrosion has stopped and the metal cleaned.

There, I can help.

Once the corrosive material has been removed and the corrosion
process stopped, contacts can be cleaned with a dremel tool and
polishing rouge. This removes the rough and oxidation prone corroded
metal product, and rough base metal, returning the metal to a smooth
contact surface.

Coating the metal, then, with a neutral grease will slow further
oxidation. You may then have to clean the contact from time to time, but
serviceability will remain assured for as long as you own the radio.

Easy does it on the grease. "Just enough" is good. Too much will be
messy. And magically, appear only on your best or favorite white shirts.

You don't wear a white shirt to a barbecue joint for the same reason.

Natural greases with high pressure additives are not recommended.
First of all, they smell. Second, without a lot of high temp activity,

they will trap moisture, and will create more problems down the road.
Synthetic greases are good. Teflon greases are iffy, since some carriers
are water soluble and lead to some real nasty corrosion of their own.
Especially on zinc and aluminum. Petroleum Jelly works, if you check
frequently and clean regularly

Treating the contact, after cleaning but before applying the grease,
with DeOxit wouldn't hurt.

If you take your time, be thorough, you need not have any further
problem with your radio. It won't be 'maintenance free' but it won't
give you any problems, either.

Then why do we still have over 30,000 U.S.Troops in South Korea?
Because, technically, we are still at war with North Korea.

What is/are Monkyards? Do you mean Montagnards? That is what we called them when I was over there.Some Montagnards wanted to come and live in America.(Legal Immigration, I doubt if any Montagnards would want to sneak across our borders like bush's illegal aliens buddies are doing) Last I read about, U.S.fed govt wasen't letting any Montagnards Immigrate (Legally Immigrate) to America.

Hi,

After doing a cable/hinge mod to this set , I would have second thoughts about
dismantling and eventually trying to remove corrotion on this particular radio.

You are in effect performing "micro-surgery" here. Good Luck in not damaging the
very miniscule and delicate circuits and components.

Putting it back together again is also a big challenge.

I would say I was more lucky than I could hope for , dismantling a 100% working
set to do the mod and sucessfully putting ity back together again.

At least , if the set is dead - you have nothing to loose apart from the time spent.

So if you have the time and the patience and the know how, Good Luck!

Now you have been warned :)

Greetings,
Knut Otterbeck

Yeah no shit Walter Cronkite. Anyone with a radio or tv knew this long ago. Does it make you feel like you are part of the story because you type in a post about an event?

One other thing - have you fucked your daughter yet today? Or was it your cousins turn?

Now do the world a favor and kill yourself you fat disgusting pile of southern in bred white trash.

The I-35 Bridge Collapse! Bush is at it again!

The Trilateral Commission controlled media is telling you it's not terrorism. But it actually is. George Bush used his famous technical "strategery" to bring down the bridge into the Mississippi River.

Our new video, just like our previous videos, contains that same high quality grainy photography. We do belive we've even captured Presdient Bush swinging from a rope under the bridge, securing the giant chains and tow truck that brought this massive structure down.

Coming from you (a parasite who is living off the taxpayers dollars)
I'll consider the source. Why are all you losers military retirees?
It's because you couldn't get real jobs in the real world. As everyone
knows anyone who was worth their salt did their time and got out - the
way it should be. Now go have your mail order bride slut whore do what
you are paying her to do.

You are a military retiree (in other words "couldn't get a real job in
the real world" with a mail order foreign wife (in other words "ex bar
whore who marries a military loser for money and security").

(The US 82 Greenville Bridge across the Mississippi River)

I listen to the JT and Dave radio talk show, Monday through Friday.Over a month ago and more recently, they said some Mexicans are doing the welding on that new bridge.More than one person has phoned into JT and Dave's radio talk show before about that.Would you trust driving across a bridge that has been welded by bush's illegal aliens? I wouldn't!

For many years we have all been warned about faulty bridges and other kinds of structures.I am glad I don't have to drive across any bridges anymore.And under or over highway overpasses.When I go to the food store, I stick to the slow poke old back roads.Across Highway 80 and get on Jackson Highway and take a left on Morson Road to the Goodwill store.Then from the Goodwill store, on JR Lynch Road and then take a right on Robinson Road Extension to Robinson Road to Greenway Drive to the Wal Mart store food department.I don't have to get on any of them bridges and overpasses any where around here.

Back in 94, you could get a used Kiwa for about $200, and probably
worth it. As I've stated before, I have a friend will all three. That
is, a kiwa, quantum, and wellbrook, and we tested them on a Drake R8B.
Once in a while the kiwa and quantum seem better than the wellbrook,
but it is hard to tell. You can't trust S meters on any antenna with
an amplifier. You have to use your ear. If I were to get something to
suppliment my Wellbrook, it would probably be the Quantum. It can
sometimes get a better null than the Wellbrook, but the differences
are slight.

I have ALREADY heard three callers into a rather well known kook radio shortwave talk show claiming that the bridge was blown up as part of a black-op's program and the date and location of the bridge along with the position of Jupiter and Venus and the Moon in the sky had some significance in the scheme of things.....

It didn't take them long eh folks!! That's why I just LOVE listening to domestic shortwave radio, more kooks and goofballs than anyplace else, and that's including 75 Meters too!

Damn Larry, hope you didn't get a nose bleed way up north there. I stayed in Sec. 1 most of the time.

I came to Saigon every three weeks for briefings and for a little R&R. I rode the grave plane down on the none stop hop then up on the odd day. I traveled with the body bags and dogs. I stayed @ the Park Hotel, bar hopped, danced and had a great time.

I believe that bridge collasped because of structual failure.It didn't have to happen though.They knew about the cracks in that steel.The bridge should have been closed down untill that problem had been repaired.

69. Failure Rate of the E1XM

Newsgroup: rec.radio.shortwave

Hey there, Im curious of all you E1XM owners out there if you've experienced an unusually high failure rate of the radio. I purchased mine in June 06 as a
factory refurb from Heartland America (sn/35xx). Out of the box it had a dead
4khz filter and had to go to Drake for repair, 11 months later the thing went DOA and again had to goto Drake. In both these instances Eton's customer service was great and they took care of the problem. Well, now the radio is inoperable (again), none of the softkeys work (no direct freq selection, mode, bw, etc), only the knobs work, I have emailed Eton three times and have received no response, I emailed Drake and they replied they will service it for $80 an hour. Anyone out there experiencing so many problems with this model? When it works, its my favorite receiver, and Ive never used it portable or even with batteries (oh yeah, it wont work on DC right now either...).
I dont want this to become a money pit, any feedback on this?

Chris

Chris,

Your personal experience makes it sound like they need
a LEMON LAW for the Eton E1XM Radio; well at least
for yours. Sorry to hear about all these problems.

You have to use mild acid on alkaline battery ooze. White vinegar is
a good choice. Use a flux brush. Rinse with anhydrol, then distilled
water. Dry with gentle warm dry air (or leave it in the sun for a
day).

Yo Burr. we just called them Yards. bad ass dudes.

i believe a bunch made it to the states, not sure,

been too long. we didn't do the card thing, first

cav was into that crap. did the convoy up the A-

valley once. armored duce and a half. had a ROK

convoy a few miles ahead of us. we got hit and

they didn't. we had a lot of fun working with the

Aussies. those guys were great. had me howling.

- That looks simple enough and a good workable solution.
-
- I was confused about the A,B,C feed points.
-
- Are these all spliced together to the feed in line.
- or are they separated by a switch so that they are
- used separately on each respective band?

- Thanks

Simpler 3-Bander Horizontal Wire Antenna for Shortwave Listening
(SWL) - Message # 14039
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/14069
.
"A" and "B" and "C" are simply Designators for the 'individual'
Antenna Wires in the Three Wire Rotor Cable
.
At the Feed-Point "X" are three Wires are Connected together.
.
<- Feed-Point . . . . . Far-End ->
.
A> X-------------------------------------------o 48 Feet ~ 60m
.
B> X----------------------------------o_o--------o 39 Feet ~ 49m
.
C> X----------------------------o_o--------------o 33 Feet ~ 41m
.
A = 48 Feet ~ 1/4 WL for 60 Metre Shortwave Band ~ 4.7 MHz
B = 39 Feet ~ 1/4 WL for 49 Metre Shortwave Band ~ 5.9 MHz
C = 33 Feet ~ 1/4 WL for 41 Metre Shortwave Band ~ 7.1 MHz
.
"X" = Antenna Feed-Point Connection-Point for All Three Wires
"-" = Wire Antenna Element
"o" = End 'No' Connection
```

"_" = One Inch Gap {Space between the Wire Ends}
.
.
* * * REVISION * * *
.
Re-Order the Three Wires with the {Un-Cut} "A" in the Center
and the "Cut" "B" and "C" Wires on the Out-Side.
.
B> X----------------------------------o_o--------'b' 39 Feet ~ 49m
.
A> X---'a' 48 Feet ~ 60m
.
C> X----------------------------o_o--------------'c' 33 Feet ~ 41m
.
WHY - This 'places' the Two Wires that have to be "Cut" with
a One-Inch piece {Gap} remove on the Out-Side to make the build
process a little easier.
.
* * * ALTERATION * * *
.
The 'b' Far-End 9-Feet Remnant of "B" can be joined to the
'c' Far-End 15-Feet Remnant of "C" to form a bent 24 Foot
passively-coupled Antenna Element for the 31m Band. Can't
hurt and may help.
.
* * * THE FEED=POINT CONNECTION * * *
.
This is a Multi-Element Antenna that is "Cut' for Three
Shortwave Bands. The Feed-in-Line can be a Coax Cable
with the Inner Conductor 'connected' to the Wire Antenna
Elements -and- having the Outer-Shield of the Coax Cable
Grounded at/in the Radio Shack.
.
NOTE - The use of a 9:1 Matching Transformer between the
Antenna Elements and the Coax Cable feed-in-line is "Optional"
-but- May provide better performance. In this instance
the Matching Transformer* would be Wired :
.
Nine-Side : Antenna Element Wires and the Outer-Shield of
the Coax Cable.
.
One-Side : Inner Conductor of the Coax Cable and the Outer
Shield of the Coax Cable.
.
* This configuation of the Matching Transformer is a
'so-called' Magnetic Longwire Balun (MLB)
.
.
hope this helps - iane ~ RHF

78. Building a "MLB" from a TV Matching Transformer ? -a la- John Doty

Building a "MLB" from a TV Matching Transformer ? -a la- John Doty
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/14088

Re-Reading and Trying Again . . .

The Perfect Feedline for Wire Antennas -by- John Doty
http://www.hard-core-dx.com/nordicdx/antenna/feed/feed1.html

Source : Hard Core DX .Com => http://www.hard-core-dx.com/

Per John Doty - "Construction:"

"The transformer is built around a toroid extracted from a TV
"matching transformer". "

"The transformer windings should be made with thin wire: I use #32
magnet wire."

"The primary is 30 turns while the secondary is 10 turns."

OK - So Has Anyone Tried This ?

Everyone one of these 'tiny' little Two-Hole Ferrite Cores
that I have tried with the smallest Magnet Wire I can get
only results in a Primary of 6 Turns (12T) and a Secondary
of 2 (4) Turns for a 9:1 Ratio.

I don't remember the name of that street in down town Saigon, but there was a U.S.O.on that street and right across the street from the U.S.O., there was a bar.I used to catch a Navy shuttle bus from Tan Son Nhut to down town Saigon (usually, I would get off the bus by a library and in front of the library, there was a big round water fountain, but there was no water in the fountain) and go to the U.S.O.and get a couple of sandwichies and pastry and Shasta (It hasta be Shasta) grape soda pop for a Vietnamese girlfriend who worked at that bar.Her sister worked at a hotel bar on the corner of the street a short ways up the street from the bar where my girlfriend worked.Sometimes, I would step over to the hotel bar and buy a glass of Elephants milk.My Vietnamese girlfriend once told me she and her sister were from Rach Gia,Vietnam.

Gee, your announcement was certainly written to impress and I'm sure
it must have some relevance to some discussion somewhere. I wonder

No prob at all, one of my friend has Asperger. He's pretty smart
though and never had any problems seeing sense or nonsense for that
matter. Also one of the best person I've gotten to know from the net,
although admittedly he claims he does better online than in life. =P

I don't know about your friend, but most "Asperger's Syndrome" diagnoses are self-diagnoses. The number of proclaimed AS cases has gone up by a factor of 20 since 1980.

It's the trendy self-diagnosis, much the way "Chronic Fatigue Syndrome" is.

As in:

"He's a genius, but he plays Worlds of Warcraft all day in his mother's rec room because he's got Asperger's. So sad."

"I can't work and am on permanent disability because of Chronic Fatigue."

Add to this the casual self-diagnoses--or diagnoses with the help of a suitably-chosen doctor--of "Attention Deficit Disorder" (ADD and ADHD) and "Bipoloar Disorder," and one sees that society is providing many excuses for failure.

We taxpayers are expected to work harder and longer to pay for the upkeep of a rapidly-expanding number of AS, CFS, ADHD, and BD layabouts.

Now, wait a sec - You must be kidding. 15 miles is *next door* in the Bay Area. People drive/BART/bus 3-6 times that far every day just to commute. Some come in from more than 100 miles out by train or car.

Richmond is a short hop from my house in *San Lorenzo*, let alone Oakland.

In 15 miles, I could cross Saratoga, San Jose, Cupertino, and
Sunnyvale. If I did it right, I could probably put Mountain VIew in

Heck, I'd heard earlier that it was the fault of Dick Cheney. He was down in the bunker, playing with the joystick and accidentally zapped the bridge.

He had been trying to work up another Katrina class storm.

Touch each of these towns, maybe, since they all almost intersect.
But cross them all? I am doubtful. That would require a somewhat
tortuous route.

It'll be Bush's fault before the weekend.

Stories are beginning to surface about the history of this bridge,
and how it was never intended to be an arterial conduit in the first place.

This is the "Shortwave" newsgroup, not the "listen live on the internet"
newsgroup or the "listen to the podcast" newsgroup.

Having listened virtually every day to the line-up of shows on the
Shortwave, and realizing that just this week, the line-up of shows are
missing, and calling the station's 1-800 number and discovering it non-
operative, I phoned the station's regular number. It was admitted that
RBN is not on the air, as John was trying to determine which shows to
keep. My point is that 24 hours per day of Brother Stair (whose shows
seemingly were being played in place of the RBN shows), and of Pastor
Peter on frequencies better suited to the needs of RBN, the Christian
stuff is being overplayed, to the extreme.

Yeah, that's it! George and his brother were running coke to Minneapolis and they thought they were being followed, buried the stuff near one of the supports of the bridge, and boom, 40 years later the results of their digging brought the bridge down.

Post the Results of your "Findings" here on RRS
and become a Resource for some one with a
problem with one of the McKay Dymek Active
Antennas in the future.

And post a Copy of your Results and Findings to
the "Loop Antenna" Group on YAHOO !
GoTo=> http://groups.yahoo.com/group/loopantennas/
They are also a Resource for all kinds of Loop
Antennas Questions, Problems and Issues.

A few days ago, I read on the net that Dell is going to start building some Dell computers in India.Meanwhile, fed govt won't allow any of those Air Cars which are being built in India (www.devilfinder.com The Air Car) to be sold in America.Something about the Air Car's body panels are glued together.Those big new Boeing Airplane body panels are glued together.I reckon as how I am going to have to search the junk yards (Junkyard Wars! on DirevTV) around here and find me some junk high pressure snorkle tanks and a junk high pressure snorkle tank air compressor and some kind of a junk air/pneumatic motor and build my own little ''Air Car''.

BpnJ & M-Sushi,

When I drive down the Hill from Twain Harte to Sonora
to Columbia - It's about 15 Miles one-way - just to go
Shopping : While here in the SF Bay Area 15 Miles
can take you through a lot of places.

However, I would rather Drive 15 Miles on a Country
Road : The be DRIVING 15 MILES on a Buzy City
Street -or- a Crowded Freeway.

The again just think of what a Short Wave has to
'go through' just to get to you . . .

distance is relative to where you are 'at' -and-
where you want to 'go' - in your mind ~ RHF

Dr. Artaud,

Shortwave Radio Is What It Is -and- Commercial Shortwave Radio
in the USA is Self Promotion Pay-O-La Radio.

Maybe Air America Radio should be on the Shortwave Radio
under the Fairness Doctrine - Oops we already had Radio For
Peace International (RFPI) and they did not pay their bills either.

Shortwave Radio in the USA is a Business and the only Business
that seem to use it is Pay-for-Pray Religious Broadcasters - Who
often Support It Through 'Other Means'.

Really?!

There are no "controls" on individually importing electronic
merchandise into Canada.

Just pay yer taxes due, and all's OK.

You mention the 1102 and 1103, both Degen models that are replicated
in the Kaito range.

"Prove" that the CRA has "banned" direct Degen imports.

Who are these "complaining retailers"?

And how/where/why did the "Eton" reference appear?

1) As far as I can tell, "anhydrol" is 85% ethanol and 12 % isopropanol and methanol. Where do you buy anhydrol and why not just use hardware store alcohol (shellac thinner)?

2) Wouldn't it be better to use the anhydrol/alcohol as the final step (or just skip the water entirely), rather than water as the last step? The alcohol will evaporate much more quickly than the water.

Just like the sign on Truman's desk said-- "The buck stops here".

It's called "responsibility". The bastards (Republican -or- Democrat)
try to save money by deferring maintenance. Seeing as you didn't share
the article with us, I think the point of your newspaper was that he was
THE governor, not that he was a Republican governor. Why make it a

I didn't write it. I only passed it on as an example of my earlier
assertion.

In his case, he went through quite a lot of examinations before the
diagnosis was made so I doubt it was self diagnosis. Frankly most of
us are clinically insane one way or another, if not many ways, so I
don't really care if my friends has AS or BS, there's no excuse for
being mean or stupid as a result of being too lazy to think =P

Slinky antennas do work, but they are a bit of a hassle to travel with
and set up. I much prefer a wind-up antenna on a spool like the ones
Radio Shack sells. Or, just a length of wire performs and you just
roll it up around your fist and tie when done.

It's easy to go overboard on some custom design wire antenna. It's
really just the wire you are interested in.

The water free alcohol is to wash away any salts left over. I like to
use pure water after the alcohol wash because it's pure water.

More disaster porn. This is where the World Service comes in real handy. A badly designed piece of crap bridge succumbs to Murphy's Law; get over it (there's more where that came from).

Since Asperger's is is described as a mild form of Autism, it leaves
a lot of doors open for diagnosis. In fact any circumscribed area of
interest: cars, computers, trains, meteorology and astrononi...etc.
could be a symptom of Asperger's http://www.aspergers.com/aspclin.htm
Any nerd characteristics is certainly very suspect. Anyone who dives
into one particular subject. Doing math is certainly a health hazard.

I sometimes wonder if all this really comes from some dissatisfaction
by others who would like to get closer to the sufferer, but doesn't
quite catch their imagination. Hence it's as much other people's
problem as the sufferers. There should be an Asperger's contact
deficiency syndrome...

Where did you get the idea that it was badly designed. Given that the bridge was built in the 1960's, used extensively and regularly dosed with road salt I suspect that the local authorities failed to spend the money to maintain the bridge. Inspections notwithstanding.

Didn't they also spend millions restoring the theatre downtown Minneapolis...and building a replica sailing ship for the river front?

To be perfectly fair, there really isn't a budget in most states for fixing things.

Roads are built to be rebuilt, but not restored. The very structure of the Interstates requires them to be pulled up once patching ceases to be effective, instead of merely resurfacing, or restoring the top two layers, as the Germans do. If we built roads with the intention of maintaining, rather than replacing them, in the first place, there would be a whole lot of money that could be wasted elsewhere.

But who listens to me?

Similarly, bridges, railways, electrical systems...they're all built to be replaced as needed, rather than restored. With a little longer vision, we'd have a much less obsolete infrastructure in this country, and a lot more money for the frills that seem to delight politicians, so.

But this is what we get for electing career politicians who learn to focus only on the next 2/4 year election rather than the term/terms before them. Career politicians who learn that appearance of activity is more important than results.

We get the government we deserve. If we stopped putting up with it, things would change.

What does your buying a 7600 and listening to VOA and the other
defunct radio stations have to do with a post about troops from the
ROK. Unless Mike/Burr is making some imaginary reference to the awe-
inspiring ROK troops pulling out of Afghanistan by year-end.

Interviews with engineers revealed that the bridge was not designed
to withstand the traffic it eventually saw. It was not supposed to see
arterial traffic, and was underdesigned for the 100,000+ cars it saw
each day.

Punnett was on WLS yesterday talking about this with Roe Conn. An ABC
correspondent confirmed that he had spoken with civil engineers who made
the same determination.

That it lasted as long as it did suggests that it was overbuilt to
its specification. Just underbuilt to its application.

No kidding. In a couple of days, I'm driving 1,000 miles in about 16 hours. *That's* a long drive...but it will yield great reward for the effort expended, so it will be a breeze.

I am not knocking the design of that I-35 W Bridge, I believe it was designed and built properly for it's original intent and purpose.Yesterday, I read an article by Richard Sauder (Underground Bases and Tunnels.Underwater Bases.I have both of his books here.Richard Saudet talks just like an old country boy) that the bridge had a deicing system for melting ice.I guess (only guessing) all of that salt that was used on that bridge over the years sure didn't contribute much to the health of that bridge.Here in Mississippi we use sand on icy (yes, sometimes in the wintertimes, we do get iced over bridges and overpasses) Sand Good, Salt Not Good.I probally use wayyyy too much Mortons Iodized Salt (When it Rains, It Pours) on my grub though.

Exactly right. as designed, it was not supposed to. However, once in
place, it became clear that the mission would change. "Limited Access"
meant few interchanges, and occasional entrance ramps. Today, the
interestates are accessible at nearly every crossroad, and carry
traffic, local and intrastate distances...for which none of the roads
were designed.

- The water free alcohol is to wash away any salts left over.

Without desolving the salts and causing more corrosion.

- I like to use pure water after the alcohol wash because it's pure
water.

To flush out the area and cleanse it.

We used to have one car for the whole family too.And dirt roads and we had to roll the windows up real quick or we would choke on the dust from other vehicles passing by.And there were cars and trucks with those flat plate glass windshields and when the sun caught those windshiels just right from oncoming vehicles, they would blind you.Cars and trucks had running boards that were handy seats to sit on, whether it was our vehicle or not.It didn't matter, everybody sat on everybody's vehicle's running boards.Modern day cars and trucks haven't advanced over the years at all.

Yo don't say what kind of radio you're using, but the wind-up spools work much better than the whip on most portables. A simple length of wire with an alligator clip works just as well, but the convenient packaging of the antennas you mentioned make it worth the money and very convenient to travel with and also store away. There's also a Radio Shack version. These are selling for about $10 right now on eBay.

Reviews are mixed on slinkys. Some poeple love them, but most serious tests have shown they are no better than a simple long wire.

That salt rust y'alls vehicles out too.Not much in the way of rusted out vehicles around here, unless they are from the coast, rusted out from that salty spray water around there.I have seen lots of them before in coastal areas.

All that salt made me hungry.I got out 16 Nabisco Saltine salty crackers and I put some salty peanut butter between them.I gave doggy a forth of each one I made.

UrS,

The 'difference in a Radios 3-Foot Whip Antenna
-vice- The 23-Feet Roll-Up Antenna yeilds about
a 3 db Gain in Signal Strength : 3 > 6 > 12 > 24
Beyond that more and more wire is needed : 48 >
96 > 192 to get the next beig step in Signal.

Plus the simple physical fact that 23-Feet is about
7+ Times the Signal Capture Area as 3-Feet.

IIRC - The 23-Feet Roll-Up Antenna's use Litz Wire
with a Durable Outer Insulator like a Coax uses.

However, for 'permanent' At-Home-Use a Slinky Dipole
Centered in a Conner and rig along Two Adjacent Walls
with a Speaker Wire feed-in-line can perform better.

Either use a 1/8" Mono-Plug with a 'portable' AM/FM
Shortwave Radio's Enternal Antenna Jack -or- Connect
directly to a Shortwave Receiver's HI-Z Terminals.

Using the 23-Feet Roll-Up Antenna "Clip-To" the
Radio's Whip Antenna.

The Dipole will generally be more Quieter then the
simple Single Wire Extention of the Roll-Up Antenna
-and- Since the Dipole is a "Balance" Antenna it
does not require a Ground.

Plus - For the Most part 'mounting' the Dipole in a
"Corner" will change it from a basic Bi-Directional
Antenna to a Omni {Quad} Directional Antenna.

Tim May - you are an idiot!!!!!!!

Where exactly do you get the "most AS diagnosis are self-diagniosis"
from?

Your head?

LOL :-))

That's not the way to do serious research.

All the people I know with AS have an official dx by recognised
clinical psychologists specialising in Autism and Asperger's.
Including myself.

why don't you just say you're jealous and be done with it?

:-))

The main thing about a slinky is you can use it to get the most out
of a small space. I'm playing with a slinky dipole for the 80 metre
band, it certainly makes a reasonable receiving antenna and allows
me to get a signal out from from a 30 foot loft! You can see the
antenna here:
http://www.radiowymsey.org/FanDipole/slinky.htm

By the way, I don't know what what price the slinky antennas are but
they are simple to make. See
http://mw5hoc.4t.com/custom2.html and

In a nutshell the Eton E1XM is yet another piece of junk from
the Asian sweatshops that make them. Just another Chinese
made piece of crap radio that tries and fails to be all-things-radio
by loading
it up with bells and whistles and fails in the end. The plastic case
is chinzy
and CPU noise is higher than normal. The sat antenna wire broke
after just 2 months as it was cheap plastic wire used. I paid $189.00
for mine on e-Bay from closeout place that had 4 of them in stock
new in the box. After several months of use I can say
it's not even worth $89.95 let alone the insane manufacturer's
suggested retail price of $399.00 for this cheap piece of radiocrap.
Look for it on e-Bay around the end of the month. I am sure that
I can find a sucker someplace to give me what I paid for it new.

Alex Jones was on C2CAM for one whole hour with Snorey last

eyewitnesses"
who claim to have seen "puffs of smoke comming from under

My guess is Alex and his 'anonymous eyewitnesses' who were under the

BUSHITE AMERKA CLAIMS THIS DOESN'T WARRANT THE DEATH SENTENCE?

Again, evil bushite THIEVES claim they are justified when
indiscriminately bombing populated cities to MURDER US People.

General Johnny would teach MY soldiers to immediately arrest
to kill for such criminality. In fact, I'd likely even throw
in some bonus cash, an a Freedom medal from all lovers of
Liberty. Did you know, many bushite sing a song about killing
innocent young girls for pleasure? Did you know that also, an
"American" radio host likes playing that same song as recorded
on "American" airwaves? Fight back for God, or die from self
contempt my friends, fight back for life and love.

Again, evil bushite THIEVES claim they are justified when
indiscriminately bombing populated cities to MURDER US People.
All to help 'escape' the neocon ENEMIES of America - they also
support "officially" destroying Our public infrastructure,
thieving humanitarian aid, while incarcerating innocent people
to collectively be punished by the TRULY Satanic enemies of
GOD. Ten "CIA" bushite enemies have been found to have
kidnapped near one thousand innocent Americans to be tortured
to death, in tyrannical nations friendly under American funding
by Bush unquestioningly. Fight back for your neighbor, fight
back for America, fight back for YOURSELF. Or, don't.

See the bushite, you bill it for Christ, You bill it for America, You bill it for them, you bill it for US.

Murdering bushite gang rapists try escaping true accountability

http://womensspace.wordpress.com/2006/07/09/rape-of-the-hadji-girl-part-3-five-more-us-soldiers-charged-abir-hamzah-was-14-years-old/

/ / Why did the Army, within three hours, return to tell neighbors that this was the work of "insurgents" apparently without any investigation? \ \

See? in Johnny's world, that "the Army" person would have been the FIRST questioned, then likely arrested. But look, it hasn't even been acknowledged as evil doing in progress. (Every time you read, "The Army says..", become aware.)

It should be noted, ungodly bushite enemy commanders call every car bomb in Iraq, al-Qaida, without even pretending to do freedom operations for YOUR protections, as just another dead body in the rubble. (Likely caused by Aegis for cash profit.) So then, look my friends, Amerka refuses to demand justice to save the lives of their very own sons and daughters. And when, WE, Humanity, beg them to answer our calls for accountability, they refuse but for to LIE, stating publicly, "God" would grant robbing from innocent others, to enrich their great unholy tyrannical demon liar. They know easily that the bushmob did 911, and they like it. No, they crave it. The chance of murdering their own "loves" to enslave the human race for the antichrist, sounds great, just as long as they can get themselves in on the take.

/ / Idiot General Says Dead U.S. Troops Best Reason To Keep War Going And Kill More U.S. Troops

[Option B: More Dead U.S. Generals And Fewer Dead U.S. Troops ?] \ \

If the sacrifice of soldiers lives is going to mean anything, it going to mean how long it took, Americans to care for themselves as really worth something. When, or if that day should come, it will be the day where Iraqis victims are seen, as just you or me. Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

Just look at that my friends of Earth just look at that. Americans speak only contempt for the value of human life. Every day, INNOCENT Iraqis die by the criminal actions of the demonic neocon enemy forces of EVIL, and our deaths as the god loving mean nothing. A small few die in a bridge ACCIDENT,

and every corporate channel devotes the entire day's news as it. Allawi confesses to killing children for "CIA" money, and there, as with the soldiers who braggingly, beat innocent children to death for sexual pleasure, bomb people indiscriminately, or steal all the humanitarian aid, don't command your slightest concern as impartial paying for it TV viewers. They say, US people who aren't "Americans", do not deserve due process, the freedoms they claim to own exclusively, of which WE, are granted nothing of. See?, by not using evidence to from your guilty verdicts, how can it be therefore possible, to know, you've arrested, tried, then executed a mass murdering NEOCON war criminal? I don't think Americans could possibly be more disrespectful to God and country, Johnny and Justice right now, do You?

http://existentialistcowboy.blogspot.com/2007/06/911-culprits-why-towers-really-fell.html

/ / We know that a crime was committed on 911. George W. Bush, of course, quashed all investigations before they could begin. Since when are crimes not investigated? [...] It is not too late, however, to begin such an investigation. There is no statute of limitations on mass murder. \ \

We, as Humanity, have to rise against the neocon LIAR enemies who forsake the value of Human life. Death to the bushite, death to the enemies of America's America.

/ / Army Secretary Pete Geren asked a military review panel to decide whether Lt. Gen. Philip Kensinger, who led Army special forces operations in Afghanistan after the Sept. 11 attacks, should also have his rank reduced. \ \

/ / Congressman Dennis Kucinich, a member of the House oversight and government reform committee, which has been investigating war contractors. "There's no democratic control and there's no intention to have democratic control here." \ \

Right. The demonic lawless actions of Aegis posing as al-Qaida killing police officers undermine freedom for Iraqis and Americans, alone with ALL the rest of US. All criminally gotten assets of lawless mercenaries will be hunted by every police service; those that complain as traitors to Freedom as Justice, WE, the real Patriot warriors, committed to defensive measures, will be rewarded to bill for. IF! Johnny is recognized a Mythical King with money to spend better than a neocon saboteur. Your call... Reminder: The neocons in YOUR power, were never elected, nor, was Bush the demon enemy of

all Human Life. A demon that says if you disagree with his blind blanket statements against innocent Life, YOUR a terrorist. At least with GOD, we'd be only killing criminals we couldn't otherwise defend ourselves from with evidenced conclusion through practiced Law judged fairly.

/ / TheSpyWhoBilledMe.com regularly breaks news on the clandestine world of private contractors and US intelligence, recently established that Washington spends $42bn (£21bn) annually on private intelligence contractors \ \

do the math - do the math - do the math - do the math

42 billion. 42 thousand million. Or, hiring maybe twenty or thirty bushite LIAR enemies, who blindly giving Americans pay not only billion dollar saleries, but also with their forsaken lives as unworthy of real protections. CNN, CBC, and FOXNEWS knows the bushmob did 911. [Nazi zionists suck!]

So, million dollar saleries? I doubt. Likely a neocon enemy or two robbing from an undefended America. Remember, Peter Power wants US to believe ALL of Scotland Yard would murder Brits for stolen bucks. Frankly chaps, I just refuse to believe such bullocks.

The part where pro-bush "American" soldiers drive over children to kill them for fun, all because they say our Humanity let's those responsible escape retribution for being Satanically evil as enemies to Christ, left me angered beyond words. While CNN, CBC, and FOXNEWS couldn't care less for those children, but will tell us, these 9 accident victims must rule, so far, two full days of wall to wall coverage. "Pro-Western" Allawi blowing up school buses for "CIA" money? Who cares? Really who cares in TV America for defending OUR children's lives I'm saying? Johnny Wizard has been screaming for help to America, begging them to pick up their phones leastly, to air concern for the survival of the Nation, for YEARS! to publicly challenge happy happy, joy joy pro-child killer demon enemy George Norry and bullshitter no-national thief of Life Art Bell, and they've near completely refused while laughing and singing by 'who cares for you' zionist news command. They, as America's Coast to Coast voices, would rather richly die YOU sacrificed for CRIMINAL zionist Israel, (Israel, where the government leaves actual Jews to die in the streets starving as garbage dumps, to make it look good for MORE giving American charitable donations to disappear elsewhere) before saving the lives of THEIR VERY OWN. Americans don't seem to care they die by their own unwillingness to communicate openly for Justice. I ask you again, to spare me a few dollars so I can feed myself. I am actually, near starving, and never in my most feared nightmares, thought this

world, with our communication technology, would leave me without any financial assistance. I seriously need to eat. Please help me, by supporting our cause to not starve to death. If you appreciate my words in defense of the once great Human race, donate a few dollars to this cause. Justice and Freedom for all, especially God as Just, and worthy our praise

Peace.

TRAITORS TO LIFE

"I told him, there's women and kids in that room," Lance Cpl. Humberto M. Mendoza said of Lance Cpl. Stephen B. Tatum. Tatum's response was, "Well, shoot them,"

If Americans don't proudly put to death Tatum, on behalf of the Family that lost their son, their Marine, Johnny will formally conclude, Bushite america is an ungodly evil nazi fascist state of intolerance and hate to US, the Great Human Race. Bushite amerka does not own Freedom, nor do they own our rights to be Just. Join me in demanding the Public execution of the satanic demon liar Tatum, on his Public insistence that murdering innocent families to thieve from for the neocon, is a crime not warranting the death sentence enforced by any family man. Death to the bushite. death to the enemies of man. The neocons will be arrested, tried, and executed for the crimes of 911 as traitors to Life.

Death to the bushite instead of the innocent loved in God

/ / IntelCenter issued a tacit warning that the footage may be re-hashed when they released the "new" tape to the media, but they failed to mention the fact that they released portions of the exact same clips in October 2003. \ \ amazingly - I witnessed blurred-out faces of those they claimed al-Qaida in another instance just recently. (Then, look at the dog fight vids that CNN and CBC refuse to show the dog haters faces in..)

I say American taxing payer folks, flip me some dollars, and I'll pay out rewards - after a moderate lunch - all to take these IntelCenter AL-QAIDA! - AL-QAIDA! - AL-QAIDA! straight to public trial, then public execution for high treason - like holy fuk mon let's get real here People. Or don't and we die further for bin Laden's fear of cameras. Offer a 500,000,000 dollar reward for Zawahererri's crew to get the rest of this done quick like. I wanna rock! Death to the neocon enemy LIARS, death to those who WAR - WAR - WAR innocent Humanity for the continuing bushmob's escape plan from nowhere. See? Heaven or Hell? YOU DECIDE.

Don't EVER forget, the private company Aegis has been officially found dressing up as AL-QAIDA! - AL-QAIDA! - AL-QAIDA! to murder pro-western forces in Iraq, while desecrating Elvis. Elvis Presley. If you don't love Elvis, there is something seriously wrong with America. Now yous messing with a real son-of-bitch. HeY!, question: why don't Americans kill a bushite for Yourself bud? - because Bushites insist "we're" willingly being led by the antichrist enemy of all human life as Satanic LIARS who intend to cheat ourselves of freedom through self respect. Pro-neocon-media enemies are nazi savages, and I don't like it..How about you?

Death to the bushite instead of the innocent loved in God

Time is Up

Al-Qaida Kagan "Al-Qaida, their whole strategy revolves around generating sectarian violence, because that is how they embed themselves within local communities "

What?? For friendship?

What is the demon TRAITOR to HUMANITY in America saying about the reasons he embeds an Iraqi under 50 odd divergent NEOCON labels? Wouldn't most Al-Qaida take great joy in killing a bushite nazi grunt like any real Family man would also? These LIAR dumfuk grunts who cheer "whore yeah", routinely, can barely read or write, so, how possibly does this FOXNEWS expert, expect such ungodly antichrist forces to delineate

Al-Qaida from the local communities they PROVABLY indiscriminately bomb as Satanic?

Kristol and Kagan: 'Put Everything' Behind Escalation So We Can Bomb Iran and Syria

Kristol and Kagan MUST be put to death for treason against America, treason against Life, treason against GOD. They both have continued to Publicly advocate murdering more innocent peoples indiscriminately they call, "Al-Qaida", all to rob further monies from an undefended America. It is easily learned by any as all, the victims of bushite tyranny are exclusively, US, The People, guilty of nothing but our shared love of GOD. Remember forever: there was NO JUSIFIED REASON for bombing PEACEFUL Samara, NONE! that bombers confess was done as ordered by Allawi INDISCRIMINATELY, all for getting killed Marines sent in later for more stolen cash from America. P2OG. [hundreds of bushited Marines died rightly almost immediately - (wow eh?)] A Satanic action, Kistol and Kagan, both blame without thought to question on "Al-Qaida".

The action of Satanic bushite bombers targeting Samara as war criminals is FULLY documented.

Death to the bushite neocon LIARS, death to the enemies of Freedom for Humanity. My beloved friends of GOD, please, when you see the mute bushite, kill it for Christ, kill it for Love, kill it to defend your loved family. (Any soldier who doesn't proudly talk of how it hunts those British soldiers who kidnapped barefoot children and victimized them on video, is a soldier worth destroying NOW to defend GOD and Life from needless death.) I HATE the REAL demon antichrist Christ says.

Kagan "You rarely know in the middle of a war, what the outcome will be."

Johnny Wizard the Creator "I win."

/ / The US has also been backing some pro-western politicians like Iyad Allawi \ \

Do you know who Allawi is? Allawi confesses to blowing up school buses filled with children for "CIA" money. NOT THEORY. HE ADMITS IT AS AN ACTUAL SATANIC DEMON! Allawi, the truly insane mad man, confesses to having ordered the murder of doctors and nurses that treated wounded god loving women and children from Fallujah. It was these DOCUMENTED acts that had him thrown out of 'the CBC, CNN, and FOXNEWS TV expert scene as workable', all for fears that US humans might actually wake the fuk up on WHO is Our True Enemies here. All three, pro-private-bank zionist news stations are well aware

that the bushmob did 911, but lie to YOU as forsakenly dying
for their growing riches and world wide broadcast fame.

CBC National Newz - July 11th 'tens of thousands have died in
Iraq since the war against truth started.'

Anyway, these two Allawi incidences are fully documented, look
it up, then demand the "The US" pro-western politician person
quoted as supporting Allawi - be found guilty of CRIMES
AGAINST HUMANITY, Demand publicly, having the neocon zionists
EXECUTED by America, for America, as America. A Just America
that defends America from criminal madness. Or don't. Death
to the bushite, death to the enemies of Man I say.

ABCNEWS.com : FBI Called off Terror Investigations

A question Johnny Wizard has for America: Tell me, is
this not a treasonous act - for Bush to close criminal
investigations, immediately after the terrorist crimes
of 911? Shouldn't the demon enemy be put to arrest
for that godless act alone in this forsaken dying world?
A world left instead suffering further the tyrannies
of the war criminal ENEMY of all Human Life?

A refresher: the neocon will tell you openly, they live to
lie to the Public for cheating and stealing by murder of
US, innocent peoples purposefully enslaved by a made
ignorantly entranced TV audience that is repeated reminded,
we have no power worth respecting.

CNN, CBC, and FOXNEWS aren't taking are calls presently,
but just lie and tell US they do. Look to see, almost all
political internet traffic condemns Bush straight to hell
well he rightly belongs, but the polls still say no - WE,
seeking for Just cause, are the minority.. just roll over
and die for the neocon betrayers to god and country, life
and loving.

-

George Bush "The same folks that are bombing innocent
people in Iraq were the ones who attacked us in America
on September the 11th"

George Bush 'Iraq has nothing to do with 911, you bunch
of nazi dumfuk grunting LOSERS. Whore yeah - praise Satan
- die America die. I mean... I love Jesus'

So it was as I thought too: the direct co-operation of
the joint chiefs of staff assisting General Ahmad, in
committing the murder of thousands in America on 911
for the neocon TRAITORS, as the same 'escaping' enemies

today, responsible for 'secretly' ordering these
indiscriminate terror attack bombings against YOUR
Humanity for their continuing stolen pleasures as
Satanic.

DEMON MURDERER PETER POWER TRIES TO LIE HIS SOCKS OFF
ABOUT HOW HE MURDERS LONDONERS AS A FOR REAL TERRORIST
RECRUITER

[letter written as signed by Peter Power to MSNBC et al.]

/ /It is confirmed that a short number of 'walk through'
scenarios planed [sic] well in advance had commenced
that morning for a private company in London (as part
of a wider project that remains confidential) and that
two scenarios related directly to terrorist bombs at

Homeland Security Committee Chairman Bennie G. Thompson

NOTE: Americans are literally paying billions for Chertoff's
THREAT of "gut feeling". Billions, while the neocon walk

OBSTRUCTING JUSTICE FOR AMERICA

Tony Snow "The executive branch is under no compulsion to testify to Congress because Congress, in fact, doesn't have oversight abilities."

IT LOOKS like they are going to attempt making the move of BLATANTLY TREASONOUS war criminals acting to measurably now destroy yOur Freedoms in godless America. The Satanic neocon's 'faith', is in that YOU as an American, will watch the same corporate drivel that offers next to nothing to empower YOURSELF to speak Justly for a dying America. Instead of demanding 24 hour, wall to wall news coverage, of war criminals going down one by one by the will of Man to Justice, CNN, CBC, and FOXNEWS will broadcast your blind 'belief' that you are only a impartial viewer, who doesn't really care about dying right in front of yourself for the zionist's riches, and great worldly power of tyranny through lawless nazi bushite censorship.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

AMERICA HATES BUSHITE

Nationally broadcasted every day across America, Mr. George Norry publicly supports the murder of innocent Arab children, and I'm beginning to really hate a silent dying America for it. Speak to defend the innocent in this world American, or die yourself from self contempt.

Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man.

/ / "They can try to have their votes of no confidence," the president said, "but it's not going to determine - make the determination - who serves in my government."

MY government? Now that's entitlement. And you thought George Bush didn't have a vision for America \ \

Hitler, the mad man, wasn't as insane as our demon enemy George Bush Jr. is.

/ / The [BUSHITE ENEMY] US has said it would refuse any request by Italy to extradite the accused [satanic bushite torturers of completely INNOCENT PEOPLE]. \ \

Christ, The Son of Man, Begs the Godly Men of Earth

Christ, The Son of Man, begs the godly men of Earth, to judicially bill on sight, any neocon soldier who supports the carnage waged in Afghanistan as cop killing dope pushers. They shoot innocent women and children dead in the streets for humor, and bushite pirates at CBC and CNN, state bushite in Afghanistan are doing a good thing helping the bushmob escape the crimes of 911 by warring for Muslim fundamentalism,

persecuting INNOCENT women and Christians, while for entertainment, bomb innocent families running for their lives from a Holy Church. Soulless child killing soldiers who CBC execs would tell are our DEMONIC heroes. Lawless dope pushing cop killers have got to go down dead screaming, instead of the innocent - YOU and me they target for MURDER. Death to the dishonorable bushite THIEVES, death to the enemy neocon LIARS of GOD and man.

We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt.

Kill a bushite LIAR, why don't you my brothers and sisters of the faith in something greater than bushite godless tyranny?

Brig. General David Fraser - former nazi commander of NATO who 'okayed' the bombing of defenseless innocent Afghan women and children for the Satanic enemies of Man, stated on CBC, he liked killing police officers, along with innocent women and children, (deliberately targeted for the pleasures of the demon antichrist) because, Afghanistan's children hope to learn. See? The bushite 'will' murder all our children and teachers on hope that we will never learn the Taliban, led by "Omar the Just", were loyal to Christ as REAL American Freedom, when publicly demanding evidence to form your conclusions. Thus is why the ENEMY to LIFE neocon state on YOUR TV and radio, WE must never be allowed to speak openly with the Taliban regarding the FACTS. Because if we did, neocon pension thievers would be hunted down in the streets for public trial, and then gloriously put to death by Christian values committed to TRUE freedom from lawless godless zionist LIAR tyrannies against Mankind - YOU included.

George Norry and Art Bell are the most evil of bushite, who as betrayers of the Human race, deny soldiers to know: General Ahmad funded Atta. They will both support the murder of Your American Son or Daughter for further zionist evils, before allowing true open line communications, to defend ourselves from the lawless demon enemies of Man. Do something about it, or don't. Let TRUTH set US free.

Instead of making an easy phone call today for your dying brothers and sisters, die as Satanic bad guy enemies of Life on Earth, sacrificed in cowardice to the real demon antichrist, and see if we, the true, strong, and free, care. The Son of Man SCREAMS before coming home to GOD'S America: We are coming to destroy Satanically lawless bushite enemies, all for the love of God, we shall succeed my friends, we shall succeed. I will not willingly live in a forsaken world with LIAR zionist war criminals conning US to believe, God is not Great, True, Strong and Just.

Die bushite die!

God is Great

Again, George W. bush did 911 with General Ahmad, but CBC
zionists, actual treasonous LIARS, actually smile to dying
Canadian soldiers with only true contempt. CBC kills Canadian
kids, with their intentional demon lies, trying to subvert
Justice for God and Johnny. In fact, yesterday, they did a
special, all on how "God is NOT Great", giving that bush bitch
demon LIAR, all the space to pontificate it's hatred for
Wisdom, Science, and GOD, with only nods and smiles from the
'illiterate' hord. Remember: A zionist KNOWS it's an enemy of
Humanity when it supports dropping seven million land minds to
murder indiscriminately OUR CHILDREN for decades, or stealing
a Christians Home because they say God says Jews would do such
ungodly acts. Blame innocent Jews the holocaust denying
zionist shout, of which not one, is a Jew. Like me.

To Kill a Bushite, is to be Heroic

Pro child killer George Norry, enemy of the American soldier, still blabs about how more must die unjustly for bin Laden with LIES, knowing full well, video of steel flowing like water from the WTC exists, and that General Ahmad funded Atta. George Norry is a traitor to the FBI, who further plans more to die sacrificed under the censorship of the tyrant antichrist. Who cares I ask about America truly dying as neoCONNED, for George Norry has millions to not take your calls for protection, and honestly, 'Americans' couldn't care much less for Our Humanity's future. Love to God Gives US Strength

The Son of Man begs the Men of Earth to defend Ourselves from the unholy forces of our tyrannical enemies. Death to the ungodly bushite thieving LIARS, death to the ungodly enemies of American children everywhere. GOD praises all Men, who kill the murderous bushite enemies of Just causes. The THIEVING satanic bushite forces, speak only contempt for GOD on our demandings of the public execution of the boastful terrorists, like the bushite who video taped the murderous assault of OUR kidnapped bare footed children, or murdered Iraqis while desecrating ELVIS, done all to please the "escaping" satanic demon antichrist zionist, Our Mr. bush Jr., who with his private business partner, General Ahmad, actually committed the ungodly treasons of 911 in a land of blind men sleeping., according to the eternally Honorable FBI anyway.

Death to the ungodly bushite thieving LIARS, death to the ungodly enemies of American children everywhere. GOD praises all Men, who kill the murderous bushite enemies of America's America. "The Liar" Hannity's America, can go it alone as treasonous liars, who boastcast a con to 'neutralize' America; 'finding' that we believe their demon lies about how one dies sacrificed 'Heroic' without any IMPORTANT questions answered. do we do?

War criminals who deliberately set them up with Satanic 'black magic' to be killed in criminal actions. P2OG. But see?, the bushite fodder, can't care enough for Life to read, because it already knows like the zionist, it's an ungodly coward and a thief, as siding to lying and censorship, this will out work for evil doers in the long run without any consequences to themselves as Our sworn eternal enemy.

Bushites 'think' that being Satanic brethrens for the LIAR neoCON, they'll die sacrificed not seen by all Patriot Warriors, as a dead coward - too fearful to stand as a godly Man for true accountability to living Life honorably. Cheney, McCain, and 911's gooliannie believe, You can only TV 'see' them protected Satanically by "Molech" [THEIR DEMON COG] Immune from REAL American Justice the bushite bray, We are told they believe so anyway. Kucinich for President!
http://www.democracynow.org/index.pl?issue=20070524

Now, it's true, America's Alex Jones states Kucinich wants to take away all your guns, and is a communist, but, Alex as sometimes, is terrified of those who seek the requirements to defend freedom directly, as more specific. (Example: NWO isn't the name of the specific guy who financed 911 to murder America.) So, as a consequence, he gets near ridiculous with labels applicable to generalizations only dummies could believe blindly. With Kucinich campaigning on ACCOUNTABILITY, Alex Jones looks quite foolish. But, he's still trying. Thank god for that. Thank god for that. Talk radio in America should take open line calls on our ideas about how to actually plan to defeat these, found factually to be, traitors to God and Country.

I guess a soldier's word doesn't count for much in bushville.

The bushmob did 911 as traitors to God and Country, don't you know anything worth living for? my dying unjustly brothers and sisters? My friends, please fear not wisdom communicated by a REAL Man, for, we explain ourselves to the best of YOUR ability to listen simply. G. W. Bush used no evidence to form America's "conclusion" on who did US wrong on 911. So, Please, stop forsaking yourself, for, we're going nowhere. Support Johnny's call to demand open debate without censorship from the magic radio and TV execs, who hide in darkness, pretending to be our friends, while refusing intelligent dialog to answer any of our big troubles easily. Why? because largely, they're powerless without beating us down as giving 'Christ like' VICTIM so much - with their irrational ignorance for our survivals by the fittest. The fittest Ideas that rule this Universe, are the simplest, most easy to understand, but I digress about GOD'S greatness, for we know,. the corporate media elites as our voice, "Couldn't Care Less".

CBC just did a report about all the great heroin coming in from Afghanistan, that will still cause crime, and be illegal, (and maybe give you life in prison as an American,) but brought in with the help of the demonically evil bushite thieving murderous military, by the likely ton full to attack our direct family left un-protected, BY YOU PERSONALLY. And

guess what? THEY, our media masters, couldn't care less if they actually tried to be our good guys. Reminder: the god guys is good, the demon liar antichrist demon enemies who thieve from Life with censorship is bad. If they hide ourselves too far, they loose all around, up and down. So get to it. Or don't. Your choice. Life lived Now, or damnable death by cowardly design brought forthwith under your own power to do nothing under such terrible costs against our suffering natures.

Typical tyranny for media control over all of Life for the beginners is this treasonous betrayal against our Nature, by refusing to be honest about our potential to be far greater than first considered. Death to the zionist bushite enemy forces

/ / After it was revealed by the Plaid Cymru MP Adam Price
that British trained policemen had tortured prisoners to death
with drills, we discovered, through the New York Times (!!),
that American intelligence officers had been working alongside
them at the Jamiyat police station \ \

Death to the zionist bushite enemy forces, death to the
ungodly enemies of Man who torture innocent people to death
for fun - expecting Johnny's America will not raise a word in
defense for the Human race, or our guns to defend our loyal
brothers to the cause of Justice. Death to the bushite, death
to God's enemies who lie cheat and steal from Humanity to
assist in the escape of those responsible for 911.

BASELESS?

/ / Prime Minister Stephen Harper "We will conclude a formal
agreement so that we never again face these baseless
allegations," he said. Thirty Afghan detainees have claimed
they were beaten, whipped, given electric shocks and denied
food once they were transferred to Afghan security forces by
the Canadian military \ \

These demons who war for ZIONIST censorship are a bunch a dope
pushing cop killers, who murder innocent people they call
'Taliban' better known as in Arabic - students.

-

Proudly kill the bushite who would drop from the sky,SEVEN
MILLION landmines on our cities to kill our children for
decades indiscriminately, while offering our Humanity to God no
apologies. Proudly kill the bushite savages all to
desperately survive ourselves creating a better world through
fair, free market communications. To warring for Liberty as
true Freedom wills, is for Justice understood as measured, not
just made up out of nowhere for the pleasures of those truly
Satanic. So spoke the King of being the wisdom we here
revealed by statement of timeless fact. Good will triumph
over evil. That's that.

Tenent "Lets everybody tell the truth."

It seems Tenent wants to inform us he actually meant when

Bushite War LIFE Itself - and - They Couldn't Care Less

'Alpha company patrols the poppy fields.'
20070420_taliban28.mp3 (pbs broadcast)

"About the poppy harvest, currently gathering pace all around
them, they couldn't care less." Instead they kill unarmed
innocent people indiscriminately as enemies to ALL HUMAN LIFE.

They Couldn't Care Less

The 82 Airborne, in assisting in defending the world wide
distribution and production of heroin, tells of murdering
innocent farmers, that would never raise a gun in anger, are
those they openly confess to target for first degree murder as
labeled the, second tier Taliban. That's when not defending
American Pension thiever ENRON'S pipeline managed under their
extremist Muslim fundamentalist regime of intolerance for
public communications, as the continuing thieving of 80
percent the Humanitarian Aid given by Canada to feed the
STARVING, and school our children of the impoverished
Afghanistan, as so reported. Eighty percent. 80. 80 percent
stolen. I'm telling YOU: CBC couldn't care less about what
Canadian soldiers are actually dying as COWARDS for:
"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly
partners in crime" CBC national radio management needs to be
arrested in Canada for high TREASON. Please, be a Patriot,
and demand these zionists allow open communication with the
facts to save the lives of Canadians soldiers they hold in
contempt to die as the bad guys committed to no better good.

/ / [...] the [New York Times] piece details the torture of [Innocent People] Sunni prisoners at one of the new American-Iraqi "security stations" \ \ Kill the bushite for America, for Justice is Freedom. Lawless mercenaries are not granted by our will to survive truly. A "lawless" enemy granted "immunity" by bushite evil phonies, is that of which, holds ourselves in their confessed contempt for Justice. Receive thanks from everyone, GOD included, by rightly destroying such inexcusable treasonous ungodly enemies of all human life.

Torture is a crime against God and Humanity. So, likewise, joyously, with pride, destroy the neocon traitors of Justice - for the true Love you have as Freedom willed - is as granted. Don't buy their demon lies by blind blanket false assertions, against YOUR Humanity's Innocence in tyrannical bondage, all done in to fool you believing, we have no rights to be heard in our presence - here existing freely. Therefore, to survive US all for something better, halt the 'escaping' murderous bushite thieves for God and America. SOLDIERS: Instead of dying for nothing, my wannabe Patriot Brothers, try joining Liberty's cause, which is our cause truly. Is it because corporate TV zionist money whores, are cowardly and ignorant, as evil hypno muggers, in MY dying for real America, that YOU refuse to speak Now in your Humanity's begging further defense?, on evidence being the only requirement to establish a person's guilt or innocence? for ungodly terrorist activities committed in our name by bushite bombers from the neo-conned AIR FORCE, who, as rotted juveniles, cheeringly bomb us People indiscriminately leaving a Church as something TRULY SATANIC? To dare, in our presence, continue threatening harm against an innocent child of wonder, not yet even born to God's suffering world? Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

-

Look, these neocon zionists KNOW they are OUR enemies

Israel Knesset member Talab al-Sanai "It took Israel 37 years to develop and perfect these barbaric methods of repression and humiliation," al-Sanai observed. "Surprisingly, the Americans surpassed and outmatched the Israelis in their

[Zionist] savagery in less than two years."

-

Look: innocent people are being tortured to death by those
who hide OPENLY in America's uniform. [let US hunt them down
for GOD, despite what demon lies they argue give them as
Satanic to avoid "The Law".]

SATANIC AMERICA

/ / After playing a tape of Cheney's statement, Russert asked
Daschle, "Did the vice president call you and urge you not to
investigate the events of Sept. 11?" \ \

911 "truthers" don't want to address the hard evidence like
the clear as day video of steel running like water from the
WTC towers, for, as Humanity witnesses, they'd rather watch
silently, children murdered indiscriminately, before,
acknowledging wise godly men from our communities who speak
ONLY facts on America's derision for real, open market Free
communications - freedom fighters who ACTUALLY defend the
innocent from the neocon bushmob traitors. Each day we hear
of near hundreds of US murdered by the godless Satanic
THEIVING "American" forces in Iraq. without near a peep of
concern by "America". Lawless bushite mercenaries torture
rape and murder, paid to do so by the WILLING American tax
payer, and near 300 million "People" (the NAZIS) can't find
the effort to pick up a princely phone and call the ENEMY pro
child killer George Norry, (who broadcasts every day across
America nationally for the IRRATIONAL neocons,) to air any
real concern for our Lives. True, the demon enemy censors OUR
calls, and contrives WE a buyer without questions, but he
doesn't censor You always forever. So, get to it fukhead,

JOHN is growing angry with americans of EVIL ignoramuses escaping the bushmob for crimes against MY HUMANITY. The Son of Man States: Death to the bushite, death to our MURDEROUS enemies, who lie cheat and steal to assist in the further criminal escape of the ungodly bushmob for 911 as TRAITORS.

Loyal bushie McCain as bona-fide nazi savage "Bomb bomb bomb Iran.."

Reporter 'Mr. McCain, you demon liar nazi fu-ker, don't you think your being insensitive to innocent god loving Iranians?'

Pro-Torture of INNOCENT PEOPLE McCain "Insensitive to what? The Iranians? My response is lighten up and get a life."

PRO-TORTURE Gonzales "I quite frankly don't like the idea of the Judiciary deciding who is on my staff." [at Justice]

PRO-TORTURE Gonzales "I did not make decisions about who should or should not be asked to resign." [in mid-term]

As US State Attorneys?, whom have the most serious of American Justice Department Motions of Defense for REAL Freedom?, he's not concerned directly with?, nor would "like" democratic Peoples to be allowed to care either?. IF he gets HIS way he says - as minding for the criminal master. True, Americans are generally, extremely cowardly as Bush's freely giving PAYERS, led for more ungodly sacrifices in fascistic silence, but this continuing charade of incompetence gathering against our entire Humanity, is going way beyond acceptable to everyone concerning. Johnny Wizard conceivers and otherwise non-believers state together:

The Iraq war against Christ has no true justifiable cause.
Torture is against the law warranting immediate death sentences
The Zionist AIR FORCE bomb people indiscriminately as Satanic
The bushmob stole all the Development Funds for Iraq
The bushmob are stealing ALL of Iraq's oil
The bushmob stole 100s of billions from censored AMERICANS, while George W. Bush personally stole 50 billion from America in the first four months of stealing the initial election.

/ / A BUSHITE GRUNT PRISSING PROUD AS OUR ENEMY "I grabbed her little sister and put her in front of me . . as the bullets

began to fly, the blood sprayed from between her eyes, and
then I laughed maniacally." [, then were heard the cheers of
godless bushite dumfuk traitors obscening to God and Man as
the unholy enemy.]

What ever happened to butterfly kisses after evening prayers?

Are you telling me, an American Father, wouldn't gloriously
kill this lawless bushite enemy and his demonic ilk, for our
love of girls everywhere? Or, how about the UNARRESTED
soldiers we witnessed on video beat shoeless children
pratically to death while laughing and cheering? Or like
those that speak zero defenses for Haditha's confessed MASS
MURDERING irrational women and child killers? The REAL demons
CONFESS to going into a house, WITHOUT reasoned approach, and
slaughtering an entire INNOCENT family.. for nothing but
their lifeless SATANIC pleasures. The 'cause'? "The [mass
murdered unarmed innocent neighbor's] back door was open.."
To, for God, gloriously, with love, kill these unarrested
murderous continuing ungodly bushite nazis, is to war the TRUE
enemies of Humanity to save the lives of our precious loved
ones.

The Pentagon's Power to Jail Americans Indefinitely
http://www.jonesreport.com/articles/270307_pentagon_power_jail.html

Look, demon enemies of Christ torture innocent people for fun,
paid for by the silent American tax payer. Americans refuses
to bother making a simple phone call to Coast to Coast to

down in their streets for death to defend the innocent held
indefinitely against GOD'S will. Death to the bushite, death
to Johnny's godless, lawless, fascist enemies of FREEDOM.

US Attorneys don't serve "the pleasure of the president", they
serve freedom lovers dedicated to defending America from
willful criminality. But, americans are too stupidly weak to
demand Coast to Coast hosts allow open communications on
America's highest of concerns. Bushite america would rather,

Mujahideen don't compete for the positions in the leadership. \ \

"Those who negotiate in the name of the Taliban will be
killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command]
said. He did not elaborate.

Hmmm. Allah is all, and negotiating for freedom from naked
bushite tyranny is won EASILY through communicating
understanding. The tribal strategy of Afghan fighters, where
Allah is Oonerroh, seems to be not the only thing missing from
the statements of this "Taliban" RELIGIOUS FUNDEMENTALIST top
top top leader. Only "second" to Omar the Just. (Apparently
an individual this current bushite incantation of "Dadullah"
is totally un-familiar of.) Omar, the Just, whom Dadullah
claims he receives his Top Secret nobody can see'im orders.
In other winds: Bill a bushite for God and America, an all

day long you'll have good faith in a world freeing ourselves of godless dumfuk tyranny implemented by the horribly foolish, as deeply ignorant of Allah, bushite demon liars for the traitor neocon. TRAITORS!

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. Omar the Just knew this to say so, as do I. And this is why corporate news professionals forbid me to speak openly without nazi censorship, ON OUR AIR-WAVES, because I am honorable, right, and true as believable. While America's fun guy, zionist George Norry, states to support PUBLICLY, the ungodly murder of innocent Arabic children for nothing but his personal contempt of YOUR DYING LIFE, while further wanting to invite thoughtlessly nuking places on Earth all for his secret hatred of US freely commutating. Typical bushite. Ending with to tell US again 'convincingly', that bin Laden did do 911 as a terror-ist bad guy in G's World!!?! How so? EH? How so? he don't care man, he don't care. He and his family have millions of dollars to sell you out, so why care for your struggle to survive in bushville soldiering? Frankly, George Norry is a total dickhead. True, he has lots of money in America, but he's still a dickhead nevertheless.

Alex Jones and me aren't on the best of speaking terms, but I will state, a desire to address every same challenge he has adroitly addressed as publicly lacking. And when I am addressed 'officially', I will campaign to put US in the space to realize, we are the government, we are the people. We don't need to run to the hills and encamp ourselves away to defend ourselves to the max from the man, we are the man. I'm telling yeh, I know this to be so as the sea is we magically. Equal rights for all in God's name is self evident. Self evident to ME anyway... but well.. who am i?, right - I'll tell you as I have for more than a decade as a living fiction forsaken for lack of anybody anywhere understanding in totality what I am here on Earth as true Son to Man - a 'understandable' timeless stand in for G to gain recognition through as honest broker. [I've been everywhere around forever, and.. blahblah.. I know people really don't care to know of ancient wisdoms, truths that guide the order to the Universe, cause often they think I'm beyond their comprehension as a 'better than', when all power is in equal respect for others as our hurting brothers and sisters suffering with tyranny by our collective willful ignorance on Justice.[God's bestest is Just for every reason being thus]] I am one serious genius by no accident in words you have as much

right to contend for yourself being, if you'd only believe we have some good ideas here to really defend ourselves with.

Please my American friend, help US speak out freely Coast to Coast. So we together can start, on demanding Justice for all, as innocence in serious jeopardy. Dadullah is most likely an individual who holds at least some control over official military functions of NATO in the region. So, we're going to seed loyalties of the rare Patriots in the force to recognize our need to isolate who supports, not talking FREELY for peace easily in Afghanistan without question. No evidence was brought against Laden, therefore, the Taliban were True Patriots, and bushite traitors are pure racist nazi filth ridden, toxic, as being cowardly dishonorable as despicably evil, enemies to us all. Put US in Command.

Question the bushite, question to anyone who mumbles disagreement in the godly fact, that WE, as Humanity, will spend the better part of this next generation, hunting every last war profiteering nazi war criminal down for our real Freedom from their, so errorred "endless" tyranny of big money terror. Lawlessness with be outlawed, and ANY corporate american who mumbles otherwise, as an enemy totalitarianist, the clear ungodly, (as should be criminal,) will be put to challenge by their very own children, or parents, or bleeding dead brothers. Hannity must be tried for death as lying that the holocaust never happened from Iran. DEATH to the demon liar nazi fu-ker I say, DEATH to the demon liar nazi fu-ker.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

/ / "Those who negotiate in the name of the Taliban will be killed," he said. He did not elaborate. \ \ He's either with the proven cowards of JTF2, or the two or three "CIA" guys secretly hunting bin Laden in caves out there with tens of billions of dollars. SPENT EACH YEAR 'unknowingly'. (No reason why, but, they just can't tell You, as the paying for it really while DYING) Put US in Command.

Every bushite soldier in Iraq for the liar neocon is minimum, a purposeless dumfuked cowardly thief. See? if you offer a reward, and they don't take it, their 'fellow' bushite, kill'em for it, right? why take the risk it'll cash in over your worthless life? For, who can trust a lying bushite nazi savage? certainly not a lying bushite nazi savage. In other words: speak against committing war criminal acts of lawless aggression in Iraq for Bush, as CLEARLY un-American, and I'll try to forgive you as human. Or, I guess you'll kill yourselves in mutually muted total contempt for this universal life as actually worth something.

When you see and hear on video, sexually dysfunctional, as sadistically satanic grunt puke pro-bush soldiers moaning, while deliberately killing innocent defenseless Family People running for our dying lives from a holy church, or as just simply anyone standing near the side of the road, then, my friend, you'll begin to understand what evil actually is. And, what needs to be done to seriously save ourselves. Seriously. Justice must be won sooner than later.

Five Star American General Johnny Wizard will train American Soldiers to recognize such demonic behaviors in combat as worthy of immediate frag to defend the lives of truly fellow honorable soldiers. Soldiers ACTually, committed to freedom from godless satanic dumfuk tyranny of the antichrist demon, Mr. evil personified, the UN-ELECTED 911 TERRORIST, George Walker Bush and CO..

/ / "He realized that they had killed these three [innocent] detainees, and in that moment, yes, he decided to help his [ungodly murderously nazi fascist] squad members, [escape Freedom through Law wisely practiced]" Gorecki said. \ \

There is much self evident truth hovering above the realities of such statements. For the exampled fact, that he did actually use a weapon against 'his' troops, 'to save them punishment', says a great deal more than they contend we hear. Now really, how ''we be dying as godless war criminals for demon LIAR Bush'' dumb is that? (and how does such an evil thing steal our military command in an un-defended Johnny's America? as a dying for bushite tyranny, irrational neocon war wanker? like holy fu-k..) Remember: evil is real.

The time is now.

Let Johnny Wizard on Coast to Coast everywhere god damn them man, get US on the PUBLIC radio to make something better of ourselves by communicating freely. Do it!

Praise Jesus, and pass the ammo forthrightly. I'm a hungry man.

US officer "upset" Iraqi suspects taken alive, court hears
http://www.telegraph.co.uk/news/main.jhtml?xml=/news/2007/03/14/wsoldier114.xml

/ / A US military officer sounded "pretty mad and upset" that a group of soldiers had taken suspected Iraqi insurgents alive during a raid in which they had been told to kill all military-aged males, a court was told Tuesday. \ \

Come on now, who wouldn't take great joy in destroying any and all such ungodly bushite hatred for Humanity in this light of day, eh? In fact,why don't American Congessmen, who believe in defending Liberty, campaign JUST that? Why not??? Is it because they're LIARS?

Like Coast to Coast's fun guy, he ain't taking our screams, George "pro Arab child Killer" Norry??

Rapists and torturers must not be allowed to rule our pirated authority through defending the further 'escape' of the bushmob for 911.

/ / As a result, the Defense Department put up a Web site in 2005 designed to clarify [to the dumfuk bushite demon liars] that sexual assault is illegal [...] \ \

Rumsfeld, as it was told on Oprah, doesn't want any arrests of bushite rapists though, so has worked to deny Justice for female grunts by denying all requests to the 'Pentagon' from American Police Departments. [and you thought he was fired!] Why? because, they, the very weakest intellectually of America's - do what they're told teen kids, ALL don't have rights anyone in bushite corporate america is willingly strong enough as a dedicated Leader to speak in demanding defense of, for innocence.. Why? because they soullessly advocate continuing bushite war crimes for a stolen dollar. Stuck that

way apparently. Support my rise to speaking publicly for open challenge on the rights and privileges of all concerned parties. Rapists and torturers must not be allowed to rule our pirated authority through defending the further 'escape' of the bushmob for 911. I would like to form a global posse of sleuthers to identify on international open line radio, all guilty INDIVIDUAL parties by evidenced conclusion on our highest of priority issues, and get started with the nothing to hide from anyone global arrests, with PUBLIC court proceedings, done all for our public interest as the refusing to further fall as innocent murder victims.

Let's save some lives, what do you say guys?

Or, are we going to go further with this: George W. Bush:
"If the absence of violence is victory, no one will ever win."

YOU

"If the absence of violence is victory, no one will ever win."
http://cleveland.indymedia.org/news/2007/03/24652.php

I know, it's seems odd that I am, at the same time, offering answers to any question on the science of God as is pertains to Justice measured, but this is just who I am to be conscious man. So, if we can get over the shock of me being so especially normal, maybe we can then realize, I have some simple good old ideas that transcend through time by rational understanding communicable between any two people. I am not a "miracle worker" to all those I advise to not eat Aspartame because it's a poison that also makes your body crave un-needed carbs, that will likely convert to more unless fat. So, it slowly kills you, while making you fatter than you need be along the dead end journey faithing in "the system". So, why do some do it religiously? Who cares (for now) but to say, our governments are failing US miserably. I spoke personally with one of the head scientists in Canada at "Health Food and Safety", and he told me the scientific analysis done by reputable scientists I found freely available repeatedly on the internet years ago, was completely true. (It breaks down to formaldehyde, and methanol (a slow lethal poison), among other shockers. Poison. P-o-i-s-o-n-s in our food stuffs. Poisons.) However, he could take no action to defend Canadians "officially" because we, Canadians, have our corporate interest news departments completely refusing to defend ourselves from corporate exploitation anywhere, and as natural consequence, we, as the dying world, would together unrepresented, probably lose a law suit from mutant Monsanto through the self inflicted bounds of OUR censored WTO program. - instituted through the top secretly mastered puppet people persons of the 'unseen' NWO I guess.

I'm telling you, we need me as King.

Look: Aegis's workforce, for American PAYING profit, has been publicly disclosed through CNN to be shooting people in Iraq indiscriminately for your money, and when the Pentagon was contacted by Nick Roberts about what would be done, they responded, nothing would be done by Johnny's America but to increase the multi-hundred-million dollar contract with demon enemy Tim Spicer to continue. Now... why you ask? Because the neocon liars, steal money by lying to cowardly American kids about what they mindlessly, without thought, give their souls for. Tim Spicer openly hires South African goons to commit hardships for American GIs to die without end for, in lawless tyranny. Peace sells less money for the neocon war profiteers to murder the innocent American as. (Iraqis, along with the rest of Humanity's Men, WILL eventually learn this truth, or life for you will end.) As an Arab hating bushite, (like what you'd find as a publicly proud practiced hatred for all Humanity, by an Amerkan dumfuk soldier in Google's alt.religion.islam), they say nothing for Freedom by Justice, but root themselves to Spicer's monsters who like killing black guys, as world renown mass murdering racist nazi filth. That's why zionist Israel loves them so much.

Look: Somebody stole four trillion dollars out of the Pentagon.

Look: Greenspan STOLE four trillion American dollars for his international billionaire banker friends before 'leaving'. [Asian market chaos SCAM]

Look: Lotteries everywhere in North America are running the same PROVEN criminal scams that cost US ALL billions and billions of public dollars that, without question, (as MATHEMATICAL FACT), regressively destroy our dying communities. CRIMINAL. [Solution: 100 percent cash payouts.]

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played no part in 911. And video of iron running like water moments before the first tower fell is freely available for download all over the place. CBC, CNN, FOXnews et al. know the Bushmob did 911 in other words. I've spoken to most of those 'in control', and I'm telling you, they're losers, and they know it. Remember: they'll censor my voice to send YOUR child to die for no better good, or reason understood, while entertaining. Weekend TV in North America totally sucks. Now, why do YOU think that is brother? The more powerless they make US, the more money the neocon zionists can murder Humanity for, thinking they might just get away from this if we continue to take no action in defense of anyone as God would will. Let me be Your servant King, by backing me up some here. We need some dollars to eat, and I need it now before we starve to deaths.

Look: Barbra Bodine did the Cole bombing. [the Cole whose crew has been completely overhauled. Where are the many who served there NOW eh?]

Look: America has kidnapped countless thousands without evidence to be held against OUR will indefinitely. [Like the NOT Jewish Israel]

Look: innocent people are being tortured to death by those who hide OPENLY in America's uniform. [let US hunt them down for GOD, despite what demon lies they argue give them as Satanic to avoid "The Law".]

Look: the bushmob war profiteers STOLE the Iraqi Development fund

Look: the more than 100,000 security contractors for Bush are officially deemed lawlessly unaccountable to anyone - THINK ABOUT IT

Look: Negroponte PERSONALLY stole the Iraqi emergency water provision money

Look: Sattler OPENLY committed the worst war crimes of all Humanity's history

Look: I am a guy that is regularly denied public access to our national radio programs because I speak documented truths consistently on behalf of real honorable soldiers and police officers. I agree with most, if not all facts Alex Jones importantly brings to our attention, however, I almost as often, disagree with his conclusions.

Support my cause, which is your cause.

King Johnny Wizard
President and CEO

-

Senior Military analyst, Rob Riggle "In the field John, the soldiers are out there, every day, risking their lives, for a common Ideal: that none of the President's decisions be questioned."

This is more true than a bushite would admit before murdering a honorable father to rape his young child, like Lcpl Boudreaux freely confesses. Boudreaux will tell you, openly, you have to murder the Arab father of the Arab child your planning to rape, because if you don't, that Father will spend the rest of this life, hunting you down in the streets to rip you limb from limb for it.

Let US, me and the few, proud, and the brave, bring that Father's intent to bare on lancing Boudreaux, and any other who would sing in it's ungodly defense.

Zionist american media celebs do tell, everyday, soldiers for the neocon are all Heroes. (True Hero worship has long gone

dead, and simple common respect for the starving man of Johnny Wizard is almost entirely illusionary, but for the love of God has for me, the Son, to never stop caring religiously.) While McCainites advocate imprisoning any (chosen) man in America (with our familiar "Exploitation Units"), who has a picture anywhere on their computer of a fully clothed teen, while denying this following censored video of children being beat to death for fun and profit is real. When I watch only thirty seconds, my rage as a god increases beyond anything anyone of Humanity can even contemplate, and i start crushing bricks in my hands with fury, twist iron bars into pretzels, all as a foolishly feeble attempt to personally have killed those present in this video. Then I cry. I cried for these children present in this video the first time I watched it, and I cried last night briefly, before stopping it.

Please, my brothers, join me in hunting each and every bushite present in this video down for death. For a Love of God that will never end, until we have seen each and every responsible child killing bushite present brought to true Justice extreme.

ARE YOU TALKING TO ME?

George W. Bush:

"If the absence of violence is victory, no one will ever win."

But for those of us who would believe protection to be a heavenly good thing actually he means? What the. does he mean?? Find out!, in the new candid, let's talk politics interview, with no other than, PRESIDENT GEORGE W. BUSH. (talk about having connections!) ARE YOU TALKING TO ME? - A Johnny America Exclusive! - a candid interview on Bush's deeper than ever political thoughts about the war, up front, and personal. Surely, an historical event such as this, with the revelations contained in his own shockingly powerful words, while granting a stage in Johnny Wizard's World, is frankly, beyond the pale, quite shocking in perspective I'm sure I would state again. I feel confident Bush's surprising candor on life's humbling higher meaning wont make the crazies 'out there' any more less right per say. As for the barely living of you passing travelers to our dying Realm.... be ready to be taken on a journey of such profound discovery, with a wit never before witnessed from President Bush!, all about the cruel hardships Americans continue to endure without guidance through effective leadership. Without evidence to form his guilty verdicts. That orders the murder of the innocent with. I kid you NOT. Hey? maybe the Son of Man doesn't have to wipe out the entire human race after all.. With Bush co-operating now, I personally believe, no, I know, we're going to make a go of this after all.

Let US speak in challenge to any or all bushite enemies

NATO war plane bombers must be hunted down by the will of Humanity to be gloriously publicly executed to defend the innocent lives, they once again, have indiscriminately murdered in Afghanistan without a sliver of evidence, but for to say, some dumfuk had a 'rumor' that a single individual SUSPECTED to be an anti-heroin pro-child defending Taliban supporter, granted the bombers of NATO to wipe out an entire village MURDERED indiscriminately by the TRUE demonic enemies of LIFE. Please, if you must forsake me in your personal cowardice and self loathing, don't forsake GOD and America by not killing with PRIDE, these bushite dumfuks of NATO the first chances you get. Love liberty as if it were your own, and kill a lawlessly murderous bushite nazi savage for your

love of anyone included. (You can quote me forever on that.)

Giuliani told ABC's Peter Jennings on September 11, 2001

'..and I was operating in there [75 Barkley St.], when I was
told that the World Trade Center Towers were going to collapse.'

WTC TOWERS? "WERE"?

Did you know that the international Johnny Wizard comic book
is out there? Don't miss out on picking up a copy for
yourself, or your loved ones. And did you know, I'm trying to
get on international radio without a censor to thunder my
audience back into submission. I HATE HANNITY. All I want is
free open debate to resolve this crisis, that doesn't have to
be so ruining our dying worlds without questions forwarded by
the dumfuks. Justice is Paramount through reason to be so.
The Bush Administration have been up to no good, escaping for
911, that New York City should sue for. Hire me on as legal
consultant buddies, cause I'm like near starving broke here,
with supreme court challenges failing my cost factor, and
hunger pangs slowing our progress on fighting unjust
incarceration. I desperately need money, like now, as a gift,
or an advance on a industry paid private consultant gig. Or,
instead, maybe you'll idly watch some innocent person
willfully be sent to prison by liars in your demonized name,
to defend the ungodly evils of war criminal traitor, our Mr.
Bush Jr. in foolish disguises. Your call Bud.

be Wiser,

Johnny Wizard - Patriot Liberator of Eternal Destiny
(i.e. REAL sustainability as self sufficiency)

(i.e. nothing is separate from existence ourselves, not even
time, and Justice is binding to defend our lives if practiced
fairly with it's elemental divisions through reason. Example:
a person accused of a criminal offence, without any evidence,
is INNOCENT. Those who say otherwise, are the actual
terror-ists. Civilization's ancient Founder Hammurabi,
suggested just to openly publicly have executed those who lay
capital allegations without any evidence, while working to
close outstanding criminal investigations. A made CRIME
within ourselves Hammurabi claimed, and by thinking such ways,
brought birth of 'Civilized' to an untamed till then, chaotic
confusion. Old becomes again anew, because Americans are weak
as polluted, and too cowardly to defend the rights of US
innocent. Let's change that. Support my climb to
international controversy, with my unchallenged claims of
direct accountability being sought, for the 911's neocon war
terror plot.

'A military judge ruled last week that Watada cannot base his defense on the war's legality.'

Telling US what?, that it is a crime to not commit a crime? It isn't only high treason against America the ungodly bushite are guilty of, but of a madness held by those truly Satanic..

/ / 'Why are you taking pictures? You don't have permission."' [...] the [bush whore] American, speaking through a translator, warned him that he did not want to see any AP photos published anywhere.\ \

No bushite was found gloriously killed for country, yet, they, the godless bushite enemy, continued to shoot innocent People indiscriminately for a distance of six miles, while likely, secretly masturbating each other as bushite liars do always.

The pro-bush irrational military said only eight innocent un-armed Afghans were counted as murdered deliberately, by those who believe our Mankind, can not ever find themselves accountable, without zionist controlled, corporate news permission. See? The military counts mankind as zionist, but I am a man of real men, committed to defend our world from all enemies, foreign, or domestic. Unlike a bushite traitor to God and America, who's word, as Oath, means as much to them, as we do. Ungodly as they are loveless, the bushite, is Life's enemy.

See my friends, this is why I, as the Son of Man beg and plead for all able bodied men, to kill treasonous bushite on sight, for every time you love God by defending the innocent from murder, (the innocent whom any pro-bush corporate professional hold in total self contempt,) you save REAL peoples lives, and you defend God's good name to love God as ourselves committed to true Liberty. Bushites are enemies of freedom, enemies of God, and worthy of death, before allowed to further bomb people indiscriminately like the commanders of NATO order day after day without risking instant frag because, bushites are blind cowardly thieving nazi fascist savages, brain damaged, who believe as satanic demon whores of Molech, they can con all of US including me forever, just like dare dubya. Dumfuks.

WHERE IS YOUR NATIONAL NEWS TO DEFEND OUR PRIVATE INTERESTS?

Former FBI Director Calls For New OKC Bombing Investigation

/ / The FBI man in charge of collecting evidence from the government building destroyed by the Oklahoma bomb has called for the case to be reopened. \ \

WHERE IS YOUR NATIONAL NEWS TO DEFEND OUR PRIVATE INTERESTS?

First things first: America must demand the immediate arrest of those who told America the victim committed suicide, when clearly, due to autopsy photos, the individual was tortured to death as the innocent. So, the 'officers' responsible for the fraudulent claims, need to be arrested for accessories to MURDER. The torture will earn them both the death sentence, if found guilty under STANDING AMERICAN LAW. And any bushite like a, it's always a great day George Norry, who purposefully with criminal intent stands in life's continuing way for Justice's demand, American Patriots will phone to Bill with every once of pinky power we have at our disposal.

Support Johnny Wizard's personal challenge against thieving LIAR traitor Hannity, and his corporate nazi bush whores who lore our stolen values by how much they can deny US privilege. Coast to Coast radio hosts need to be publicly challenged for debate they deny US knowing of together naturally speaking. Great example of our Problem: CBC National Radio, in Canada. When a caller phones during the very rare moments we're taking public words, have a pre-broadcast rig-a-ma-role question session, you'll have with not only the OFF-AIR screener, where he'll probe you for controversy, but after the first process of noting in book form your disclosed intel, will notify you that; IF your independent thought is granted by the "Producer" (- who reviews everyone - rules are rules -) Our national station will phone you back this afternoon, so stay tooned, to line you up with your baking gingerbread creds. They never ever dido! The more Brilliant you are, (like the highly charged as extremely charismatically charming, wild man ruler, Johnny America - the media phenomenoner) the higher probability they'll find POSSIBLE concern, on their do nothing for your taxed attitudes..!. Why take chances someone might show a greater living responsibility to a real suffering God as our left corporately forsaken Country?.?.?. A dying Humanity.

Look, seriously, my friends, we have all the answers to our problems.

Support Johnny Wizard's personal challenge against thieving LIAR traitor Hannity, and his corporate nazi bush whores who lore our stolen values by how much they can deny US privilege of equal standing.

promoted through the tyranny of censorship

Corporate News America's Terror Expert, Gaffney, who publicly advocates the rape and murder of the innocent in Iraq to thieve from for the 'escaping' neocons, (as the truly UNGODLY,) stated these words about why American Soldiers continue to lawlessly DIE sacrificed for no better good or reason understood, as total willing dumfuks under deep hypnosis:

What the peenackers publicly stressed they would crave to fool US into Iraq and beyond as glorified war criminals. 911, New York City, where thousands of Americans were murdered, and millions polluted. killed like now American teen soldiers with the Iraqis. So, join US in demanding the quick trials, and public executions of known bushite enemies who murdered Americans on 911 with general Ahmad, and who with Peter Powers, murdered the innocent in Britain for more stolen goods against God. And anyone in the air force as bushite bombers should be a great joy for US all to hunt for prosecuting too. The bushite dumfuk is an enemy to our lives, with it's blatant naked contempt for the innocent, who like the demon liar THEIVES at CJOB, George Norry, or Hannity, will forbid ANY human defenses of the lawless dictate of the IRRATIONAL tyrannical demon antichrist, all so to victimize more of You as the censored forsaken.

REPENT. [from the Greek, meaning to think.]

The TRUE Son of Man Johnny Wizard Exists Born to this Eternal World to end permanently demonic bushite enemies of Creation. Help Life out by destroying cowardly America's greatest threat to the Species, the greatest threat against Humanity's Freedom to be Loved by God. Corporate nazi zionist bushlores at CBC, CNN, and criminal thieving from the desperately poor in Winnipeg CJOBers forbid open communications, and I can't 'take over', because then I'd be defeating my own, power to the Peoples argument. So, it really is up to YOU, yes you there... reader. Who.. really..? YOU, here, now. Life begs, takes a stand for your fellow man, and demand our voices heard for the defense of the entire human race. And be quick about it. Repuglicons don't want freedom from endless war where they kill your forsaken kids, for we all know, bushites would be publicly tried, then spend the rest of their treasonous lives behind bars broke, or dead from lethal injections made popular in America. Again, officer Bowman is responsible for letting 'escape' those from Fort Detrick, who attempted to murder the American Congressmen who thought going into lawless tyranny, !makes no sense! Where is corporate America on our issues when OUR free speech is ruled by the irrational evil minds of Limbaugh, Bell, and Norry?!?!! Back to Bowman: Bowman, also is responsible for sabotaging the Moussaoui warrant. And, how much you wanna bet, he's probably the same bushite who found Atta's passport, and likely had all 19 names of the high-jackers to give CNN, CBC, and FoxNews just like the neocon's "bin Laden" would have too. Take the publicly prancing bushite enemy out for questions by yourself, if he doesn't plead his defense publicly on Coast to Coast by tomorrow. Remember, there ain't an "Intelligence" group worth their salt on the face of our Earth, that doesn't know exactly what I'm doing here honorably for a real Justice made through careful thought. So, support Johnny Wizard speaking for public challenges internationally, and with the 23 plus co-operating for life 'Intel' agencies, along with, anyone else who can join in on the call. as a growing number of Patriot Soldiers, who trust yourself to see, this wanting of

Justice isn't complicated. A person accused of a terrorist event without any evidence, has our accuser a bushite, who should be watched carefully until verifiable conclusions are done by the understanding of fact. Not faith. With George W. Bush making real decisions in faith, expecting us to believe as corporately broadcasted unabashedly unbiased, that he is not a deliberate incompetent monster war criminal of unfathomable evil?, who is just too 'stupid' to understand why we are innocent until proven otherwise?, is really something we all need to scream about to save our dying lives.

"[..] just like the neocon's "bin Laden" would have too."

However, the real Laden, on video taped confession, claimed he played no part whatsoever in 911, then later, offered himself for arrest, confident he would be acquitted. Not corporately newsworthy though, so, few even know why their American child was later died in the terrorists act of corporate contempt for US living Freedom with something greater as real Justice wills

Yours again,

King Johnny Wizard

CONTACT

/ / IDEA: Let's get our show up and running, by allowing open public investigations To be conducted internationally, with open line challenges, so we can publicly isolate each and every bushmobster personally responsible for 911, and then, all of everything else still left outstanding murdering ourselves. Whatdoyahsay?? \ \

Art Bell, the zionist enemy of Life, wont allow free communications with the established facts though,

What do you think? Are you truly all alone on this?

Again, more than half of the money being spent on demon Bush's wars against life's reason for being, is completely left un-accounted for thieving. Not spent to offer dumfuk cowardly soldiers help hunt to kill bushite rapists and torturers. Stolen American values Just like the bushite soldier on the ground, who after gunning down innocent people in the street, go through our pockets to steal the spared change. Kill a bushite for the love of God why don't you my American Patriot brother and sisters?, today!

Again, my friends, Art Bell and George Norry have thousands of bushite dumfuk in America that will phone them to tell US how greatly they are to have no care for dying freedoms in America. While when the humans call, Art Bell for example,

between breaks, when privately screening his calls, just hangs up on anyone he fears might articulate things like Ahmad funded 911's Atta, according to the FBI, in defense of America. I say, we at LEAST, talk about putting them both to death for treasons against Your Life dying teen soldier, wannabe Patriot. Make sense?

Again, corporate nazi america states 30 percent of America supports the ungodly George W. Bush's demon antichrist action, when in truth, it's less than one in a thousand. it's just CBC, CNN, CJOB, and Art Bell the liars ain't taking our calls for enlightenment. just like they treat the innocent in Palestine for zionism's encouraged racist in-action. For what does a fan of 'we're the best' Coast to Coast radio network family know about nothing after we witness them froth at the thoughts of nuking countries, or calling for enemies, none of us here in North America have any real problems with?

People of Earth, know, these bushite soldiers war Creation proudly with repeatedly committing aggravated felons, and South African death squad goons, all to war Love for the neocon god haters. Who, as peenacking atheists, as their very own documents stress, would murder anyone of US for a stolen nickel.

irrationally like meaning really stupidly on Bush's behalf,
for they claim, we don't want to be 'embarrassing ourselves',

911 was an inside job, and CBC with CNN don't want to tell us
about it, but will watch our LOVED children lied to, to go out

unparalleled in it's wickedness.

Do you expect yourself to fail trying?

destroy such deserving commanders, Like Blount, Sattler,
Russell, Wuterich, Pantano or even Kimmitt, and instead, as in
Fallujah, murder every woman and child present, while stealing
all our given monies for desperate life saving help. Anyone
in the Air Force deserves to be justly put down, for, I've
NEVER seen any legitimate bombing campaign, but for to kill
People indiscriminately like NATO regularly does with
radio-active toxic waste, while then sending in the dumfuk
Marines, or the 'from the coast' Canadians, who of course,
rightly get killed on the ground in retaliation for such blind

evil stupidity. Please, I beg, help Iraqis, and kill the bushite thieves to defend our forsaken God. American children, help me my loves. Please don't allow the bushmob to escape for the treasons against America on 911, for, bushites are OPENLY traitors, as the TRUE enemies of evidenced Justice, as the Freedom to do our own things loving God on our own. Besides, most bushites aren't even registered American citizens. Bushites need to be hunted down for destruction - by the Loyal Christian American Patriot Soldier, the ones who war to win against those who torture US innocent to death as the ungodly Satanic LIAR enemies. Save the Humans, kill a bushite false accusing traitor of American Freedom To-day, and become a real Man in the presence of Johnny America, an actual Man of Men, Lord of Lords, and King of Kings.

Please help God.

We have to overhaul how all our national news Podcasts are assimilated through corporate nazi zionist censorship. Art Bell and George Norry are enemies to ALL american teen troops put in harms way to die as bad guy irrationally for the neocon God betrayers. Why? because they purposefully lie to have YOU die as innocent murder victim. Death to the bushite, death to God's enemies.

A Public Letter to the "American" Coast to Coast Radio Network:

1. We, as the People, demand you allow US, the human species to openly discuss the public evidence on who funded the terrorist acts of 911 according to the FBI. And full disclosure on the science of building Seven.

2. That the Iraq war never had, nor ever will have a justification, concluding Naturally, that all stolen Iraqi

money must be returned by the will of GOD to the victims; with those responsible for stealing it, made to pay US back, with the true American Patriots to be found, backing US up 100 percent. The bush administration has teamed our kids to mercenary forces who have no loyalty to freedom but to freely die another Marine for more dying stolen values. While successful at it corporate America, just lies and lies and lies without shame, nor apology for the death of your poor cowardly kin.

3. Also, that mercury tainted vaccines are deadly stupid. Mercury is scientifically understood, without question, (no doubt) to be a neural-toxin, and, Influenza is a constantly mutating virus. So, pre-determining which 'deadly' strain is going next, is only because the WHO wants to continue killing US for huge cash profit. With cult slaves, like those who forced Jones Towners to drink at gun point, are the same as those who now demand we give our girls of America from Texas such. It seems the magic TV news people don't want to trouble us on this matter of our actual survival.

You must wake up to life's demand for you to defend our dying lives my friend. Please? Make the call, be a man to defend our women. Be a man to protect our children.

Support our call to be heard my brother.

That's all.

/ / "There were Harriers dropping 500lb bombs on buildings. If they're dropping 500lb bombs without knocking on the door first, how can you argue the troops on the ground did anything wrong?" \ \

5000lbs of radio-active toxic waste that will murder for years more like, while after, then striking again to get the god helpers and screaming children, then even, as in Fallujah, going house to house to murder every one, young and old as the truly Satanic. Just obeying lawless orders to thieve from Humanity as bushite for neocon zionist traitors of G-D doesn't fly in the big book. When anyone kills a bushite, all humanity benefits truly from the defense. You defend a real suffering God by ending a soulless bushite threat against our species.

Exit strategy to save the lives of dying Americans:

War bushite LIAR zionist repuglicons who did God wrong on 911

War bushite who LIE to American Sons and Daughters to not hunt those who stole billions with ear-marks, Social Security, no-bid contracts, Iraqi oil, ect.

War those who stole the Iraq Development Fund, and the emergency monies left to save the lives of our dying children

War bushite who feed soldiers radio-active toxic waste as harmless

War bushite who support torturing the innocent to death

War bushite who sing about the joys of murdering Iraqi children

War bushite who beat to death barefoot Iraqi children

War bushite who jokingly beat lamed dogs for fun

War bushite who claim they are lawlessly un-accountable as liars.

War bushite in the air force who target bombing innocent People
like in Fallujah or Somalia with land mines and mini nukes

The godless as lawless bushite is the enemy to America, kill
it proudly for freedom, as an undying love for a real God and

How Bush misled the world

http://www.theage.com.au/handheld/articles/2004/02/05/1075853996640.html

/ / Once the document was declassified after the war it became known that it contained 40 caveats - including 15 uses of "probably", all of which had been removed from the previously published version. Tenet further ingratiated himself by remaining silent about the OSP. "That's totally unacceptable for a CIA director," said Thielman. \ \

Thielman meant "totally unacceptable" as in HIGH TREASON. Could it be any higher? Deliberately caught misleading whore-dumb Congress to wage his immoral neocon 'escape' with a unjustified criminal brutality against God as all of our Humanity. A great deal more than a million innocent people have been victims to the 'targeted' Zionist killings of the irrational bushite enemy. Lawless enemies to Creation, spreading their toxic waste who thieve, rape and murder without reprimand from corporate news america, shall, I pray daily, die justly in vengeances by the will of a real undying Love for our victimized innocent family. Justice for Humanity.

Please, help US.

The guilty party of Haditha have confessed that targeted killing of innocent children is fair game in their worlds, and as confessed, they 'got away' committing the same Satanic acts - going house to house in fallujah murdering more than two hundred thousand innocent folks for LIAR E-N-E-M-Y Sattler. Bushite corporate america, has stated in silence, the bushite enemies of Haditha will never face public execution for such offences, YOU apparently WILL NOT GRANT IT, too cowardly, and in all likelihood, (like those of the Saudi Blount's third infantry) will be allowed to walk freely down american streets after being found guilty as politically supporting the robbing and murder of innocent men, women, and children all because we're rag-heads or niggers. The, deserving to die as illiterately intolerable bushite drone soldiers HAPPILY, WITHOUT QUESTION, co-operate with ANY lawless mercenary forces such as south african death squad goons in finding the enemies of themselves. Purposelessly ungodly bushite soldiers are told they are DYING to defend Iraqis, while breaking out of prison, mercenaries caught trying to kill innocent Iraqis for fun and profit. While, at the same time, actually having SLAVES from India preparing their lunches!!! And guess what? they're coming to live bushite america as the patriots after

they get killed you're forsaken American Son or Daughter teen!
With millions of stolen American dollars to set up new
'freedom' operations.

Let US demand open radio
communications on the mathimatical facts to save our own
selves further victimhood to their personal contempt for the
true value of YOUR life. Thanks.

AFFIDAVIT

AFFIDAVIT OF JOHNNY WIZARD

I, Johnny Wizard, in the city of Winnipeg, Province of Manitoba MAKE OATH AND SAY:

1.

Pakistani ISI Director General Ahmad orders an aide to wire transfer about $100,000 to hijacker Atta. Ahmad later resigns after the transfer is disclosed in India and confirmed by the FBI. [Dawn, 10/8/01, Times of India, 10/9/01, Wall Street Journal, 10/10/01, AFP, 10/10/01]

2.

On March 3, 2002, MSNBC's Jim Miklaszewski reported that he had received anonymously, top secret presidential war strategy documents dated September 9th, 2001, originating from Condolezza's office, outlining a strategy to invade Afghanistan premised on blaming bin Laden a terrorist, but providing no evidence to back up the allegations, thereby guaranteeing criminal invasion. Only workable if Laden pleads innocence to a crime that hadn't yet taken place, a crime serious enough to "justify" sacrificing American GIs truly for a liquefied natural gas pipe line for pension thieving Enron. ["The Dahbol Working Group" and Bridas] Any evidence for any offense would have been sufficient to have Muslim fundamentalists hand Laden immediately over, as they had offered [as others of other nations had also] repeatedly during the Clinton years.

CBC and CNN have still, to this day, consciously refused to do any follow up on the intelligence, deciding instead on behalf

of dying people everywhere, our public devolvement of a just society.

RTÉ News - US rejects Taliban bin Laden evidence calls
21 September 2001 17:41

The White House has rejected requests from Afghanistan's ruling Taliban for proof that Osama bin Laden was responsible for last week's attacks. According to the US Secretary of State, Colin Powell, the United States has enough evidence to try bin Laden in an American court.

The US Government said there would be no negotiations.

It sounds like something connected with temperature, which could be any number of things.

Now this is a stretch, and a guess, but... Some classic GE transistor radios of 30+ years ago (such as the P975A) had completely separate AM and FM tuners. * If this is true for the SupeRadio, it might simplify troubleshooting.

I'd recommend taking a screwdriver and a can of freeze spray with you to the beach.

* GE made its own transistors, and as separating the tuners didn't increase the number of RF and IF elements required, the cost of wholly separate tuners was only a bit higher than combining them.

Sounds like a heat related problem. I have one of these I bought at the
Salvation Army in new condition for $5 I use for a work radio on
construction jobs. What a great sounding radio and so easy on batteries.

If I see one waiting on me at the Goodwill store, I reckon it will be priced by one of those sales clerks wimmins (they make up there own prices on some things over there) over there at anywhere from about two to four dollars.That's the most I would pay for one of those radios over there, not knowing if it works or not untill I get home and stick some good batteries in it.I have bought lots of good old collectible little radios at thrift stores over the years for as little as one dollar.I sure wouldn't waste a lot of my money on one of those cheap plastic Eton radios no matter what model it is.

The SRIII doesn't have a tuner at all. It's a supremely crappy varactor tuned set. If only the FM is going out, it's likely that the heat is building up enough that the LO is failing. One thing to try is take a white towel with you the next time you go out, and fold it over at least once and let it on top of the radio to prevent the UV from the sun reaching that lovely black (solar collector) cabinet.

For whatever good it may or may not do, I've already sent a complaint to Tera News regarding Mr Morgan's abuse of the Amateur Radio newsgroups.

I understand that others have, or are following suit.

186 posts to r.r.a.p on Aug 2 and 183 posts on Aug 3 are excessive by any stretch of the imagination.

Nor is this unusual, for there has been many a month when KB9RQZ has made 1500 to 1600 posts in the Amateur Radio groups and has gone on record as stating that his sole purpose was to disrupt the groups with repetitive posts.
It is because of him that rec.radio.amateur.moderated was formed. He has subsequently been banned from that newsgroup AND from posting to QRZ.com as well.

I plan next to document his continued abuse, print it out, and mail it to Tera News located in Osceola, Indiana on the outside chance that Tera News does not read the complaints emailed to them.
If he continues and Tera News fails to respond, I next plan to send a missive to his provider, Hughes Net.

About five hours ago, I was outside rakeing my front yard.A few minutes later Ashley (she lives next door with those divorced gay wimmins, but Ashley is straight, she has a boyfriend too) was getting into her car (late model Chrysler Sebring red car) to go to work.She works at a karaoke bar.I asked her, Where are those other two wimmins? Ashley said Carolin (Carolin is gay) is staying with a friend of hers for a few days and (I think I know who that friend is too.No doubt she is that gay woman friend of Carolin's who shows up next door over there very often in that Lincoln SUV and she spends evenings with Carolin) Jerry (Jerry is the Bell South woman's skinny twin sister, Jerry works off shore for Shell.I think Jerry is straight, maybe partially bi-sexual, I am not sure yet) is in Natchez for a few days.The Bell South woman lives at Old River, Old River is near Natchez.I reckon Jerry (skinny twin sister) is visiting her sister for a few days.Ashley said Jerry (skinny twin sister) will be back this weekend.

Larry,
You make a hell of an old-maid! You are one hell of a gossip!

You ever been married?

How come your not next door "tapping" some of that stuff, sounds like
they could make your dreams come true. I know they could make my dreams come
true with just a "little" effort.

shortwave club is meeting Labor Day Weekend. Officers will be elected.
Further details will be posted in the near future.

For those of you who missed our Valentine's Day meeting you really
missed out!

Also our lawsuit to force municipalities to build separate restrooms
for our demographic won a key victory last week. The judge ruled that
cities objection to the costs which will run into the millions was
irrelevant to the larger question of our civil rights. YES! *group
hug* :)

More political and legal initiatives to be discussed at our meeting so
be there or be square. We have a very aggressive agenda for 2008 so be
there!

I like the great sound on FM and the good reception on AM in a radio that
it costs little next to nothing. A combination hard to find elsewhere...

The large built-in antenna (AM ferrite-bar) makes for good AM-reception,
an the "well balanced" (though very cheap) set of speakers makes the sound
unmatched for a light footprint radio this cheap.

I do have better sounding portable radios (older, genuine Grundig
Satellit's)
but they are totally different class and price range all together.

Greetings,
Knut Otterbeck

For two dollars that I gave for one, the bandwidth switch is a big
help, even and the varactor does slip around if you aren't there well
enough on AM and either switch AFC on or off.

That AFC is sloppy and seems to be a big part of it's DX so-called
atrributes. It's really good for zeroing in on weak, mostly LOCAL AM
stations and improving them against splash or harmonics.

It seems odd that, as this radio (supposedly) uses varactor tuning... Why doesn't Thomson go all the way and include full digital tuning? Given the current cheapness of electronics, it should add no more that $10 or $15 to the price.

Varactor tuning is no different from using a mechanical tuning
capacitor. You're just rotating the shaft on a resistor instead.

To make the leap to digitial tuning, you have to have a PLL (Phase
locked loop) and all the attendant dividers, and the display and
lastly, some degree of accuracy for the reference. If the display
reads 930 AM, it really should be 930, not somewhere else.

It really isn't as simple as "Just a couple more parts."

I know this is difficult for you but try to follow the thread from the beginning. Mike M posted a message to which I responded. To make it easier for you I copied that portion of the thread below. Next time try sending messages to the right person.

I don't think Thomson is even involved in consumer electronics products
anymore. I believe they sold off the RCA name to Audiovox, and when you go
to the GE brand, you only get info on telephone products. Brand names are
totally meaningless these days.

Interesting lists of all SW broadcasters, frequencies, and times:

The EiBi lists is probably the most frequently updated list and comes
in a list by broadcast times and another list by frequency:

http://www.eibi.de.vu/

The HFCC (High Frequency Coorfinating Committee) puts out a
dowlnloadable list twice a year:

http://www.hfcc.org/data/

A list put out by Japanese DXers can be found at:

http://www.geocities.jp/binewsjp/bia07.txt

A frequently updated list of English SW broadcasts can be found at:

http://www.primetimeshortwave.com/freql.txt

The following URL will help you identify stations on a particular
frequency:

Happy Listening!

I've got a Sansui T-80 that proves that. It will shift frequency and
often goes completely out of band then sometimes back to the wrong
frequency on the band and the counter is given voltages that create a
gibberish reading for the LCD display driver. All for a varactor or
two that are tweaked or fed an out-of spec signal. I don't have any
dual displays with a similar problem...my SX-3600s are always
displaying the STEREO graphic but that seems to be a common thing for
that model.

It would also add to the noise floor, and make most of the advantage of the
tuned RF amp front end null. My biggest gripe about the SRIII is the abysmal
dial calibration. I've yet to see one that tracks across the dial. And any
time I've attempted to calibrate one (I've done dozens) the best I can get
it to do is be semi-accurate at the top and bottom, while off by several
10's of KHz in the middle.

It's fundamentally different -- you can change the rotational "position" of the "capacitor" _electrically_, without moving parts.

I didn't say that. But I'll gladly allow myself to retroactively be accused of having said that.

Once you have varactor tuning, not much is needed to convert to digital tuning. How about just three parts -- a reference crystal, a custom IC, and an LCD? Digital tuning is pretty simple stuff.

I have a Sony Discman with a complete stereo-FM + AM digital tuner crammed into a tiny case about the volume of your thumb, dangling from the end of the headphone cord. The complete unit sold for $180; the replacement tuner/cable assembly went for $100. Because this device is a cleverly miniaturized piece of electronics, one can assume it's rather more expensive than what a larger, bulkier device would cost.

Is that _necessarily_ so?

On the AM band, the added "noise" would be primarily FM modulation, creating sideband noise not unlike the sideband noise generated by flutter on analog audio recorders. How audible would that be?

If you're referring to adding $10-$15 to the retail price, on the
manufacturing level that would be about $1 to $1.50 in additional parts.
Possible, but I'd guess the addition of a crystal, a microcomputer, and a
display, would probably add more than that. In the end, you would have a
very different radio, and not necessarily a better one. Microprocessors add
their own problems. These radios do offer great bang for the buck, but
honestly I think the term "super" is misapplied.

Does anyone know what the actual AM senitivity of these "super" radio might
be. Healthkit used to provide sensitivity for its AM tuners, but so far all
they talk about for the GE radio is doubletalk.

I've not seen any quantification of the AM sensitivity on the radio.
However, with the tuned RF stage, it is much more sensitive than most of the
AM/FM only portables on the market. I have one out in my shop on the shelf
that I use for verification of stations when I'm trying to realign a set
that's been overtwiddled. I'll see if I can get at least a uV reading from
my o-scope for a good listenable by-ear signal. I don't have the equipment
for a fancy uV/m or dBuV reading.

I've yet to hear a cheap (or even a multi-hundred dollar) radio with a
perfectly noiseless PLL. My Grundig (a REAL Grundig) Satellite 650 even has
PLL generated noise that brings up the noise floor at least 2-3dB, and it's
filtered and sheilded to the max (and cost $1100 new).

www.devilfinder.com Which radio came before the G.E.Superadio?

Supposedly, according to the model number on my radio, it is a G.E.Superadio 1.But nowhere on my radio does it say Superadio and the FM whip antenna has a plastic covering which encloses most of the first metal tube section of the antenna.So, what radio do I own? It is an original Superadio, or a forerunner of a G.E.Supeadio 1? I bought the radio back in the 1980s at a local Service Merchandise store.I think it was in the 1980s, might have been earlier than that.

I haven't looked at mine in a couple weeks but as I figured the PLL would make tuning in some stations more difficult. As they are, the bandwidth position being in wide actually hinders tuning in a little 1 kw signal at 1450 in Notus called KIOV, 1350 KTIK that's more than a kilowatt and even 1490 KCID in Caldwell (*because I live next to a 5 kw DA-N at 1380). If the station was running a narrower signal to start you have to tune in narrow mode first anyway. It's picky that way. Batteries affect that too, FM more pronounced than AM, of course.

The FM antenna screw fell out a long time ago too, tried to replace it and at some point the thing got broken anyway. Good thing it has screw terminals for FM.

for spearheading the burgeoning sanctuary movement for our immigrant brothers and sisters.

A.W.S.
President
Gay Lesbian Transgendered Shortwave Group

"A NEW faith-based movement to "awaken the moral imagination of the country" hopes to provide sanctuary for undocumented immigrants whose deportation would break up families.

Calling themselves the New Sanctuary Movement (NSM)--a nod to the 1980s effort to assist refugees from Central America fleeing the carnage of U.S.-sponsored wars--churches and religious activist groups held press conferences around the U.S. May 9 to announce plans "to protect immigrant workers and families from unjust deportation" by giving shelter and material aid to the undocumented.

The initiative comes in the wake of efforts by immigrant rights activists to pressure local governments for sanctuary city policies of non-cooperation with federal immigration enforcement."

SWH,

I have one of the "Digital" versions of the GE Superadio
Model # 7-2882A that was made in Hong Kong an you
are right on all counts.

But it is 'nice' to be able to push a Preset and Listen
to one of your Favorite Radio Stations - Especially
when the GE Superadio III has such a badly aligned
Analog Tuning Scale.

David Moisan's - GE SuperRadio FAQ - Technical Information
http://mysite.verizon.net/vze20h45/radio/superadio/gesr_tech.html
http://mysite.verizon.net/vze20h45/radio/superadio/gesr_faq.html

Currently for the $-Money-$ the Redsun RP2100 AM/MW
Shortwave Radio seems to be one of the 'better' AM/MW
Radios that would 'fit' the Super-Radio characteristics and
has a very good 'mono' FM Tuner and Sound Too !

There WAS a digital version of the GE superadio, called the superadio plus, made in 1982. It is rumored to be noisier than the analog version (big surprise) and was double the price, which kind of negated the whole cheap-but-sensitive idea behind the superadio series. It was not a big seller, and is somewhat rare today.

Subwoofer/Amp project...

(Playmaster 300W subwoofer amp)

While walking down the hall around lunch time I walked in on a discussion about surround sound home theater systems. After humbly admitting I watched movies through my two channel stereo I was prodded by my peers to get with the '90s, I started checking out the technology.

The following week I saw a used Carver surround sound processor for sale on the net. Perfect for upgrading my late 80's vintage two channel stereo. However, a suround sound system requires three front speakers (left, center, right), two rear (left and right), and a subwoofer. The five channels provide the spacial realism, while the subwoofer provides the physical realism... that is when Apollo 13 takes off one should be able to feel the vibrations in the chest, and when the horses cross the battle field in braveheart, it's the subwoofer that allows one to feel the horses through the vibrating floor.

While I had other equipment to get by on the five channels, I was short on a subwoofer, so I did some research. The short story is that I built my own powered subwoofer (actually 2) and learned alot in the process.

Here are the details...

Some info on subwoofers
Speaker Building Information Sources
Subwoofer Project
Subwoofer Construction
Amplifier Construction

Some info on subwoofers...
Difference between a woofer and a subwoofer... subwoofers are usually only used to recreate a sub portion of what a woofer will. While a typical woofer may have a frequency response between 20Hz and 2k Hz, a subwoofer usually has a crossover that limits it's frequency response range from 20Hz to maybe 80-150Hz. Component wise (the cone/coil thing) woofers and subwoofers are the same. There are passive subwoofers and powered subwoofers. Passive subwoofers are powered by your stereo's amplifier. Powered subwoofers is the same as a passive subwoofer except it has it's own amplifier for driving the passive subwoofer. Your stereo needs to have a sub woofer out (line out) for a

powered subwoofer. Since most power produced by your stereo's amp is consumed by driving the low frequencies of your speakers, it's a big win to have a separate amplifier for driving the low end. This way mid range won't suffer from the power consumed by the low end.
There are several designs for a subwoofers. Some of the less exotic ones are are ported, sealed, and band pass enclosures. Sealed enclosure's advantage is that they can exist in a much smaller enclosure, however this is at the cost of efficiency and reduced low frequency performance. Ported enclosures are the most common. These have a tube called a port which serves several purposes. It's important that this port be tuned to the driver (woofer) and volume of the box or else the sound may result in unclear, muddy bass. The affect of a properly tuned port with the woofer is similar to blowing a wine jug like an instrument. A band pass enclsure looks like a box with a hole or slit. Bose subwoofers are band pass woofers. The idea is that only certain desired frequencies (bands) end up passing through the hole or slit while the others are absorbed internally.

There's a thing called a crossover to consider. A crossover is like a frequency filter except rather than filtering out frequencies, it redirects frequencies to other channels. A typical powered subwoofer will have a built in crossover that directs low end frequencies (usually < 80-150Hz) to your subwoofer while sending higher frequencies on to another channel (the rest of your speaker system). The high end frequencies rapidly diminish in the channel sent to the subwoofer and the low end frequencies rapidly dimish in the channel going to the higher frequency response speakers. So the tweeters get the high frequencies they are designed to produce and the woofer get the low frequencies they are designed to produce. Almost all multi speaker system will have some sort of crossover. separating frequencies between tweeter, midrange and woofer. In crossovers, there are both passive and active crossovers. Passive crossovers are typical in most speakers. Since they take their power from the incoming signal, they do have an impact on power/responsiveness. Active crossovers get there power externally. However we're starting to go beyond the scope of the subwoofers project.

The prices for powered subwoofer can get pretty expensive. I was looking at models between $200 and $1500. $1500 for a 12 or 15 inch woofer plus amplifier just seemed ridiculous considering the cost of parts to make them... So, I decided to look into making my own. The route I chose to take was not cost effective if time for learning, designing, and implementing is factored in. However what I've learned while doing this makes it all worth while.

Speaker Building Information Sources
I started with two books I picked up at Radio Shack called Speaker Building and Advanced Speaker building. Both are heavily oriented torwards building speakers with Radio Shack speaker components, and

can almost double as a Radio Shack speaker catalog. Lot's of shameless Radio Shack marketing through out. They have a nice intro into building speakers, with a lot of the theory left out. The first book contains graphs to crossreference parameters required to make a speaker so that one doesn't need to use a calculator. The advance speaker book throws in some formulas but is a little lacking in discussion on how the equations were derived. In case you don't know how to plug a formula into your calculator, no worries... the Advanced Radio Shack book will tell you which buttons to press.
Vance Dickason's "The Loudspeaker Design Cookbook" (ISBN 1-882580-10-9) was recommended by several sources. It reads like a collection of white papers on speaker building theory and is heavy on the technical side. Towards the end it contains several commercial advertisements for part sources. Good book.

There is quite a bit of wave theory, frequency dampening factors that needs to be taken in to consideration. Everything from cone tensile strength to acoustic frequency dampening of dacron fiber fluff or maybe beach sand, resonant frequency of particle board versus a harder wood, etc., etc. factor into the volume of the box and the optimal length of the port so that it resonates properly. So many factors, it takes some time to become comfortable with weeding out the meaningful parameters from those that are negligible in the quest for making the ultimate speaker. Box dimension I later learned really dosn't matter much for a subwoofer. The main concern in box dimension is standing waves where waves are cancelled out to the tune of +/- 5dB in the worst case. Sufficient dampening material inside to absorb standing waves can cancel this out. In the case of subwoofers, it's not an issue since the box dimensions are so much shorter than the wavelengths (20-100Hz).

Here are some information sights I've found on the web....

Subwoofer Project
Being a neophyte in the audiophile world, my first thought was to get the biggest driver I could find to produce the lows and push volumes of air that one could feel. I ran across some 18" woofers, however I liked the specs on some 15" woofers I later found better. After doing

the calculations I found that for my ported cabinet, I would need an enclosure that was 14 to 24 cubic feet! I decided that there is no way I would want to dedicate this much space in my living room to a box this big. These calculation were based off of an optimal volume formula I got out of the Radio Shack books. I later discovered that this optimal volume didn't agree with the manufacturer, several software design packages, and the loudspeaker cookbook.
An alternative was to go with a sealed enclosure, however this reduces the responsiveness and pushes the F3 upwards. End result is a subwoofer with a reduced ability to produce low end. Since it seems the whole point of having a subwoofer is to produce the low frequencies, a sealed enclosure which raises the low end didn't make much sense to me.

I opted for a 12" woofer with a 3 cubic foot enclosure. I decided to go with Ultimate's AU1290 "Attitude" woofers. They have a frequency response range of 18-1k Hz. They have a dual six ohm, 90oz magnet, 2" kapton coil capable of handling 500 watts sustained, 1000 watts max. Headroom is .44". SPL is 88.9dB, but I don't care about this since it'll be driven by it's own separate amp with it's own gain control.

Test Data from Factory:
SPL 88.9dB 1W/1m
Fs 23.5Hz
Vas 5.3
Qts .38

I decided to go with 3 cubic feet ported enclosure since that would give me the lowest frequency within factory recommendations.... With a 3 cubic foot enclosure, this driver has an F3 of about 26Hz (pretty good!). I decided to go with a 4" diameter port tube since that would give me the least amount of port noise. The port for this is about 14" long. I ended up picking up some PVC tube at the hardware store. This worked quite well.

Subwoofer Construction
I decided to make a prototype out of particle board since wide oak boards are expensive and I was afraid of ruining them, especially since I have very little wood working experience. Particle board cost about 1/8 the price.
Being new to wood working I only had a circular saw which I had learned through experience is not for precision wood working. I was able to pick a used craftsman table saw in perfect shape for about a third of the price of a new one. And this is what I built the prototype with. For the speaker and port hole I used a saber saw.

The prototype came out pretty good. Some things I learned from the prototype is that cross bracing is important so as to cut down on the side board vibrations. Also, all seams should have a good fit and must be well sealed. I used some silicone wood calk I picked up at the

hardware store. If the seams aren't sealed, the gaps tend to make a raspy whistling noise when the driver is pushing large volumes of air.

I picked up a used 60's vintage radial arm saw which I found for about 1/5 the price of an equivalent new one, however it needed some work. I spent a Saturday cleaning, oiling, calibrating, and building a new rip fence for it. I discoverd that a radial arm saw is really the way to go for precision cuts. Rather than moving a big block of heavy wood towards the blade, the heavy material stays in place while the blade runs along a track and makes a perfect precision cut. The end result is that the oak boards had a much smaller seam between the boards in the cabinet. I think this will help reduce board vibration as well as make it easier to seal.

I put about 2 pounds of a Dacron fiber called "Acousta-stuff". Supposedly it's better than Dacron fiber that one can get at a craft/ fabric shop because the fibers are triangular rather than round..... Don't know about that, but the Loud speaker cookbook had some test results that said it was better, so I paid $8 per pound for this fluff. Fiber glass is suppose to be better, but for other reasons I decided I didn't want to use that. Dampening material is important for the speaker so as reduce standing waves in the enclosure which can mess with sound to the tune of a variable +/- 5dB! I just stapled this to the side of the walls excluding top and near the port tube.

I picked up a gold plated 8 post screw/banana speaker terminal which is intended for a dual voice coil subwoofer with individual crossover for each channel for hook up to additional speakers. Currently I use the active crossover from the subwoofer out in the Carver surround sound processor, so I've delayed on the passive crossover for now.

I have some small Polk speakers (4b?) I'm using as the satelite front channel speakers now. They have a 6.25" woofer. I don't have any performance spcse on these speakers.... so I'm guestimating by looking at other 6.25" of comparable quality that they will begin their roll off around 100Hz. I'm considering putting together a 2nd order low pass filter at 100Hz for the subwoofer. I had underestimated the cost for a crossover for this subwoofer. Doing some rough calculations for this low 100Hz filter looks like I'll need a 12mH inductor coil and ~200uF capacitor. Because of the high power nature of this subwoofer, I'm looking at $15-$30 for the inductor, and ~$50 for the capacitor.... Since this is a dual coil driver, everything will be mulitplied by two.

Amplifier Construction
I needed a mono amplifier to drive this subwoofer. While a cheap and easy way to do this would be to buy a bridgeable automobile amp, I had been looking for an excuse to build my own amplifier. Acoustic Labs has designed several high end amplifiers. Their designs are then

marketed as "high end audio" project kits. Mark V Electronics, Inc. - Mark V Electronics, Inc. 8019 E. Slauson Ave. Montebello, CA 90640 Phone: 323-888-8988 http://www.markvelectronics.com/store E-mail: MARK5CO@aol.com http://www.markvelectronics.com -out of California markets. A mono amplifier(s) has a lot of uses in a component stereo system, especially in a 5.1 channel AC-3 or Dolby Pro Logic (THX) surround sound system that I can see using it for the forseeable future. As such, my thinking was... if I'm going to put all the time into making this, why not start with the best possible design. I decided on the AF-3 design which is a 300 Watt constant current MOSFET amp. MOSFET amps are known for having very similar characteristics to pentode vacume tubes without the drawbacks of being a vacume tube. The design has a built in speaker protection cicuit relay for protecting the speaker from power surge during power up. The design, PCB, mega heatsinks, and components that go on the PCB sell for $165. Not bad I thought... that is until I picked up everthing else I needed. The design calls for 4 filter 80-100 volt 10k uF capacitors which sell for about $25 each with mounting hardware. I picked up an 8 amp toroidal transformer (low hum, low EMF) for $66. Also I needed a cabinet of which I found a nice black anodized aluminum vented case with rack handles for $44. Other miscelaneous components such as an optional (quiet 23dB) fan, gold plated mega 4AWG capable speaker binding post, wire, rectifier bridge, fuse holder, switch, some extra capacitor and high wattage resistors, etc. brought the total price up to roughly $400 for this mono channel amp. Had I known this would be the price ahead of time, I probably wouldn't have done it. However, I now rationalize that I've learned alot making it and that I have the best mono amp for my forseeable future needs.
I built two amps (Mom wanted one). Each amp took approximatly 50 hours assembly time. The end result is a nice sounding extremely powerful amp. 300 watts for this subwoofer is more than adequate. I have the subwoofer line out on the surround sound processor turned down to about as low as it will go. The subwoofer itself will handle 350 watts sustained, 500 watts peak. Watching the movie "Braveheart" during some of the battle scenes tends to set the whole house vibrating. One can feel the horses running across the wooden floors in the house.

After a couple weeks, I noticed the first amp I built would run much hotter than the other. I opened up the amp and recalibrated. There are two potentiometers that need to be adjusted. One is adjusted by reading the current to the amplifier board, the other is adjusted by zeroing the ouput voltage to the speaker when no input signal is present. I had adjusted these after assembling the amplifiers. However after running the amps for a while, one of the two potentiometers needed recalibrating. Now they seem to run at a reasonable temperature with my typical use.

I had picked up a 120 volt cooling fan at Radio Shack for cooling the amp. At the time, I didn't know how loud 38dB was which is what the fan noise was rated at. After trying it out, I decided this was too loud for an audio amplifier application. I found a 23dB fan + fan

guard in a Jameco Electronics catalog. It's quiet enough, however, cutting the hole in the metal case has become a problem. I found a 3" circular saw, however this requires a drill press that one can set at 100rpm and can apply 150 lbs of pressure. I don't own a drill press, and haven't found one that can operate as slow as 100 rpms. I just finished a welding class, where in addition to stick welding, MIG and TIG, we learned to use a plasma cutter which is as easy as using an exacto knife. I think if a circular wood template was made ahead of time, the plasma cutter would be the easiest. I think the local welding shops rent a 110 volt plasma cutter for about $40. ...an expensive hole. I also needed to cut the case to install the oversized speaker binding posts. I used a coping saw for this. It was hard frustrating work and the results were not very nice. Fortunately, the cut is hidden by the speaker post mount, and so doesn't matter. A plasma cutter would have been great for this too.

Even though components in the amplifier would probably last longer running cooler, I've decided to wait on installing a fan until I have a better understanding of how hot it will run and can justify all the trouble of installing one. This also gives me more time to think up some way to wire up a thermostat controller.

This model was likely the outgrowth of the 7-4650 clock-radio, which had direct-frequency entry through a keypad plus six presets. Its list price was around $90.

Whoever designed this radio was actually thinking. As the AM and FM bands have numerically unique frequencies, you simply punched in the one you want, and the band automatically switched. You don't have to select AM or FM first.

I'd like to clarify a point in the Superadio FAQ...

"Unlike most AM/FM radios the SR III has additional RF stages..."

I've never seen an FM tuner that didn't have an RF stage (with the exception of a weird direct-conversion circuit shown in the GE Transistor Manual). It would be less-incorrect to say

"Unlike most table or pocket radios, the Superadio's AM tuner has an RF stage for greatly improved sensitivity."

Most AM/FM radios don't have an RF stage. Only higher end home systems and car radios do anymore for the most part. The front ends on your average portable are just an LO section and an input tuning section (antenna). Even average home systems don't have the additional RF stage. Makes for horrid sensitivity and even worse overloading problems close in.

Well, it seems to me we need to check the GE radios against a radio which has a known sensitivity level on the AM band. I have to use my so-called Superradio with a tunable external loop to picked up most stations I want. So it is not very super. And I have the Radio Shack version too. About half the time it has distored audio, and other half it works ok, but with inferior tone. Ok, they are cheap, I'll grant you that. C. Crane and Company advertise a real super radio, the Mini CC radio. Has anyone tried it for $149.95?

If you need an external tuned loop, then you need an alignment. If it's an SRIII, then you're probably out of luck. If it's an SRII or SRI, then you can get it properly aligned and it would be pretty much unbeatable for AM and FM reception.

I have a Grundig portable with shortwave that allows you to do that
too. Type in 1130 and the radio automatically switches you to 1130
khz MW. Type in 95.50 and it tunes to 95.5 Mhz FM, And so on....

You can also just enter something like 31 or 25 or 49 and it switches
you to that desired shortwave band directly. I like that radio. :)

Two points, first just how does the BBC or a utility station sound
through
your system? I found the quality of the typical SW audio chain is
pretty
nasty. I just don't see the point of being able to reproduce near sub-
harmonics
for speech intelligibility.

Second, check out the simple thermostat diagram offered by Ron Elliot

Brenda Ann has a National or two and a well-modified Pioneer TX-6500
tuner she built as I understand (I donated to it). All of the above
would run rings around this thing I am certain. A great DX set by GE
was probably made and it had tubes and was a tombstone.

Show me any commercial FM radio or tuner, at any price, that _doesn't_ have an RF stage. I find it very, very, very hard to believe that there are such radios.

I can think of only one _good_ reason for omitting a RF stage, and that only in digital tuners. As such tuners require a varactor-tuned front end, and varactors aren't especially linear... Fill in the blank.

I'd like to comment on the phrase "additional RF stage". An RF stage is, of course, an additional stage compared to a radio without one, but in this phrase "additional" modifies RF, not stage. I believe a few radios have had multiple RF stages, but this is uncommon.

After writing the above, I pulled out the manual for my Yaesu ("joy of Hams' desiring") FT-1000D. It seems the RF stage can be bypassed for reception of very strong signals. I'm not sure what this proves or disproves with respect to this discussion, but it's interesting.

So, that makes five versions of the G.E.Superadio.Superadio, Superadio1, Superadio11, Superadio111 and Superadio Plus (Digital) But, how about the Superadios that do not say Superadio anywhere on the radio like the one I own?

I own a big old heavy (and I do mean heavy, it weighs a ton) Sears Travler AM FM Shortwave portable radio.I bought it at a Goodwill store years ago.The mechanical push buttons assembly inside of the radio and the Off/ON/Volume switch are worn out.(it was like that when I bought the radio for a few dollars) I have to play with it a long time to get the push buttons and the On/Off/Volume switch to work and when I change stations on the radio.When the radio does work though, it is much, much better than my Superadio for AM DXing.A lot of those old tube type radios (of which I own many of them) are very good for AM DXing too. cuhulin

It explains why two-three of my tuners (more) have a hard time with
1350 and 1450 when 1380 is nearby and a couple would bleed 1450 in two
other spots when KIOV was still on Clay Peak. Thanks much!

As far as I know the Superadio I only indicated "Superadio" on the front, not "Superadio I". After all, at that point GE (or whoever), didn't know if there would be a II or not.

Brenda was refering to the AM section of the radio I think.
Most commercial "broadcast" radios now _are_ crap. The
manufacturers figured (probably rightly) that there's nothing
worth listening to on AM, so they don't waste the money in
production to make the AM portion decent.

Bypassed? Look again, I suspect it has a 20 dB attenuator switched
in ahead of it.

Most of you know Fetter as the owner of several radio-related sites,

for fraud related to electronics equipment sales.
I wonder if this is from the old fraud arrest or a new one.

Nope. The manual -- apparently written by 'murcans -- explicitly says
"bypassed". The schematics are so complex I don't have time to unscramble
them to confirm or deny.

From Wikipedia:
Later in 2004, Thomson set up a joint venture (TTE) with China's TCL, giving to TCL all manufacturing of RCA and Thomson television and DVD products and making TCL the global leader in TV manufacturing. (Thomson still controls the brands themselves and licenses them to TTE.) At the time, TCL was hailed as the first Chinese company to compete on the international stage with large international corporations. Thomson initially retained all marketing of TTE's products, but transferred that to TTE in 2005.

In December 2006, Thomson agreed to sell its consumer electronics accessory business, including rights to the RCA name for consumer electronics accessories, to Audiovox.

So, I guess they are still "alive", if you want to call it that.

Was it originally named that by GE or just by later aficionados in their comparisons?

I've got one right here in front of me (GE 7-2882A), and it's labeled as an
"electronic tuning FM-AM receiver", not a "superadio plus" or "superadio+".

As far as I know, this was never touted by GE top be a "superadio". Does anyone have
pictures of a box or advertising they can share to show GE called it one?

But my G.E.''Superadio'' does not say Superadio anywhere on the radio.It definetly isn't a Superadio II or Superadio III or a digital Superadio.The radio has one big speaker and no other speakers, only one.Let me reach over behind that pile of big portable radios on the floor behind my old antique pump organ (no puns please) which serves as a stand for my two tv sets and check it again.(Sheesh, I really do need to vacuum behind there one of these days)

OK, on the left hand side of the dial, it says, LONG RANGE on the right hand side of the dial, it says HIGH SELECTIVITY.On the speaker grill, it says GENERAL ELECTRIC.To the right hand side of the dial and arranged vertically is a big knob for tuning the stations.Just below that knob are toggle lever switches.Left hand side toggle switch for BAND.Right hand side toggle switch for AFC ON OFF.Below those two toggle switches is a knob for TREBLE.Just below that knob is a knob for BASS and just below that knob is a knob for LOUDNESS.On the rear panel, Model NO.7-2880B

Not long from now, it will be Monday morning, August 6 in Hiroshima, Japan.

Let's pause, and remember the time when men were men, and the sheep knew their place. A time when we actually gave our enemies the thumping they so thoroughly deserved, without endlessly whining about it.

Yes, it will soon be the 62nd Anniversary of the Atomic bombing of Hiroshima.

And, I'm certain it will be mentioned on shortwave, so keep your radio on.

Steve, normally I would be amused by this. Lord knows I long for a time when men were men, sheep were nervous, and Oprah wasn't mother to US ALL. But that morning in Hiroshima, we entered an age from which we cannot retreat. The end of innocence. The end of simplicity. The end of nations minding their own damned business.

Truth is, if it hadn't been us, it would have been someone else. Delaying our entry into that war, it would have been Germany. Or the Soviets. Or, God help us, Japan. So, it was an era into which we as a species were going to enter, no matter who threw down the gauntlet.

And that day were planted the seeds of much of the dissent that threatens civility in our own land. And fertilized them with the loam created by easier living.

Lack of natural enemies leads to cannibalism within a culture.

There is no doubt that Hiroshima, and the second kiss, Nagasaki, ended a war that would have continued on for years. With millions dead, and, eventually, WWII fought on our own soil. Japan, believing that death was more desireable than defeat, would have fought until there was no one left. On either side. And two of the most astonishingly adaptive and productive cultures would would lie in ruins. And the boom that was to follow that war, the boom in technology, in culture, in manufacturing, in agriculture, in economy, that fed, clothed, rebuilt, restocked, renourished, and labor-saved life in the world would not have come. Life was hard before the war. Not so much, after. To the degree that children then had to worry about invasion, bombing raids, enough food to eat, and separation of family. Children today have to worry about fading batteries in their iPods and why mom won't pay for texting

overruns on their cell phones. And which government agency to call to swat her down when she doesn't.

In a lot of ways Hiroshima was the entry fee to the New Age.

It was a terrible price. It was a no-win decision for Truman, who--give the man his props--had the balls to make the agonizing call between the horrors of those milliseconds of atomic release, and the horrors of the war that would have continued. True to the vision of the founding fathers, the biggest decisions were made by a common man.

Whose inate humility should have remained an inspiration to us all.

Yes, not long from now, it will be Monday morning, August 6 in Hiroshima, Japan. Let's pause, and remember the time when men were men, life was hard, and values were easily grasped, and we shared them across the land. And let's bow our heads, and take a moment for prayer, or silence... but let's observe a moment of humility and homage to the souls that were lost to pave the way to the New Age.

Stupid idiots in this country never learn. This makes the Japanese
smarter than us because they did learn this lesson. The Japanese fought
a brutal war and understand what it would take to beat them. People
today think of war as a police action when the purpose of war is to
destroy or nearly destroy EVERYTHING in the fighting arena forcing
complete capitulation by the enemy. If you don't level the place you get
Iraq for example. I hope the American on Wednesday is not an idiot.

You understand that if the Japanese had a nuke they would have dropped
it on Pearl Harbor. They would not have needed to send a whole fleet
just one carrier, one plane, and one bomb. The Germans would have been
sending nukes on those V2 rockets they had at the time instead of
conventional warheads. The V2 would not have to be very accurate to
cause mass destruction in England.

Be sure to change your adult diapers and don't put your dentures in backwards when you celebrate the murder of hundreds of thousands of innocent civilians (mostly women and children). How American.

Did you get your government welfare check aka "social security" for August yet Mr. CONservative small government? Heavy emphasis on the CON as in CON artists.

How much have you cost the workers who are forced to support you to date? Have you joined the million dollar club yet? Between your monthly welfare payment and free (to you, not the taxpayers) "medicare" I'm guessing you have. Please tell!

I'm wondering if you might be able to hear 17870 beamed to Hawaii and 17825 to North America (at least according to EiBi) at 2100-2200? Not certain if they'll mention anything, but might be worth a listen.

I'll be listening for sure at 0000 to 6145 via The 'Stan.

Well for Rádio Nacional da Amazônia the Four Element
Flat 5-Wire TV Rotor Cable 25 Foot Long Horizontal Wire
Antenna is doing the better job of pulling in the signal.
While the End-Fed-Windom Antenna {Two End-to-End
"Linner" Horizontal Wires} barily picks-up any signal at all.

Were the bombs not dropped, Japan would not have capitulated and the war would have been prolonged by an obligatory land invasion, where estimates run as high as a million additional dead. The bombs ended the way and saved lives by a proportion of at least ten to one.

I distinctly remember a digital Superadio Plus. It sold for a very short
time around 1983 or 84? It clearly said "Superadio Plus" on the front panel.

Again, if you open up the average portable, or most cheap home stereos, you
will find only two sections to the FM tuner:

1) Local oscillator
2) Antenna tuning

Same for the AM section.

I have seen very very VERY few portables with an RF amp section for FM. Less
rare were ones with an RF amp for AM, such as the Channel Master 8
transistor sets.

Nope, was referring to both FM and AM sections.

Shoot... a lot of current generation boom boxes and such not only don't have an RF amp in the front end (well.. they sort of do.. more to come), they don't even have an IF. All they are is a very high gain amplifier with a detector. To make an AM radio, they connect an antenna, single section variable capacitor, a power source, and a small audio amp. The whole receiver section is in a three lead package (TO-92?)

As I said, I have the GE 7-2882A sitting right here in front of me, and that is the model previously claimed to be the "Superadio Plus". There is no "Superadio Plus" nametag anywhere on it. The front reads "GENERAL ELECTRIC electronic tuning FM-AM RECEIVER"

The reason I ask is that I have heard this radio called a "Superadio" in the past in other threads and several places on the internet, but no one has ever provided a picture of this radio's nameplate or any box or literature supporting the claim. Thus I have to question whether it was marketed as such, or if the name was just attributed to it later by Superadio fans. I also have the cassette recorder version of this radio, and with it came a little flyer describing the new "electronic tuning FM-AM receivers", with no "superadio" mention.

Sorry Brenda Ann, I guess I need to see some proof, not someone's 20+ year old memories to convince me.

Maybe RHF can photograph his radio and share the picture with us if his has the name somewhere on it.

Yeah you. I am posting this morsel of truth to establish a dated public record of it.

I have it on deep background from an unimpeachable source inside the power establishment that it has now been officially agreed upon by the elite globalist consortium that Hillary Clinton will serve as their puppet in the role of President of the United States of America until the year 2016. Additionally, they have agreed upon Bill Richardson to serve as her (their) Vice President until 2012 at which time they will decide if they want him to serve in the second term of the Clinton administration.

And what about beyond I asked? Odds on favorite to succeed Hillary in 2016 is Jeb Bush to extend the Clinton/Bush puppeteer show to 2024 which will mark 44 years of faithful service inside the White House for the Bush/Clinton crime families. And who says the globalist elite aren't loyal!

I know that you American lemmings that still believe the lie that you have a say in matters because America is a "democracy" or "constitutional republic", is "a free country", blah blah blah and all the other bullshit slogans you cull from your 7th grade civics text books (your reading level) so I hope this news doesn't disturb you too much. You'll get over it just as you do everything else since you have the attention span of a 5 year old.

Now run along and stuff your fat glutenous faces some more and plop your disgusting self down in front of the television for your nightly lobotomy.

Here you go... the original price, timeframe and model number are discussed. Pretty much supports Brenda's recollections. They also have some info on the frontends of the other models on the website.

Yes Pete, I have been there many times before, but no one has provided any pictures, box art, or advertising to indicate it was indeed marketed as such. Others are claiming the name is right on the radio itself. Mine is sitting right in front of me, it has no Superadio nameplate. I only want confirmation I can verify, not to start a battle.

Initial news seemed to contain hand-wringing, whining, and as usual, failure to take responsibility.

And later programming also seems to try to deflect responsibility for their actions, and to place blame elsewhere.

All talk now is of PEACE! Where was their PEACE on December 7, 1941?

Typical of the Japs. And then some cockbite American comes on, talking about how many Japanese lives were affected? Give me a break! How many American lives were affected by the slant eyed shit throughout the entire war?

In my 41 or 42 years of SWL'ing, nothing has changed.

More shit from Japan.

JM,

You are Right a the GE Model 7-2882_; the so called
"Digital" GE Superadio -or- GE Superadio Plus; does
not have the "Superadio" name on the Radio.

-But- It does have a few of the Superadio features like
the 200mm Ferrite Antenna and the 5-Inch Speaker.
- - - The Look of a GE Superadio ! ? ! ?

However - What Defines a GE Superadio is the RF
and IF Circuitry that is 'internal' to the Radio and
whether the GE Model 7-2882_ has it or not is . . .
To-Be-Determined [.]

? Question ? Does anyone 'know' for sure -if- the
GE Model 7-2882_ has the same 'internal' RF and
IF Circuitry as the GE Superadios I and II ? ? ?

KVOO out of Tulsa,Oklahoma plays that Western Ranch music (or they used to anyway) that I like so much.Then, KVOO went from AM to FM broadcasting.Almost any of my old AM radios would pick up KVOO at night time only.My G.E.''Superadio'' wouldn't pick up KVOO any better than my other AM radios.One of the reasons I bought a C.Crane Sangean AM FM Weather two tv channels radio (as most of y'all know, I sent that radio back to C.Crane, a week later) about eight or nine years ago was because of Art Bell and George Noory and Popular Science magazine lieing about how good those C.Crane radios are.I even bought a Sangean ATS 909 (I think that was/is the model of that radio) from C.Crane about eight or nine years ago, I sent that over rated piece of junk back to C.Crane too) The only way to know if a radio is any good or not is to buy it and try it out.Of course, almost all of the over three hundred old radios I own, I bought them at thrift stores and junk shops and fleamarkets many years ago.

That's pretty stupid, and I'm sorry that I have to say it. Still, one does not enter evidence into a court with a statement that "I know where it is".

Please corroborate your statements in the future, wherever/whenever or you'll have credibility trouble in a lot of places.

Sounds like you've got either mixing in your radio, or two signals from different areas arriving at your QTH at the same instant. The latter has been known to happen, although not that often. Usually one signal will dominate. If they're at the same signal strength, then you just have lucky propagation. I seem to remember that when the Beeb used 9525 for their Central American service a few years ago (before it was canned) that during the dead air I would hear Middle Eastern music very faintly in the background. As I remember, there was no Passport entry that matched, and I never did figure out who it was.

The Russian talking is probably a Russian domestic station like a Rossii outlet. I don't think VOR uses 9525. There are a couple dozen privately owned Russian domestics using/leasing old Soviet transmitters. Russia is so big and its population so fragmented that shortwave is a necessity. Schedules often shift, with the only notice being given on the air. If you don't happen to be listening AND speak Russian, you're out of luck.

I handed off one of my old SW radios to some Russian immigrant neighbors years ago. They loved to listen to Russian domestic radio. It was a little taste of home in a strange land. They loved it so much that they asked to buy my Yaesu FRG-8800 at one point, because the radio I'd given them didn't have too much pull (a DX440). I declined. They responded by rigging a longwire to the 440's external jack.

The Koreans have largely forgotten the sacrifices made during their war too. The South is much like us-a materialistic society where kids are mostly concerned about their personal comfort than about any sacrifices made to get them there. The North is too busy trying to survive to worry about the war. The South treats the North as a theme park. Sacrifice isn't real to Southern Koreans. Seoul has been described as an Asian version of LA in 1965.

Japan had mostly forgotten too. Until the economy that they'd pushed so hard to beat the US collapsed. Suddenly, the "all middle class society" started seeing economic winners and losers, and the losers living in bullet train stations. When Japan was the TV Manufacturer To The World, they could afford to whine uselessly about the war. Whining about World War 2 was a national pastime in Japan, and still is to an extent. Since the wreckage had mostly been cleared and new buildings built, there weren't reminders everywhere, unlike Germany where you can visit the huge mountains of rubble that were once German cities before the war.

Germany also has a few ovens that have been preserved, such as at Dachau. My grandmother, who is now dead, visited Germany around 1992 and by chance learned that Dachau had been partially preserved. She had to bribe a cabbie to take her out there, paying him something like double the official fare. Then she had to talk the caretakers into letting her look around. The Germans are rather embarrassed about their past, unlike the Japanese who have the luxury of denial. The Japanese would rather whine about the war than take responsibility,

which is easy when you don't have piles of rubble, indestructible Nazi bunkers, and huge crematoriums staring at you all the time.

I doubt that the Japanese had the ability to bring the war to the US in any meaningful way by 1945. There probably would have been planes flown into San Francisco and Sacramento, and more of those "balloon bombs" that landed in the Oregon forest, but America would have gotten off easy, especially compared to Japan. It's possible that the Japanese would have committed self-genocide rather than admit defeat.

I once talked to a former colonel in the Army who told me that she'd seen still-classified reports that the Japanese leadership was planning an uber-suicide of the entire population rather than admit defeat at the hands of the Americans. Reportedly, small arms were being distributed, with orders that the people shoot at the Americans until the numbers were no longer in the people's favor, then to turn the guns on themselves. If that sounds a lot like Seung Hui Cho's rampage at Virginia Tech-shoot until you're cornered, then blow your brains out-that's because it does.

That just points up how desperate the Japanese were to never surrender, to die en masse first. MacArthur guessed that a million American soldiers would die in the invasion of Japan. The true number would probably be 5 million at least. KIA to that point was only 450,000 in both wars to that point. The question then becomes, what do we do after losing 5 million guys, the entire population of Japan, and gaining the hatred of most of Asia for it? America would have likely been exhausted, and turned inward like we did after World War 1. Communism would have gained control of huge chunks of Europe and Asia, while America eventually stagnated. We would have had to fight the commies eventually, except on their terms, and from a position of weakness.

We won the Cold War because we were able to define the war and force the Soviets to go along. The Soviets were so terrified of what we MIGHT do to their effort that they tore their society apart trying to compete. Now imagine that the shoe is on the other foot, and that the Soviets are in the driver's seat, with all of Europe, Asia, and South America behind them, and America is being dragged kicking and screaming into the Workers' Age. We don't want another catastrophic war, so we basically go along and dismantle the Constitution as per Soviet demands. States become Socialist Republics, and the central US government a Soviet puppet.

Then, around 2010, the communist order sags too far, and crumples. Only there isn't a George Soros to ride to the rescue and tell the headless beast what to do. So the beast shatters, and an Afghanistan is the result. Eventually, Christian fundamentalists gain control of much of the old United States, and institute various versions of Biblical law, depending on your preacher. By now, buildings are collapsing from 70+ years of neglect and civil war. Cars are unknown-the cracked roads built by FDR are plied by horse drawn wagon. People

start living in scrapwood shacks, like in Orwell's London. The world goes back to feudalism and medieval living.

The site of my house is a filthy, shallow lake like it was during the Gold Rush. In fact, there is little settlement within 20 miles of the river, because of flooding. Southern California and Nevada becomes Indian land once again, with Paiute burials at the mound in Las Vegas resuming. Basically, the invasion of Japan would have eventually resulted not in a dramatic war to end all wars, but in a slow winking out of the light of civilization over several decades.

What makes them radios so ''super''? Is it the antenna? Slap an over

About five or six something years ago, someone at www.lucianne.com
said the new Japanese school books are teaching that it was America's
fault we got into War with Japan in World War Two.
There were some American Prisoners of War in Japan who got killed when
America Zapped Hiroshima and Nagasaki with Little Boy and Fat Man.

One time Hyman Rickover was standing on a dock when a Nuke Submarine was
docking.Rickover asked the Submarine Captain where they were going
next.The Captain didn't tell Rickover.It wasen't long untill the Captain
wound up with a land lubber desk job.

- I liked his fan dipole setup.
- Nice looking home brew with clean, simple design.
-
- Richards

Richards,

Yes the M0WYM "QRP Fan Dipole" Antenna mounted in the Loft {Attic}
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/14132

http://www.radiowymsey.org/FanDipole/fandiploe.htm

Strung-Out across the Rafters is an 'interesting' design :
One that could not be easily done In-the-Air.

IF - it works for QRP then it should do very well for
Shortwave Listening (SWL)

This "QRP Fan Dipole" Antenna is 'cut' for the Ham Bands
http://www.radiowymsey.org/FanDipole/FanDipole.gif
40m - 20m - 17m - 15m - 10m

For a Shortwave Listener (SWL) this Fan Dipole in an Attic
would depend on your Attic Size and Bands of Interest :
http://en.wikipedia.org/wiki/Shortwave_radio
* 41m ~ 7100 kHz ~ 65.9 Feet
* 31m ~ 9400 kHz ~ 49.8 Feet
* 25m ~ 11600 kHz ~ 40.3 Feet
* 19m ~ 15100 kHz ~ 31.0 Feet
* 16m ~ 17480 kHz ~ 26.8 Feet
* 13m ~ 21450 kHz ~ 21.8 Feet

The "Spacing" between the individual Dipole Elements about
6-Inches; but 3-4 Inches will do if there is limited space.

Instead of the 1:1 Balun used for the QRP Fan-Dipole Antenna the
Shortwave Listener could use a common TV type 4:1 Matching
Transformer {300 Ohms to 75 Ohms} and RG6 Coax Cable for a

feed-in-line.

I have a CC radio...It's pretty good, but I wouldn't pay $150.00 for one
(I paid $20.00 for mine). Like the superradio, It exploits the rather
poor sensitivity of most tabletop radios of today by adding an RF stage.
If I were a consumer shopping for a sensitive radio, I'd buy one of the
many shortwave portables on the market in the same price range. They
have just about everything the C Crane radio has and shortwave to boot.

I also have the GE superradios I, II and III. my superradio III is
sensitive but is just about inferior in every other way to the other two
earlier sets. The superradio II is the best of the three for AM DX. I
also have the radio shack version-it appears to be a superradio III with
sloppy attention to proper alignment at the factory.

They exist, and they suck. Look at a low-end boombox and you will find
no RF stage for either AM or FM.

I was sad the first time around, I thought he was a friend. We had emailed
from time to time and he had sent me so information I asked about setting up
my scanner and stuff.
I had a hard time believing it then but I guess it was so.

Why/how did he get out after all that???

If this is so, then the manufacturer must assume the product will only be
used in areas of high signal strength.

That goes without saying, as AM radios have generally lacked an RF stage for nigh-on to 70 years. It just isn't needed for most local reception.

I'm in a bad position to argue this point, because I rarely (ie, at this point in my life, never) service radios. But what you're saying goes completely against my experience -- and the service manuals for equipment I own.

The 40-year-old Sony FM/AM radios I own (TFM 825 / 850, EFM 117, & others) have RF stages for FM, and none for AM. The schematic for the GE P975A (which I don't own) shows an RF stage for the FM section, none for the AM. Ditto for all the GE clock-radios I've owned.

I went through the Sams TSM-47 transistor-radio book (dated 12/1964), which I purchased to get additional data on the Sony EFM-117 I hoped to restore. Of the 28 models covered, only two AM radios (Ross RE-1902 & Truetone DC3429B) had an RF stage, and _no_ FM radio lacked one.

The RF stage in an FM tuner * performs a number of functions, one of the most-important being to bring up the RF signal to a level where it can override the noise generated in the conversion process. Has the conversion process, and the transistors used to perform it, improved so much that the RF stage can be discarded? I don't know, but I doubt it.

Another function is gain. The lost gain has to be made up somewhere, presumably with another IF stage, which requires parts and has to be aligned, just as an RF stage. The net savings aren't going to amount to much.

An FM tuner without an RF stage would be hopelessly insensitive, to the point where few consumers would find it acceptable ("This-here goddamn radio don't pick up no stations").

I don't like gainsaying someone who regularly services electronic equipment (and who usually knows what they're talking about). But I just don't buy

this. (I read Scott Harvey's comments before posting this, and I still find it hard to believe.) Throughout the history of FM radios, an RF stage has been the normal state of affairs.

* By "tuner", I mean the electronics preceding the audio stages. All radios have tuners.

DX Ace - TYVM ~ RHF

Tried to catch it again an could hear hear one or the other again.

For the last Three Plus Hours (8:45~1215) - I have been
Listening to 5920 kHz in a Slavic Language {Russian ? }

Top of the Hour Interval Marker sounds like
a Morse Code * * * _ "V" or * * * *_ "4"

A Program na Radio Na____Civ_______

Now playing Dave Brubeck - "Take Five" @ 12~ UTC

Now an American Song "Your Love" sung in English
followed by "The Man I Love" instrumental 12:15

Now a Swing Music instrumental at 12:23

? Russian Internal Shortwave Broadcast ?

? Bulgaria ?

S-Meter : S3~S9 with Fair Audio
and some deep fades to Poor ~ RHF

That's pretty much the case, as radio stations are no longer protected, nor
do they give a damn about listeners, outside the city grade contour.

My guess is that it's Radio Rossii on 5920. Check 7320 and/or 5935 to see if
they are in parallel.

5920 is blocked here by apparent WBOH.

But I have to agree with William on this. I can't remember an FM set that
didn't have an RF amp. Even the cheap tube German sets, known for their
"gutless wonder" circuitry all used 1/2 of an ECC85 for RF amplification on
FM. Transistor sets too. I worked for Sony in the 70's and every FM set had
an RF amp. Granted, most weren't tuned RF stages, but still there was an
amplification stage ahead of the oscillator/mixer.

Beitman's 1950, pp. 10
Beitman's 1950, pp. 14
Beitman's 1950, pp. 40
Beitman's 1967-69 pp. 42 (note the antenna input going directly into the
base of the mixer transistor)
Lots more where those came from.

To be fair, a lot of the early SS stuff did have an RF stage, but beginning
sometime in the late 60's, it was almost universally dropped, again, accept
for better car radios and home stereo tuners/receivers. I have an early
Sony FM stereo portable with no RF stage in it. It does OK for what it is,
but almost deaf as a post outside a strong signal area.

DX Ace,

Yes 7320 kHz is a parallel broadcast of the current
Music Program at S9+ with Fair Audio on the Four
Element Flat 5-Wire TV Rotor Cable 25 Foot Long
Horizontal Wire Antenna -while- the End-Fed
Windom Antenna {Two End-to-End "Linner"

Horizontal Wires} is at S9 with barily any Audio at all.

5935 kHz is S9 on both Antennas with NO Audio.

Back to 5920 kHz and the End-Fed Windom Antenna
{Two End-to-End "Linner" Horizontal Wires} is down
to S3~S6 with Good Audio -vice- S9 with Poor Audio
on the Four Element Flat 5-Wire TV Rotor Cable
25 Foot Long Horizontal Wire Antenna

dx ace - thank you once again for the help

You are missing the point. I don't mind someone responding from outside of the chain, indeed if the response makes some sense or has some tie into either the original posters message or mine then I would certainly encourage it. Maybe Burr or you can explain how his response tied in - I sure can't see it. And that was what I was commenting on.

And let us not forget that the Germans and to a lesser extent the Japanese had some semblance of a program to develop nuclear weapons and that until early 1945 we were fighting two wars on separate sides of the world. The Germans wisely gave in after we slowly ground them down. The Japanese unwisely chose to not give in after we also ground them down. We could not be fighting a land war with the Japanese into the late 1940's while also having to contend with the Soviets. I can understand the public sentiment to not want to lose another U.S. soldier after we had lost so many already in two wars we did not start. For several reasons we had to stop the war quickly and not dillydally around with hopes the japanese might someday come to their senses and give in.

I had asked for pictures here and in other forums in the past, but to date haven't
seen any. I have the radio here, and contrary to other claims, there is no
indication on it that it is a "Superadio".

They do seem to avoid certain realities. I was speaking with an American rep from Fuji film two years ago, who mentioned that that extra kick of blue in Fuji film, as well as the phosphors on Mitsubishi television sets is there to keep native Japanese from looking so yellow on camera.

And apparently they're so dishonored by their defeat that Mitsubishi do not acknowledge, and have done everything possible to destroy documentation for, the Zero.

They haven't forgotten the war. In a release meant only to be seen by the eyes of Japanese captains of industry, the economic minister, in the 70's, set out a plan whereby Japanese industry would overtake the US and work to bankrupt, and humble the arrogant Americans in an economic war that they (meaning we, the US) could not win.

For awhile it seemed that they would succeed. Paybacks, however, being a bitch, saw otherwise.

That mindset, though, is still in play today, in the form of the auto war between Toyota and General Motors....ironically, a microcosm of the rivalry between Japan and the US....where if they'd join us as allies, the potential for mutual benefit is dramatic. The alliance between Toyota and GM in the 80's and 90's produced two of Toyota's most successful models. It also produced profits that enabled Toyota to come after GM today. And again, ironically, doing so by playing absent the rules by which US manufacturers have to play.

You know, we rebuilt them after the war. W. Edwards Deming's (an American) theories permitted their industry to return to strength in less than 20 years, our own welcome mat generosity allowed them to establish a base of operations in this country that has made Japan a global economic power.

You'd think somewhere there might be a 'thank you.'

But noooOOOOOOoooo.

Right after World War Two ended, America did help Japan (Europe too) rebuild, new factories and other things.America sent machinery to Germany and other Countries in Europe (Japan too, I have an old Popular Mechanics or Popular Science magazine here which has an article several pages long about that machinery) which was used for grinding up that old rubble and mixing it in with new concrete.

About four years ago, Nissan built a new factory between Jackson and Canton, Mississippi at the I-55 Gluckstadt Exit, about fifteen or twenty miles North of doggy's couch.Nissan, Japan wanted to fly their rice flag over that factory, to be Sure!,,, that rice flag got Voted down! by us Mississippians!) Right now, Toyota is building a new factory near Tupelo, Elvis the Pelvis's old home town.

Two classic examples that are common as dirt in the 'old radio' world
are the RCA 68R* series and the Philco 49-905. They are everywhere
so they must have sold millions. Granted they have an additional IF
stage on FM but they are really poor performers.
Philco apparently rethought it with the 50-925 the following year
(same case, etc) and its a pretty good radio.

I live 40-50 miles out from most any FM stations and the difference in
having an RF amp or not means hearing something ...or not...without an
outdoor antenna.

For a while, I had a Sony stereo receiver from about 1971, and
it had no RF stage, which did make it stand out at the time it
was made (I have a Popular Electronics review of the unit, which
says as much). It was lacking in sensitivity, but it was the best
FM receiver I had up to that point (late eighties).

The trick was that the average FM radio is overly sensitive. It
has more than is needed, and does nothing to compensate for that.
Hence they tend to overload where there are strong signals, so you
never get to receive the non-local signals that would require the
extra sensitivity.

Henry Kloss made this point in one interview I read. He said too
many FM receivers were designed for non-urban use, while much of
the time they were used close to strong signals.

That Sony, because it didn't overload, was actually better at
receiving distant stations because if they were receivable, they
weren't covered over with overload from local stations.

It wsa the first FM receiver I had that I could actually DX with.

I found a boombox a few years ago, and was unable to receive the
"local" NPR station (ie down in Vermont), while the station
otherwise is reliable in reception here. I thought it needed a

better antenna, but in fiddling with it, I noticed putting my hand on the whip improved reception of the non-local station. I removed the whip, and that station came in fine. Clearly the boombox was overloading on the local stations, and the otherwise strong enough NPR station was not getting past that overload. Reduce the strength of the local signals by removing the whip, and there was no overload, yet sensitivity was still good enough for the relatively strong non-local NPR station to get through.

It's easier to design a sensitive receiver (which looks good in the specs, if specs were discussed much anymore) than it is to design a receiver that has good overload resistance. Car radios tend to have it, since they can't count on local stations yet since they aren't in a fixed situation they may get very close to stations. And of course you can pay for something quite fancy that will have both good sensitivity and good overload resistance.

Japanese products used to be Japanese Junk, now it is Chinese Junk, and I don't mean those Chinese Junks (boats) either.
I have a little old windup toy mule.Wind it up and it walks forward.I can see enough through a slit (where the two halves of the toy are held together with a few tabs) under the bottom of the toy that one half (side) of the toy was made from an old American Papst Blue Ribbon beer can, I can't get enough of an angle view to see what the other side (beer can or whatever) is made from.I assume both sides of the toy was made from American beer cans leftover from World War Two.

The extended AM band coverage, the membrane keyboard and styling make me me think it was 1990's vintage and not 1970's. Electrola is clearly a borrowed name made to conjure up ole-timey images. With a Made in USA label less a city, state and zip code It looks like something made to sell at Sharper Image.

More information than anyone ever wanted on an overpriced ($300.00 new) radio.

Indeed from the web here is a little history on the American Electrola...

"A group of people at a small electronic company in Pittsburgh, PA had heard an SW Broadcast of For the People with Chuck Harder out of Florida. One of Chuck's listeners had purchased an AF/FM/SW radio from him and was complaining that while Chuck was touting 'buy American' he was selling a Chinese made radio. So these guys called Chuck up and said 'we can build a radio for you and have you sell them on your show'. So the American Electrola DXC-100 was born. Designing was started. A prototype was build and the flew to Florida to meet with Chuck. Chuck liked the radio. A new problem arose, CASH. The Pittsburgh guys didn't have enought to get the radio into production. Chuck went on the air and asked his listeners to buy the radio, send in thier money, and the radio would be delivered, but they may have to wait up to 6 months. Chuck Harder's listeners financed the 1st production run of 1000 radios. Actually, the 1st 1000 were sold in 1 day! Money came in, parts were ordered, radios were shipped. A few months later, they tried again. Another 1000 radios were presold in about 5 days. Again, parts were ordered, radios were built, and

shipped. The serial number will tell you the production run. All serial numbers started with 52B, the next 2 leters are the production number OA = 1st run, OB = 2nd. The last 4 digits are the order of production. "

The Made in USA label would seem to be a stretch but assembled in USA might have been more appropriate for 1993.

Are there any South Pacific MW/AM
Hunters here?

I am wondering if anyone can help.
Due to a shortage of FM space I want to put a 2kw AM on air in Sydney
Australia
called 2 Double V. The selected frequency
must not interfere with local stations in aus or nz. Nightime
switching at sunset is ok
Can any member suggest a frequency?
Is there such beast. ?

I guess you'd best first check with your local regulatory officials to see if
there is a frequency available.

Hmm. An FM/AM IC that might be found in a boombox is Sony's CXA1238, and
even that includes an RF preamp for FM in common-base configuration and
allows connecting a bandpass (or rather bandstop) between RF amp and
mixer.

As far as the poor overload rejection is concerned, this has to do with
weak mixers inside ICs and insufficient RF filtering. A typical config
for a low-end FM receiver would look like this (tuning via varicap
diodes or tuning caps with plastic dielectric):

fixed bandpass for all of FM -> RF amp -> 1 tuned tank circuit -> mixer
^
. |
LO
It typically takes a frontend chip with a balanced mixer like the
venerable TA7358P/LA1185 to achieve good results in such a config
(actually the datasheet suggests this and it's commonly used that way).
The most fancy configuration I've seen with this chip is the 4-gang one
found in the Redsun RP2000/2100 and its rebadges:

1 tuned tank circuit -> RF amp -> 2 tuned tank circuits -> mixer
^
. |
LO
Unsurprisingly, its FM frontend is reported to be just about bulletproof
for a portable.

FM frontends in dedicated tuners historically had up to 7 or so tuning gangs, but with later advances in mixers in particular, there are some models with seemingly modest 4-gang frontends but not so modest sensitivity and overload handling; many 5-gang tuners in the later 1980s actually used the additional gang for a tuned LO buffer.

They only share the same office for overseas business, but the
headquarters are located in different towns:
http://www.tecsun.com.cn/english/index.htm
So I insist that these are two separate companies. I vaguely remember
something about Degen having been founded by former Tecsun folks,
however. Degen's production techniques and products seem to be quite a
bit less oldschool than Tecsun's (which seem to involve a lot of things
getting done by hand).

Since July 29 I think the overseas service (Reshet Heh) has been relaying Reka. (immigrant service http://reka.iba.org.il) I know the 25 minute English program at 22000 GMT+2/+3 has disappeared.

The IBA cut way back on foreign (other than Hebrew and Arabic) languages. Also, the English service ain't getting the studio and production facilities it had so there ain't going to be a lot of programming other than news bulletins.

Just now, I tried listening to Windows Media

mms://66.28.252.69/today/kolisrael_english_2000.asf from WRN

and I got a Russian program ID'ed as coming from Reka.

I heard about this device this morning on WLS. Sounds very interesting. Somehow a very bright LED flashlight, that changes colours and has a variable frequency can render one disoriented and sick.

Kinda reminds me of strobe lights, which can trigger seizures.

Probably some bad Metamucil. "Vintage" is not a word I'd apply to
this rig. Late 70's, early 80's at best. And not a performer.

IIRC, there were a couple of manufacturers that sprang up to produce
a 'high tech' AM-FM-SW table radios about that time. "Digital" was just
on the cusp of becoming a buzz word, and there was a bit of noise about
ease of tuning, direct frequency entry and all that.

But no one put anything into performance.

I've been toying with my Telefunken HR5000 Digital, AM-FM-SW receiver. Flourescent display, and I've replaced many of the indicator lamps with LED's.

FM is great. AM and SW way too bandwidth limited for much listening enjoyment. But it's tight enough that I don't get a lot of IBOC hash when zeroed in.

SW is also very heavily bandwidth limited, but sensitive enough to suck in some reasonably deep DX, and selectivity is such that I can actually work a heavily crowded band with less difficulty than some of my Halli's, though not quite as tidily as the Drake, AOR or Ten-Tec.

But FM, into a pair of Altec 846B's will rock the house. Not every thing that came from that early era of "digital" receivers sucks.

Yep, basically all that is left of Israel Radio International (Reshet Hey) programming is 1.5 hours
of Persian. Besides that, shortwave is relaying parts of the domestic REKA schedule.

As of yet, there is not updated schedule on www.iba.org.il/reception or israelradio.org

On reka.iba.org.il , the margin has much of the domestic schedule, but not all.

Years ago we bought the Father-in law a Sears Silvertone AM Only Tube Radio with a Tuned RFStage. The All Americn 5 AC/DC sets won't hack it.

Old Dad had to receive his baseball games - night or day, throughout the basball season. Even when his team(s) came on TV, he shut off the TV sound and listened to the AM announcers --- he was so used to them.

Bottom line -- look for a 1960's Sears Silvertone with a tuned RF stage or other brand with the tuned RF stage.

In the winter months, at night, the Silvertone would pick up AM stations from all over the USA and of course the big Mexican blasters of the 60's as well.

We did add an outdoor random wire antenna (with a lightning arrestor) and a good ground.

And as you probably know -- auto (car) radios mostly had tuned RF stages and at night in the winter, again the big clear channel stations all across country would come rolling in -- and lots of small stations as well -- many piled up on each other.

Also a gadget that works well was developed in Alaska - to receive the 48 states. See URL:
http://www.ccrane.com/antennas/am-antennas/select-a-tenna-regular-model.aspx

Several Models Available

Good Luck with AM DXing - my Radio Shack DX-398 and GE super radio with the Select-A-Tenna do very well.

PS the remains of the Clear Channel AM stations are at URL:

It is not that the radios are too sensitive, they just have poor dynamic
range or a poor ability to handle strong signals.

Reducing the antenna reduces the signal, it does not change any
characteristic of the electronics. Again, this radio is poorly designed in
that it cannot handle large signals.

About 20 years ago we had an intern who was deaf.

She carried a "screamer" that was supposed to incapacitate attackers
with
sound. I didn't put much stock in it, until the Wednesday morning she
was
attacked by a group of 4 young men in our parking lot. Just before
8:00AM
I was assaulted by the loudest, most obnoxious noise I had ever heard.
And I was inside a building that was pretty sound proof. I strolled
toward the
sound and when I opened the outside door I nearly fell to my knees. It
was nasty.
She just walked up and turned it off and apologized and thought
nothing of it.

Now that device wouldn't have done me a bit of good because I would
have
been down with the attackers.

Back during the disco craze I made some nice side money building
strobes
that cost me ~20$ for several hundred. Several discotheques had
trouble

with people seizing when the strobes where synched with music. Every pounding bas note triggered the strobes.

Given some of the fire/police etc now run LED strobes that are painful to look
at in bright light, I can see how one might ruin someones day. I wonder if dark
sunglasses would help.

Flash and bang hostage rescue granades are less then effective if the bad guys have
such shades on.

MB,

1 - I clearly identifed the Item.
* Vintage "American Electrola" AM/FM/ Shortwave Radio
Model # DXC-100
* Why "FYI" cause the eBay Auction is Over/Ended/Closed .
* AM/MW Band went ot 1710 kHz ? = Vintage ?
* Make In The U.S.A. ? = Real Vintage !

2 - I provided a Link with supporting Photos
* http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&rd=1&item=260145258922
* There are three nice Pictures of Radio
* including the Label to check-out.

3 - Then I 'Asked' the "Question.

? Anyone ever own one of these DXC-100s ?

MB - Oh That's Right - You Are A Mind Reader

I believe that I 25 is part of the Pan American Highway (the closest thing there is to the "North American Union Superhighway"). I believe it ends somewhere about a third of the way short of the Canadian border, so I don't know what other routes are used from there. The only multilane highway that connects central Mexico (where most of the population is) to the US is Autopista 15, running along the Sinaloa coast (through such places as Puerto Vallarta and Mazatlan) to Nogales, near Yuma. Other Mexican roads are in the area of northern Mexico, but all become narrow two lane roads at some point. There is virtually no land road connection between Baja California and mainland Mexico, except for one narrow road-ferries are used. A single two lane road runs from Vancouver, Canada to Alaska, and it makes several twists and turns and number changes along the way. There are no roads into the vast heart of Canada, which is mainly peopled by native tribes. Most of the population lives within a few hundred miles of the US border.

Paved roads are relatively new-100 years ago even America had mainly rutted wagon paths and steer herding trails as "roads". FDR built a network of two lane roads, but it took Eisenhower to build the interstates-and HE had been inspired by the autobahns of Nazi Germany. Hitler built a partial network of roads, only to have them destroyed in the war. The US took the lead in developing European roads. Outside of the US and Europe, roads are extremely primitive to nonexistent. 120 years after the invention of the automobile, most places in the world don't have roads. Railroads are more common, but even then many lines have been abandoned in civil wars or simply neglected until they fell apart like in North Korea.

A superhighway from Guatemala to Prudhoe Bay is a fantasy, and will largely remain so even under the proposed "North American Union". The US is disinclined to make the sort of public works investments that would be necessary to build such a road, much less maintain it. Eisenhower quieted critics who said that we couldn't afford the interstates by pushing maintenance of the system off onto the states, who have failed. Bridges are collapsing. Interstate 80 through the Sierra Nevada actually has ruts in it from 40 years of snow chain wearing tires in winter. People are increasingly unwilling to drive from CA to Reno to gamble because the road is so bad. The system is falling apart, and with a new Great Depression on the horizon, it will be allowed to deteriorate further until it is largely unusable. Then

we'll probably see a return to the rails.

Tecsun is largely an operation of the Communist Party. It's hard to get more oldschool than that. I imagine that Tecsun is operated similar to the collective farms, where the CCP tries to overcome lack of technology through brute force, such as armies of peasants knee deep in rice paddies tending the crops. There is little incentive to change the system because it keeps the people from rebelling by keeping them occupied.

The functionaries probably tolerate Degen because Degen can cut through the red tape better than they can because it keeps the Party at arm's length. There's probably a certain amount of admiration on the part of the hacks. Any other company finds itself largely shut out, at least when it comes to shortwave radios, because China considers shortwave to be vital to keeping the peasants in line. Most Chinese peasants cannot afford satellite TV, and FM coverage is out of the question for much of the country, so shortwave is it.

Sangean has largely died on the vine, and Sony has moved on to greener pastures. Other Chinese radio makers exist, but shortwave is a no go area for them, because of its strategic importance to the Party. Even though Degen is tolerated, it has fewer resources than Tecsun, and is largely unknown outside China except among SW aficionados.

SW may seem hugely unimportant to Americans, but to the Chinese Communists it's everything, thus they control it. Tecsun dominates the US shortwave market, even though few Americans notice. The Party sees increasing shortwave listeners in America as a good way to convert people to its point of view. CRI blankets America with quality signals, and Tecsun's Eton line of radios is easy to find. Eton advertises heavily in Passport, likely keeping it alive. Mao may have been mad, but he always had a method behind it.

>From what I've heard, the Israeli government has serious budget problems, mainly because they never recovered from the dot.com bust, and tourists have been largely scared away by the wars. I'm sure that Tel Aviv is relatively safe (I know some Israeli is gonna respond and say so) but that's not what the average American hears. The big draws are the holy sites, and many of those are in Palestinian territory, cut off from the world.

In the late 90s the Palestinians built several big hotels in East Jerusalem to cater to Americans, only to see their investment fail when the Israelis closed the border and kept it closed. The Waqf (the keepers of al-Haram al-Sharif, aka the Temple Mount) are so paranoid now that ANYBODY poking around is gonna raise suspicion, even if they're clearly American. Evangelical Christian groups have to be satisfied with standing outside the gates now. Americans largely don't want to go anywhere near the holy sites now anyway, unless they get prodded by some preacher. They'd rather visit the great cathedrals of Europe.

All this fun and games has cut off a big source of revenue for the Israelis. That, the lack of business investment by Americans who envision their money going up in smoke, and the general political chaos has sunk Israel's budget. Warren Buffett tried to buy an Israeli factory, only to have a war (with Hizbullah) break out a week after his tour, after which Buffett told the Israelis he wasn't interested. The only thing keeping them around is the American taxpayer and a handful of superwealthy American Jews. The US doesn't want another Holocaust, because it would get blamed even though the world wants us to abandon Israel. Also, Israel is the only thing holding the Muslims at bay. So the US sends Israel billions.

Schoolyard Killings Shock Newark, New Jersey
Schoolyard_Killings

Posted: Aug. 6 9:32 p.m.

NEWARK, N.J. - In a city where gun violence has become an all too common part of daily life, these shootings were enough to chill even the most hardened residents: Four young friends shot execution-style in a schoolyard just days before they were to head to college.

Three were killed after being forced to kneel against a wall and then shot in the head at close range Saturday night, police said. A girl was found slumped near some bleachers 30 feet away, a gunshot wound to the head but still alive.

The four Newark residents were to attend Delaware State University this fall. No arrests had been made by Monday and authorities had not identified suspects.

The shootings ratcheted up anger in New Jersey's largest city, where the murder rate has risen 50 percent since 1998. The high number of killings have prompted billboards in the downtown area that scream, "HELP WANTED: Stop the Killings in Newark Now!"

"Anyone who has children in the city is in panic mode," said Donna Jackson, president of Take Back Our Streets, a community-based organization. "It takes something like this for people to open up their eyes and understand that not every person killed in Newark is a drug dealer."

The killings bring Newark's murder total for the year to 60, and put pressure on Mayor Cory A. Booker, who campaigned last year on a promise of reducing crime.

Jackson said Booker "doesn't deserve another day, another second, while our children are at stake."

Booker said Monday that it was "not a time to play politics and divide our city." A $50,000 reward was being offered for information leading to the arrest of those involved, he said.

A month ago, Booker and Police Director Garry McCarthy announced that crime in the city had fallen by 20 percent in the first six months of 2007 compared to a year ago. Yet despite decreases in the number of rapes, aggravated assaults and robberies, the murders have continued.

Natasha Aeriel, 19, was listed in fair condition at Newark's University Hospital. Police identified her slain companions as her brother, Terrance Aeriel, 18, Iofemi Hightower, 20, and Dashon Harvey, 20.

Authorities believe the shootings were a random robbery committed by several assailants and that some of the victims may have tried to resist their attackers. They were piecing together details of the attack from interviews with Natasha Aeriel.

Hightower and the Aeriels had been friends since elementary school and played in the marching band at West Side High School. Terrance Aeriel, known as T.J., took Hightower to the school prom in 2006, chauffeured by his sister.

At Delaware State they met Harvey, another musician, and struck up a friendship. Friends and family members said the four were not involved in drinking, drugs or gangs. They liked to congregate at the school, which sits in a middle-class neighborhood less than a mile from the campus of Seton Hall University, to hang out and listen to music.

Harvey's father, James, said Monday the parents of the assailants were to blame.

"If you raised your kids better, this would not happen," he said.

Hightower worked two jobs and recently enrolled at the school. One of her jobs was at Brighton Gardens, an assisted living center in nearby West Orange, where her mother also worked.

On the afternoon of the killings, she told her mother she planned to spend the night at Natasha Aeriel's house near the Mount Vernon School.

"The last time I heard her voice was Saturday night," Hightower said between sobs. "She called me from work to let me know Natasha was going to pick her up and she was going to spend the night. She told me she loved me."

The Aerials' mother, Renee Tucker, said the last time she saw them was around 10:30 p.m. Saturday, when they told her they were going around the corner to get something to eat.

"They said they were going to come right back to the house," Tucker said.

Humor him. I've heard from individuals who would know that the geriatric parasite is having a terrible time keeping his adult diapers clean. The monumental task of wiping himself seems to tucker him out so he is not always thorough.

This explains his obsession with butts - his is always on his mind due to its foul odor. Smell...butt...breath...its the senile dementia talking, er, typing.

As if the killers are going to obey a law banning guns. They
obviously don't obey the laws against murder. I just can't see them
handing in their guns.
Why make more laws against guns? Criminal are already breaking the
laws we already have. It's already against the law for criminals to
have guns. Arrest them for breaking the laws already on the books that
they have broken.
Stop Punishing Law-Abiding Gun Owners.
Hang them, or lethal injection or something. I guarantee that they
will be deterred from ever committing this crime again.
Don't go after law-abiding gun owners. Go after the real
criminals. They are the ones committing the crimes.
(But it is easier to go after law-abiding people. And you can say
to the people, "See, we are doing something about it".
Meanwhile crime continues to grow, and the killers are laughing
their heads off.

443. Vintage Style hybrid-Tube Radios made in China

Several vintage style hybrid-tube radios are being developed in China, these radios will use IC front end and a tube output stage. Radio cabinet is 50s style made of wood, you can find pictures in the VAL group.

http://ph.groups.yahoo.com/group/Valradios/photos/view/cb29?b=2&m=f&o=0

I tried the R801 prototype a few weeks ago, the sound is similar to Grundig/SABA tube radios made in 1950-1960s, very transparent, warm and powerful.

The R802 is an economic model with an IC output stage, however still maintains the same tube like sound.

Insanity would be thinking that the crooks would give up their guns.
It's sad that those kids were killed, but my guns sit in the safe, not
hurting anyone.

Oh yes, it's for the children...sorry. Way more die in car accidents
daily than die from guns, so why not ban cars first?

Forget it.

What you described would be true 30 years ago, things have changed so
much in those 30 years. I am so suprised there is still people
believing all these crapy propaganda against communist China.

That's really not the problem in this case. The IBA is supported by
a television tax, about $150 a year. This pays for TV channel 1
and all of the various radio stations that the IBA runs e.g.
the regular IBA channels, Voice of Music, Immegrant network (REKA),
etc.

The last few years the immegration from English speaking countries
has fallen off among the general public, and the majority of immegrants
are relgious and won't buy a TV. If they don't buy TV's, they don't pay
the tax, and they are not entitled to the programs. Many of them have
computers and feel that having a computer gets them the same information
that they could get from the radio or TV including the broadcast news.

The IBA news is also very much left wing, and many (but not all)
"anglos" as we are called are politicaly right wing. For example,
Channel 7 (Arutz Sheva) a right wing pirate radio broadcaster
abandoned radio and went online totally.

Israel has never been very keen on "spin doctoring" or presenting their
side of the story. Efforts in the last few years to enter the "propaganda
war", have gone nowhere. At one time Israel launced a sattelite TV channel
to counter the Arab propaganda, but it has disappeared from the local
cable TV network, so I expect it was quietly abandoned.

> mainly because they never recovered from the dot.com bust,
> and tourists have been largely scared away by the wars.

That's ancient history. Downtown Jerusalem is as busy as it
was in the mid 1990's. Restaurants and stores are opening up
in empty places. There has been some change, for example,
Starbucks and Dunkin Donuts have failed, but other chains
such as Burger King, McDonalds, KFC, Pizza Hut, and several
home grown coffee shops are doing well. Some of the Israeli
chains have opened restaurants in the U.S. and Canada.

That's true. Not only are they cut off from the world as you
put it, but the P.A. is very anti-christian, and Hamas's main
agenda is to convert Gaza into an Islamic Republic similar to
(and funded by) Iran.

> In the late 90s the Palestinians built several big hotels in East
> Jerusalem to cater to Americans, only to see their investment fail
> when the Israelis closed the border and kept it closed.

That's not true. East Jerusalem is still open if you are willing
to go there. Most tourists are not. Just as the Jews built twoard
the west starting in the early 1900's, the Arabs built to the east.
Those areas are not closed to tourists and you can go there if
you dare. They are not tourist friendly areas anyway.

What killed those hotels was Arafat's starting of the second
intifada (shrugging off in Arabic) which he started a campaign
of terror to try to force Israel to capitulate. It simply
was no longer safe for a tourist to visit those hotels.

Beacause of the slow economy, there were many empty hotel
rooms in west Jerusalem, which was safe, and tourists went
there instead.

Another big investment that failed was a casino in Jericho, which
was built by an Austrian company. Palestinians were prohibited
to enter except to work there, it was for Israeli's and tourists.
Palestinian terrorists kept shooting people driving to it and
for public safety, the roads were closed and it is closed.

So far, the new improved P.A. has done nothing to secure the
roads to it, and it stays closed.

However the Christain holy sites in Jersualem are open and well
maintained and safe. You can go from the valley where the tree that was
used to make "the cross" was harvested, by a city bus to the old city,
see the remains of the second temple (where Jesus is said to have chased
out the money changers), to the street he carried the cross on (Via
Delarosa) up to the spot where it is claimed he was crucified.

Note that all of these are described in the New Testament, but there is no
evidence that he was there at all. Whatever evidence you see such as plaques
and signs dates from the British Mandate period or later.

I'm not trying to mock anyone's faith, but if you are looking for proof
as opposed to faith, you may not find it. Mark Twain wrote an excelent
description of it in "Innocents Abroad", and it has not changed much.

There are also many churches of significance in the old city which is safe.

If you are a fan of Joseph Cameron, you can go see the tomb where his latest
movie is set, but it is just a hole in the ground in a residential/light
industrial area. The commerical interests and tourist traps have yet to arrive.

I don't know about that. One of the big problems is that Americans think
Israel looks like Mos Eisly (the space port in Star Wars), stone huts
in the sand with a few space ships thrown in for effect. Jerusalem is
a modern city, and Israel is a modern country. There is one part
of the Tel-Aviv Jerusalem highway I call the Garden State Parkway,
because except for the road signs having Hebrew and Arabic in
addition to English it looks like North Jersey. The only big
difference is that there are cement factories in the distance
instead of oil refineries next to the highway.

Funny, after all the hype about the deal, the part that it fell through
was not published here. Did it really. The factory was undamaged and is
working just like before.

That's not true. In fact most if not all of the aid money sent to Israel
comes with a price tag. The money most be spent on U.S. made products,
for example the substandard amunition used during the war last summer.
Without the money, Israel would have used anmunition that is made
locally, promoting the Israeli economy. Instead it was used to
buy amunition from the U.S. which is still dangerous on the ground,
and helped subsidize the U.S. defense establishment.

I rather like CRI; much better than the vast majority of American SW stations I receive which are always sod-awful Christian ones. I once answered a request from one of these to provide a reception report and now am bombarded with ridiculous begging emails from them. Can't see CRI doing this to mailbox respondents.

To me it is clear which continent is trying hardest to 'convert listeners to its point of view'.

And long live the DE1103!

OK. Just when might we expect Israel to say "We no longer want your money, and
where would you like the check deposited paying back what we've already received"?

Interesting. Earlier you were:

A.W.S.
President
Gay, Lesbian, Transgendered Shortwave Club

So, are you A.S.W or A.W.S.? Make up your mind (if you can find it).

The other " Archy Bunker" response is to give EVERYONE hand guns;

- that way, the twisted logic goes

someone pulls a gun on you , you shoot back; any where, any time

- The logic follows, that this is especially useful in Airplanes, Air
Line terminals, High Schools, Colleges, Crowded school buses...

Guns for Tiny Tots, Guns for lunatics

Yeah, Stop the madness..

Yeah, but abortion opponents will never be able to stop all abortions
either. I think a reasonable compromise would be to ban all abortions
after a certain point. It would stop a lot of them if it just wasn't so
convenient in the first place.

FO&A,

This Week's 'new' Shortwave Listening (SWL) Antenna :

Linear Twin (2) Element Horizontal Wire Antenna - End-Fed Windom
Antenna
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/14164
63 Feet Long - - - a la John Doty

Laid-Out : South-East to North-West (Far End) from
the Back of he Roof of the House to the Backyard

TV 'type' 300 Ohm to 75 Ohm Matching Transformer

-Note- These are the Larger 3/4" Round Barrel ones that
are usually provided with TV and FM Antennas and can be
bougth in Stores. They seem to work better as a Low Cost
Shortwave Antenna Matching Transformer; than the smaller
1/2" Round Barreled ones that are much cheaper.

RG6 Quad Coax Cable Feed-in-Line about 25 Feet Long

? WHY ? Two End-to-End "Linner" Horizontal Wires ?
MT:==================------------------------------o
24 Feet Twin Lead and 39 Feet Litz Wire
.
* The 24 Feet of 300 Ohm Twin Lead is connected across
the 300 Ohm Side of the Matching Transformer.

* The 39 Feet of Litz Wire [50-Strands of # 41 AWG] is
connected to one side of the Twin Lead. - Note the other
side of the Twin Lead is not connected at the Far-End it
Floats in Parallel.

* The Total Length is 63 Feet for the Longer

* Note the Shorter Wire is 24 Feet and it's Far-End is not
'connected; and this "other' Side of the Twin Lead Floats
in Parallel to the Longer Side.
.
Sort of : Acts like One Wire -and- Acts like Three Wires :

* 63 Feet ~ 1/4 WL for 75m Shortwave Band
~ 3.9 ~ 7.8 ~ 11.7 ~ 15.6 ~ 19.5 ~ 23.4 ~ 27.3

* 39 Feet ~ 1/4 WL for 49m Shortwave Band
~ 5.9 ~ 11.8 ~ 17.7 ~ 23.6 ~ 29.5

* 24 Feet ~ 1/4 WL for 31m Shortwave Band
~ 9,4 ~ 18.8 ~ 28.2

Currently Rigged "Flat" at about 17~18 Feet above ground level.

Might call it an End-Fed Windom Antenna . . . . .

Do the radios cover the AM band extension that has been in effect
since 1992?

There is an entity called Degen with offices in Shenzen that claims to
design and manufacture a variety of products. Whether thay actually
manufacture all component parts from scratch or assemble them is
probably an open question. From what I've read Degen markets it's
products through Tecsun Hong Kong. Whether Degen is a western style
subsidiary of Tecsun or whether there is cross ownership of the two
companies or whether they are tied in through other corporate entities
is not apparent from the information I've read.

[snip]

It sure looks "vintage" with it's 7 segment red LED display, membrane touchpad and Love Boat era graphics -- all in a woodgrain box. But Passport has it "New for 1994".

The Passport review is odd. Listed among the radio's disadvantages are such potential showstoppers as the crummy membrane keypad, FM stations breaking into the SW bands, hissy audio, excessive digital whine, single bandwidth, wildly varying sensitivity from band to band, mediocre dynamic range and other more nitpicky stuff.

Passport did like the radio's ergonomics, display and footprint. And the American Electrola will interface with an IBM compatible.

A quote from the review:

"It's about time: an affordable world band radio designed for the way most normal people listen. Not a portable -- most world band listening is done at home, not on the road -- and not a techy DX tabletop model that's evolved from ham gear."

Affordable, in the case of the American Electrola, meant $319.19.

I should say I had no particular interest in the American Electrola. I had already bought a DX-440 for less than half the AE's price. I liked, and still like, my DX-440. I even use it at home!

Everything old is new again.I own an old Made in America brass blade electric fan just like that one in that photo, it still works as good as new too.Those old brass blade electric fans are more collectible than the steel blade electric fans.I bought it for $10.00 years ago at a fleamarket.I own about a dozen old, old, old electric fans.

And because of that and, of course, Pearl Harbor, I have NEVER owned a
Tore-Up-Yota, Honda, Nissan,
or Mitsubishi. Yes, I know that many parts are bought and used by American
auto makers, but I cannot help that. IMHO, to buy those makes is near
treason so far as I am concerned. Its almost impossible to buy purely
American products, but I try. So I quietly make a statement by driving GM
cars--particularly Chevrolet.

Some of us say, "OH! But American cars are no good!"
Horse hockey! I have driven MANY GM cars/trucks with a minimum of trouble
for 40 years, and some of them over 250,000 miles before succumbing to
"trading fever". A buddy of mine has an 86 Silverado with 450,000 miles on
it, replacing ONE engine and ONE tranny in 20 years. Gonna keep it, too! In
fact, the older I get, the less need I see for buying newer cars and my
latest car is a Chevy S-10 with 161,000 (so it's relatively "new"). And,
like the rest of my American cars, I have had FEW issues with it. In fact,
the things I have replaced in the last 7 years are normal wear items--tires,
batteries, belts, an alternator, one ball joint---and the truck is 10 years
old! It has been a solid, reliable, relatively economical vehicle and,
should I replace it, it will be another pickup---probably another, newer
Chevy S-10. Heck if it breaks, I can fix it, and I STILL don't have a car
payment next month!!

So flame and criticize away. I AIN'T fergittin' and I ain't buyin no
Honda!~ :>)

Thanks for the photos of the Tecsun manufacturing facilities. I could
not help noticing a few roll around air conditioning units in the room
corners in a few shots. This generally indicates that someone goofed the

cooling requirements. The screw up results from not accounting the heat generated from the equipment in the area. Was it a little warm in there?

AND THEN THEY WILL COME FOR YOUR KNIVES. Anyone in Scotland caught carrying a knife will be in big trouble now. It's to cut down on the number of killings and woundings from knife fights and attacks in the streets of Scotland's cities and towns. It seems that the hospitals have been complaining for a long time.

First they came for the guns. Then they came for the knives.

If a government manages to ban private ownership of guns, will they next come after knives? That seems to be the case in the UK, in some parts of which it is illegal to even carry a knife.

"Lord Advocate of Scotland Lord Boyd QC has warned that anyone tempted to carry a knife in Scotland now faces automatic custody if caught.

Under new guidelines issued by his office, anyone caught with a knife faces being held in custody after arrest until he or she appears in court.

And any knife suspect with a previous conviction for a similar offence will automatically face a jury trial.

He said: "Communities can have confidence that those who carry, or use knives on our streets, will be swiftly dealt with.""

I don't DX much anymore, so I find my Yaesu to be largely overkill. My
Degen 1102 does much of the same stuff, and has similar sensitivity.
The Degen is comparable to the DX440, except the 440 has a little bit

finer BFO. I owned a 440 for years, but I gave it away six years ago or so. I've tested both the Yaesu (FRG-8800) and the 1102 on the same signals at the same time at my current QTH, and the Yaesu seemed to just pick up more noise without any discernible improvement in signal. The Yaesu is now in the closet.

As for the Electrola, it seemed to exist to satisfy the America First rantings of Harder and other kook domestic SW hosts who wanted an American made radio to sell on air. It sounds like it was a good idea, but a bunch of good ole boys didn't have the resources to build a real radio factory. They should have done what such companies as Apple have done in the 2000s and play up American DESIGNED, not American BUILT. The ipod says "Designed in California" on the back. The Chinese tend to have odd electronics design ideas, such as the infamous 99 minute sleep timer. Americans want stuff designed by people who understand American culture and desires. The current tendency is to outsource everything except top management to China, allowing the Chinese to do whatever they want as far as design. The Chinese, of course, think like Chinese, and design with an eye on their home market first. They can miss the trends in America.

Fact: Capital punishment is not a deterrent against crime. Period. A lot of people own guns for no reason. They're just laying around so that some fool kid can get hold of 'em. Maybe if we had a Pres. who was law-abiding, we'd have a more law-abiding society. And maybe if the head of the Justice Department didn't lie under oath . . . Did you ever think of that?

I understand that some interpretations of Jewish religious law
prohibit using radios and TVs on Shabbat. During the first Gulf War in
1991, when Iraqi rockets were landing on Jerusalem, the rabbis found
that their followers were prohibited from listening to incoming strike
alerts on the radio, forcing them to spin American style to create
loopholes so that people could hear the alerts. One suggestion was to
operate the radio with a stick or your elbow.

Don't feel bad, the Americans suck at it too. During the Cold War all
VOA had to do was read the news and present fluff cultural programs
and the Russians listened. Today, the problem isn't that Muslims don't
know about the West, but that they object to its culture on religious

grounds. That sort of attitude is very difficult to budge. The
Russians wanted to have the goodies of the West, the Muslims don't,
they'd rather live in tents if living in tents means keeping religious
purity. King Abdullah of Saudi Arabia has said so.

I haven't heard of Israeli chains opening in the US, unless it's in
heavily Jewish areas such as New York. I do know that American Jews
are making an effort to introduce Israeli goods to the US, especially
foodstuffs. I've had Man's lemon flavored sugar wafers, which are
wonderful. Elite chocolate is also good, although usually only
available widely at Pesach (Passover). I once saw an Israeli made
toolbox for sale.

Remember what the Palestinians did to the Church of the Nativity,
tearing up the medieval Bible and generally trashing the place? That
rattled American Christians so much that there's a real movement to
buy up holy relics and squirrel them away. Actor Mel Gibson is
reportedly building bombproof vaults in the American desert and
spending millions to buy relics.

Gambling is a big no no in Islam, and they tend not to be very
forgiving of others partaking, unlike say Mormons living in Las Vegas
who have largely learned to live with the sin-in-our-midst thing. The
farther east of Vegas you go, the more Mormon it gets, until you get
to Mesquite and Bunkerville where the population is completely Mormon.
That hasn't stopped casinos from being built there, or farther north
at Wendover which is another Mormon town. In Utah, Mormon rules are
the rule, rules based on Islam. But in Nevada the Mormons tend to let
the outsiders run the show, although they keep an eye on it. Muslims
have yet to learn such tolerance.

I was born in California, where the oldest building in the entire
state was built in 1790. Compared to that, 3000 year old buildings are
inconcievable. Even in places like Massachusetts, the oldest you'll

get is 1650 or so. Other than the gee whiz it's old factor, the main
reason to travel to Israel is faith. Where faith is concerned, proof
is beside the point.

I've heard that Israel tends to use stone and concrete in construction
as opposed to the wood and cinderblock common in America. In fact,
that's the case in the whole Middle East. A few cities such as older
Eastern cities and San Francisco use red clay brick, but in New Jersey
it's wood for residential and cinderblock for commercial. In the 1960s
America invented the "tilt up" precast concrete panel building for
light industrial, but other than that concrete has gotten nowhere in
America, except for paving. The sort of concrete building used in the
Middle East would be illegal on the West Coast because it can't handle
earthquakes.

That's what I heard. The deal seems to have been quietly abandoned
after the war. Or maybe everybody was so concerned about the war that
they forgot all about the deal.

That's not surprising. George W. Bush is beholden to his big corporate
donors, and will create any advantage he can for them. The massive use
of latent cluster bombs, daisy bombs, and various other bombs in
Lebanon that can sit idle until somebody steps on them, which Israel
got all the blame for, was I suspect driven by the US makers of the
bombs. I shudder to think of you guys being forced to fight with
M16's, which jam in the desert sand. The Uzi is so much better, but I
suspect that Israel gets US small arms dumped on it, with orders to
use it. The story about bad ammo just didn't get out, even on the
internet. The bomb story did (and Israel was blamed), as well as
various stories about shells filled with uranium being used in Iraq,
but I hadn't heard about the ammo.

William,

There are two factors at work here:

1. IC technology has improved to the point where it is possible to throw
together a converter with cheap parts that will behave itself well
enough for a manufacturer to eschew an FM RF stage.

2. What we're talking about here is NOT a quality radio. Such an
arrangement (FM with no RF stage) will only appear to work well in an
big-city urban environment with a whole bunch of 100 KW monster FM
stations close by. In the USA, that means places like NYC, Chicago, LA
San Francisco, and the like. These radios are sold in grey-market shops,
flea markets, and other bazaar-like places in urban centers to
unsophisticated and undiscriminating consumers. Take them out of that
environment and their shortcomings quickly become apparent. No
name-brand manufacturer such as Sony or GE would ever stoop so low on
the cheapness scale as this-it is strictly a domain for the no-name
brands from China.

BTW, I would say that the Sams book you got underrepresents the number
of 1960s transistor sets with AM RF stages. There was a real competition
among manufacturers back in those days, and sensitivity was a major
selling point. I'd say about 75% of the 1960-1965 era transistor sets I
own (most of which are larger than pocket size) have an AM RF stage, and
a lot of those are amazingly hot on the AM BC bands-as hot as my better
1930s tube radios in many cases. If you take stock of those that also
have shortwave bands, the percentage with AM RF stages jumps to almost 100%

Later on in the decade, the desire for sensitivity seemed to wane in
comparison to the desire to market and sell a radio at a low price. For
most radios thereafter, that meant bye-bye to an RF stage-which is
exactly why the Superradio and CC radios have their market niche now.

As a devout, well established bipolar walking fool, sir I had no
READING comprehension problems WHATSOEVER. I asked you simply to do
your homework first, typing second.

My reluctant colleagues will probably agree to themselves and answer
other questions without comment for the most part.

Thou havest nary the piss to join the vinager union, thus verily I
urge your reduction of cocksurity to commence in the uncouth slang of
children past--"chill out, dude".

Perhaps it's not true. At any rate, I've yet to see Israel refuse the money.

There are other ways too. The most appropriate for this group was during
the war, the radio stations were broadcasting normally, but no audio.
Since the sabbath officialy starts about 45 minutes before sundown on
Friday and ends 15 minutes after sundown on Saturday, there was 25 hours
of "dead air".

I beleive that in the 1991 Gulf War, they set some sort of record.

One person posted a note on a mailing list asking for help tuning in
the station. I told them to tune until the noise stopped.

I understand. Occasionaly I listen to VOA broadcasts still. You are right,
they really would live in tents if they had to. Worse than that, in order
to keep them pure, their leaders will have them live in tents.

> I haven't heard of Israeli chains opening in the US, unless it's in

They are opening in Manhatten, L.A. and Toronto (I know, that's not
the U.S.). They don't identify themselves as Israeli.

Back when I lived in the U.S. (left in 1996) we bought Carmel brand tomatoes
from Israel at the local high end market. And I'm sure everyone reading this
has heard of Jaffa Oranges.

There are all sorts of Israeli products that are not obivous, for example
there is a large movie studio here which makes "Hollywood" movies,
and lots of computer software. If you are reading this on a Pentium computer
there is an 85% chance the processor was made here, and if it is a dual or
quad core, it was designed and made here.

I guess Mel is going to keep his mouth shut about it. After getting
drunk and blaming his problems on "the Jews", I'm sure he does not
want to offend anyone. Actually it's a good idea IMHO. Part of
the practice of Islam is to destroy relegious relics that are
not part of their relegion.

Yes.

We have them here. Usually no more than the low 4's, but we have them.
The buildings are not made from wood because there is no wood. It's
mostly cinderblock, steel rebar and in Jerusalem faced with "Jerusalem
stone". A tourist once asked me if I knew where the quary it came from
was because "by now it must be one big hole". :-)

> That's what I heard. The deal seems to have been quietly abandoned

Could be. But I think what would really scare him was that the airport
is subject to random closures due to the union striking. The former
minister for defense (the one photographed surveying the troops
with the lens caps on his binoculars) used to be head of the
national labor union and whenever anyone threatened to remove him
from office, he'd arrange for a strike which closed the airport.

He was elected via the labor party and even they had enough, voting
him out of office.

You'd be surprised what gets sold. When I refered to ammo I was refering
to cluster bombs and depleted unranium tank/artillery shells, not
small arms ammo. The M-16's are not bad if you keep them clean.

That's how you can tell a real soldier from a "jobnick". The jobnicks
look good in their clean, well pressed uniforms and polished boots (although
many wear sneakers or sandals most of the time). They also have rifles
that look like they haven't been cleaned since they came off the production
line.

The real soldiers look sloppy, but you could eat off of their rifles,
they are cleaner than most people's dishes. :-)

Geoff.

My Radio/Receiver : Icom IC-R75 (R-75) with Kiwa Mods
Using an external RCA 4" Full Range Mini-Speaker [5" Cube]
.
Today's 'new' Shortwave Listening (SWL) Antenna :
Linner Twin (2) Element Horizontal Wire Antenna
63 Feet Long - - - a la John Doty
Laid-Out : South-East to North-West (Far End) from the
Back of he Roof of the House to the Backyard
TV 'type' 300 Ohm to 75 Ohm Matching Transformer
RG6 Coax Cable Feed-in-Line about 25 Feet Long

? Why ? Two End-to-End "Linner" Horizontal Wires ?
MT:===============---------------------------------------o
Balun : 24 Feet Twin Lead and 39 Feet Litz Wire
.
* The 24 Feet of 300 Ohm Twin Lead is connected
across the 300 Ohm Side of the Matching Transformer.
* The 39 Feet of Litz Wire [50-Strands of # 41 AWG]
is connected to one side of the Twin Lead. - Note the
other side of the Twin Lead is not connected at the
Far-End it Floats in Parallel.
* The Total Length is 63 Feet for the Longer
* Note the Shorter Wire is 24 Feet and it's Far-End
is not 'connected; and this "other' Side of the Twin
Lead Floats in Parallel to the Longer Side.
.
Sort of : Acts like One Wire -and- Acts like Three Wires :
* 63 Feet ~ 1/4 WL for 75m Shortwave Band ~ 3.9 Mhz
* 39 Feet ~ 1/4 WL for 49m Shortwave Band ~ 5.9 Mhz
* 24 Feet ~ 1/4 WL for 31m Shortwave Band ~ 9.4 Mhz
Might call it an End-Fed-Windom Antenna . . . . .

Errm... thankyou for spamming my website.

I know you're probably trying to help, but it'd be nicer if you just posted real content here, rather than grabbing my front page and pasting that into your newsreader.

I really don't want to get complaints of spam linked to my domain.

Thanks for the additional info and clarification. As long as we're talking about dirt-cheap FM radios aimed at urban listeners, I'm not upset.

The Sony EFM-117 in this manual -- which I have several non-working samples of, and owned as a teenager -- has a long ferrite rod, but no AM RF amp.

- - NOTE : 9560 kHz is Listed as being both from
- - South Korea and from Sackville, Canada ? ? ?
-

? Where do you see that?

DX Ace,

One KNS Webpage Reads : Region : North America
http://world.kbs.co.kr/english/radio/schedule/schedule.htm
.
Time (UTC) : 02:30 ~ 03:00 @ Frequencies (kHz) 9560
- - - No Place Qualifier
.
Time (UTC) : 12:00 ~ 13:00 @ Frequencies (kHz) 9650 (Sackville)
- - - With "Sackville" {Canada} Place Qualifier
.
However another KBS WebPage Reads :
http://world.kbs.co.kr/english/radio/schedule/time.htm
North America - English 2 - 02:30 ~ 03:00 - 9560 (Sackville)
- - - With "Sackville" {Canada} Place Qualifier
.
which is right ? ~ RHF

I'm sure Chuck and some others were selling Sangeans in the early 90s. I'm pretty sure Chuck was also selling a version of one of the Drakes at one time.

Of course, the Sangeans weren't made in the US and the Drakes weren't cheap but in either case the buyers got something for their money.

I'm not so sure about the American Electrola.

Hi Guys
I have in near mint condition a Sony 2010 (Sony 2001D) for trade. It has the original box,manual,reel antenna and mains power supply (110v/220v AC switchable) Sony wave guide and a pair of unused still sealed ear buds.

I am looking for someting little smaller that will fit in my case for travel, (this sony 2010 is not really a portable in the true sense of the word)

I would do a straight swap for either
1- Sony sw55
2- Sangean 909 or equivalent
3- Sony 7600GR (must be the GR model with sync-lock)
I think one of those would suit me far better for travel than the 2010, anyway I have a sw77 for tabletop use.

I live in Britain but will ship worldwide.
check out my ebay record - vangellis1
If a deal is made we pay our own postage etc
Pics available on request

If anyones interested, please email me direct,

I once got my hands on a "People's Radio" the rebadged Drake SW-1.
No, it wasn't cheap. It wasn't pretty. And it wasn't exactly feature
laden, but for program listening, it was a solid radio.

SW-2 was a better buy, albeit more expensive.

Took a static strike, here, during a round of thunderstorms two weeks ago. Real Wrath of God storm. And a big lightning strike.

I was out of the house and the antenna was still connected to the receiving system. The strike generated enough of a spike to take out the front end on one of my Stridsberg multicouplers.

Wrote to Stridsberg. Got a response within a couple of hours telling me where to send it.

Packed it up, sent it on, figuring it would be three weeks before I saw it again. This was on Monday.

A package I wasn't expecting arrived 8 days later, yesterday. Amazed to find my multicoupler, sealed, packed to survive a head-on with Rosie O'Donnell.

Not bad.

Spread the word.

I imagine the design as a whole would be a bit different from the usual
concepts, as I seem to remember it uses one or more tunnel-diodes.

Perhaps this explains why 95% of you losers can't get a fine woman, having to settle instead on some overweight dumpy throw away.

A.W.S.
President
Gay, Lesbian, Transgendered Shortwave Club

LONDON (AFP) - Women see masculine-looking men as more unsuitable long-term partners but men with more feminine features are seen as more committed and less likely to stray, researchers said Wednesday.

Scientists at the universities of Durham and St Andrews came to the conclusion by asking more than 400 British men and women to make judgments on character after looking at digitally-altered pictures of men's faces.

The web-based test asked participants to rate the face for traits such as dominance, ambition, wealth, faithfulness, commitment, parenting skills, and warmth.

Men with square jaws, larger noses and smaller eyes were classed as significantly more dominant, less faithful, worse parents and as having less warm personalities.

Those with finer facial features, fuller lips, wide eyes and thinner, more curved eyebrows on the other hand were viewed as a better bet for long-term relationships.

And healthier-looking faces, for example those with better complexions, were seen as more desirable in terms of all personality traits compared to those who looked unhealthy.

Older faces were also generally viewed more positively compared to younger ones.

The scientists said there was a "high amount of agreement" between women about what they see in terms of personality when seeing a man's face and they may well use their impression to decide whether or not to engage with him.

"That decision-making process all depends on what a woman is looking for in a relationship at that time of her life," said Lynda Boothroyd, from Durham Universitys Department of Psychology.

Her colleague, David Perrett from St Andrews, said: "Our results contradict claims that machismo denotes fitness and disease immunity. Masculinity may buy you dominance but not necessarily tip top physical condition.

"Instead women see a healthy guy as the source of wealth, and fit for family life."

The research is published in the latest edition of the journal "Personality and Individual Differences"

Not long from now, it will be Monday morning, August 9 in Nagasaki, Japan.

Let's pause, and remember the time when men were men, and the "Fat Man" flew. A time when we actually gave our enemies the thumping they so thoroughly deserved, without endlessly whining about it.

Yes, it will soon be the 62nd Anniversary of the Atomic bombing of Nagasaki.

And, I'm certain it will be mentioned on shortwave, so keep your radio on.

Oh you mean like the "last" Pres. we had. He was such an honorable
person. Or that warmongering head of the justice dept. Janet Reno who
lived to sick the military on its own citizens,, i.e. Ruby Ridge, Waco, where
how many total innocents died????? Idiocy.

Not really. You'd think the tunnel diode would have been used for the LO,
but it's the mixer! Perhaps the tunnel diode was significantly less noisy,
but the EFM-117 is not an exceptionally sensitive radio -- merely good.

Show me a murderer that was executed that went on to kill again! When I read cases in the paper of escaped killers, or killers released by revolving door justice that kill innocent people again, it makes me sick to my stomach.
Capital punishment would save innocent lives. And we have modern scientific methods to prove guilt, for cases where there might be some doubt.
I don't want to hear any crap about these "poor misunderstood human beings that are bad but it's not their fault." I was attacked by an ex-con some years back and barely escaped with my life. If it been my wife or one of my kids that had been the victim, I might have been attending a funeral.
I'm sick and tired of these criminal social workers and other lefty soft-on-crime idiots. How many have died because they care more for the criminal's rights then they do for law abiding innocent victims??

We understand, it's your senile dementia. Just a reminder - be sure to
change your adult diapers every 2 hours now instead of the 4 hour
rotation you have been on. Hopefully your bowel/bladder control
problem will improve but, frankly, it won't due to your advancing
age.

Have you picked out the nursing home you will be warehoused in the
near future? Enjoy your twilight years. LOL!!!

We should do like they did those criminals in the old Western days,,,,
Hang them in the streets, or fry them.Wayyyy back in the 1920s, (I think
it was the 1920s, I am not sure of the decade) Mississippi used to have
a traveling electric chair.The electric chair was mounted on the back of
an old flatbed truck and the truck traveled from county to county.They
would strap the criminals into the electric chair and hook up the wires
to the electric wires up there on those power poles and pull the
switch.ZAPPPPP!!!!! Everybody from miles around would come and see.

Well boys and girls it is almost Hiroshima Day.
The anniversary of the first time atomic weapons
were dropped on the Nips. (Later on of course they
began dropping fuel-efficient Hondas and Toyotas
on us when gas became scarce in the 70's and the
rest is history.)

"If the radiance of a thousand suns
Were to burst at once into the sky,
That would be like the splendor of the Mighty One.
I am become Death, The shatterer of Worlds."

911 Leaders Saying They Are Jesus
http://rss.nfowars.net/20070802_Thu_Alex.mp3

Jason Bermas "I just want to let people know, that if this is a hit piece that involves, you know, saying that we're all blaming the Jews, or the Zionists, or something ridiculous, where we go after an ethnic group, [Jason Bermas suggests "Jews" = "Zionists"?] 'we' can not be associated with ANTI-SEMITISM, space beams, utter kookery.

Alex Jones "Or Jesus! they have 911 leaders saying they are Jesus now. They have people saying it's space beams from Pluto. And folks, I've tracked these people, they all were formally in intelligence, or connected to the Bushes, the space beam thing came from a almost cabinet member level Bush member, and folks this is a setup to poison our movement."

Now??

I've given my phone number several times to Alex Jones, of which he's not as of yet, invited me on as official guest, for fears he can find no arguments against US I presume. 911 financier Ahmad = al Qaida, and we have molten iron on video flowing like water. Demon Bush Jr. gave US zero, while closing criminal investigations immediately after the terrorist offense of no questions!, no questions! Case closed. But no, the American media rarely if never mention these facts, while insisting Bush's deathly war criminalling is as only a puppet, look away! look away!, leaving without

challenge on the, teen like naivety of wearechange.org's consistence that "we", who demand justice for 911, who might also hold the opinion that zionist behavior does not blindly equal being Jewish, should not be allowed to speak Justly for our public challenge, because bushite Amerika has no defense for censorship against ANY of our judicial wanting, as documented positions on behalf of the suffering to death victimized public. Why? Because we are Just. Well, I try to be anyway. (I've spoken as written for YEARS, with NO ONE WORLD WIDE countering in the public realm, but for the strangely odd insult. Bushite do exist, don't get god wrong, but dumb evil bushite brood in darkness with censorship like all zionists do, selling to be 'godly' honorable men, when in truth, they'd murder anyone of US for a stolen nickel given to a neocon. I, as open line talk radio producer, win every time, always, forever, never fail. [er.. yet..] Why? Because I treat YOU fairly. America should do the same. We are all in this together. Zionists like robbing then killing defenseless innocent Christians, and Jews, while just lying that they don't without scened factual TV perception. Demon 911 WITCH, zionist Condi 'okayed' the dropping of more than SEVEN MILLION land-mines on Lebanon, purposefully done to indiscriminately murder ourselves for generations. Jason might foolishly call you an "anti-Semite" in fear for speaking such not understood truths. And importantly, not because they can publicly disagree so in open debate, so sides to not allow US to rise in acknowledgement to bring about Justice as demanded, for ALL as ANY. (Gee, who's the neocon now eh? (we're all sinners.))

If Americans really want 911 Justice:

Help US out by putting the video of molten iron flowing like water out there in the minds of any who have doubts, tell them hypno mugger Bush, gave US zero to substantiate his public falsehoods, and tell US about Ahmad as more than a passing fact that means little of nothing, then, WE, The People, will believe this has more to do with Justice for Humanity, than the American suffering movie goer ego being, "leading the free world", by voicing no public concerns on the criminality of the bushmob shysters. Left happying in the George Norry, as a TRAITOR to a dying America not hearing. An enemy of Liberty to the, tried to be free soldier, who is led TO DIE still un-wittingly by lie for the misfortuned neocon bounty of global tyranny through coast to coast story lining. Look, the peenackers will tell you freakishly, that they work to lie to us all, to take advantage of a plain to view weakness. I swear. The neocon wants to con your kid to die for a war lied into with as our stolen goods. We lose as crime victims, while they win free accountability because, (well... I'll just let you finish that one liner sucker punch..)

Ron Paul Slams Ron Paul!
http://youtube.com/watch?v=eAvt7BdvJiM

"If you happen to be working for a big company, or the
government, you get health benefits dirt cheap.[?] But if your
trying to make it on your own, and you don't have insurance,
you might be charged two or three time more than the
government will pay!"

Almost. PBS showed a man who fell from a ladder, broke a rib,
and was bankrupt from his near $250,000+ bill for, for private
"free market" health care. Money demanded that doesn't go to
the doctors, nurses, or "public" hospitals. So what is Ron
Paul saying about Ron Paul? I'd wager, he doesn't know
himself, and fears like FOXNEWS from open debate of those who
try to teach US to walk through his own argument, (or follow
the money (al-Qaida=Ahmad)) and find the fault of all proud
blind Libertarians. Look, don't you want the best service
possible for the dollars expended? Why give your BASIC health
care treatment dollars to a do nothing shareholder, or hedge
fund CEOer for procedures, who's success is not made better by
needlessly increasing the costs for nothing but selfish sicko
greed by bribe payers. Again, rarely are those that "earn"
billions in public health care, care givers, but takers.
Someone ask Dr. Ron Paul, or Ross Perot, why those with
leverage, are able to negotiate better deals through
intelligent design, leaving others as single payers, (poor
unrepresented pension people,) to flip their expenses? Do we
want to publicly sanction screwing over the poor with
ignorance, to feed the pay no taxes either, talentless as
lowly, highest ranking rich? I suppose if it means radiation
treatments.. anti-psychotics or, the play time of genetically
altered vaccine strains of true quackery, as has to be done
trusting religiously on someone for our money. Money lost as
investment on privilege in the market equation of lowering the
human capital available to maximize the de-profiting of our
shares for nothing but money grubbers. Again, Americans pay
TWICE as much as Canadians per-capita, where for those dollars
Canadians get full coverage, while Americans are then expected
to go out and buy insurance now. TWICE. (Did you know that

DO NOTHING hedge fund managers can "earn" as much as 1.7 billion per year in salaries by nickel and dooming everything? And, it's only an elite small few who are 'lawed' to do so? Now, who would want that in a free to be me democracy?)

traffic light for commies, traffic light for commies

A dying waged - by the painfully wealthy status-quo ignoramuses "this is the first step to socialized medicine!!" ahhh!!! caring doctors with calculators are connecting for better prices to improve care.. We'll take less and they'll be free to think.. FOR THEMSELVES! AHHH!!! bare ass and run for cover!! embarass for. a caring Doctor with math skills and Law is a comin' round, play smart stupid. "What do we do again"?, play smart stupid. . (`_`)

To fix this we must decide what this issue that encompasses the "Health Care Industry", is passing ourselves away off as. Politicians who promote pushing the power of pill popping to purchase your peace of mind is phucked,

Do Republicans mean to bring health care suffering out of control with no market values, because truly they have little of no skills when it comes to fixing their own buffoonery? Hmm... unless they count to hide the bean all together, fixing the game intentionally to have US lose by remote controlling stupidity! 300 channels, and nobody's taking our call from the space cased file of, "what's this freedom war against Life for again"? Look, is mercury as a medicine good or bad do you think?, let's ask someone for Christ's sake. Or for Deb, Henry, Bill, Beth, Mark, Carol or Tony. Johnny Wizard, our everyday normal magic man of folklore, opens up the stage to ask all the people together, "Are we Man or machine to take this all lying down quietly"? We need to talk about what a King like me, is doing in a place like this, under appreciated, and left alone without my home, dying for a break in radio running, as President of the company that started the sands running, Shareware Earth Co., a god-like production of miracle and wonder!! You just participate, and you won't even believe how good we could have it, Rejoice, for Johnny Jesus has come down for diplomatic talks. Give away! Give away!

Again, CNN, CBC, and FOXNEWS, (who advertise their listening) suggest G.W. Bush and Co. have publicly acted nothing warranting immediate arrest, or have openly supported the great Kucinich's plan for Impeachment, and consequently, are leveraging America into this mess 'because' we were portrayed as sold to the U.N. for freedom as Iraqi's Grand Strategy. BOGUS! Nothing about the PLANNING of killing people indiscriminately for financial criminal gains as bonafide terrorists, for we had unrestricted access prior to dropping

bombs for mangy LIAR neocons. ORHA. I have yet heard FOXNEWS complain in pains of liar BUSH personally being the al-Qaida cause responsible, (like Alex Jones sells foolishly falsely also) More than a million INNOCENT people have been murdered directly by the criminal action of the broken Bush Rule, UN-CONSTITUTIONAL! Don't they know of what You speak? Now???

Make it so,

President and CEO of Shareware Earth Co.
King Johnny Wizard

Christ is Person ! ! !

A reminder: Peres, the Devil demon LIAR, sounds as sweet as any little old man could, but for the fact that he LIES about targeting innocent godly people for murder! While playing ignorance, as if, he doesn't faith G-D as a real Jew would from Israel. Zionists are atheists who lie as neocons who sacrifice all for ill gotten money stolen from US as the blind foolished already with G-D from the Ol? Testament, all on how this Life suspends storied belief as Divine, to say finally, out loud, "hey wait a minute, who's in charge here?", is really something of a miracle. At least when I say it.

Justice to the bushite, Justice to the enemies of America, so called out the Son to God as King of men:

BELIEVE!

Like, so in walks this, out of work time Lord who thinks to converse to the masses about the most basic of reasons to save the lives of innocent others, leaving him convinced, he really needed an audience for this fable to rise as profitable venture. So, it was followed to make it out there in this real world, is to care for Justice measured. All done so to bring greater hope for a better future as all would follow, boy, were they surprised!

Johnny Wizard has arrived..

Spare me some money won't you please for this art of tragedy?

P.S. I'm still hoping that Coast to Coast will bill me godman co-host, all to openly address these freedom for all operations, with Justice ruling our way over the irrational tyrannies practiced by others happily blinded. Evidence is required to convince ourselves on who is good or evil. Period. Don't like it? Too bad. We are on charged!!

Intelcenter.com = alqaida videos you can get nowhere else!

It is important to also realize, this intecenter terror bringer does nothing to sell the arrest of the actual

perpetrators of 911 by supporting our Policed requirement to form actual evidenced conclusions in our the land of the make believe. Now, who personally are these pro-bushite anti-American terror scripters, and what is it going to take to find an informed citizenry out in these here parts, to make the proper conclusions by phone calling for furthering our infos around to channels of command of the big ringers in the sky. I'm sure we's a be furious over these facts of high treason in America if we were allowed to freely say as much on our radios and TVs. Al-Qaida = General Mahmoud Ahmad

That's what I'm talking about.

BUSHITE AMERKA CLAIMS THIS DOESN'T WARRANT THE DEATH SENTENCE?

Again, evil bushite THIEVES claim they are justified when
indiscriminately bombing populated cities to MURDER US People.

General Johnny would teach MY soldiers to immediately arrest
to kill for such criminality. In fact, I'd likely even throw
in some bonus cash, an a Freedom medal from all lovers of
Liberty. Did you know, many bushite sing a song about killing
innocent young girls for pleasure? Did you know that also, an
"American" radio host likes playing that same song as recorded
on "American" airwaves? Fight back for God, or die from self
contempt my friends, fight back for life and love.

Again, evil bushite THIEVES claim they are justified when
indiscriminately bombing populated cities to MURDER US People.
All to help 'escape' the neocon ENEMIES of America - they also
support "officially" destroying Our public infrastructure,
thieving humanitarian aid, while incarcerating innocent people
to collectively be punished by the TRULY Satanic enemies of

GOD. Ten "CIA" bushite enemies have been found to have kidnapped near one thousand innocent Americans to be tortured to death, in tyrannical nations friendly under American funding by Bush unquestioningly. Fight back for your neighbor, fight back for America, fight back for YOURSELF. Or, don't.

See the bushite, you bill it for Christ, You bill it for America, You bill it for them, you bill it for US.

Murdering bushite gang rapists try escaping true accountability

http://womensspace.wordpress.com/2006/07/09/rape-of-the-hadji-girl-part-3-five-more-us-soldiers-charged-abir-hamzah-was-14-years-old/

/ / Why did the Army, within three hours, return to tell neighbors that this was the work of insurgents apparently without any investigation? \ \

See? in Johnny's world, that "the Army" person would have been the FIRST questioned, then likely arrested. But look, it hasn't even been acknowledged as evil doing in progress. (Every time you read, "The Army says..", become aware.)

It should be noted, ungodly bushite enemy commanders call every car bomb in Iraq, al-Qaida, without even pretending to do freedom operations for YOUR protections, as just another dead body in the rubble. (Likely caused by Aegis for cash profit.) So then, look my friends, Amerka refuses to demand justice to save the lives of their very own sons and daughters. And when, WE, Humanity, beg them to answer our calls for accountability, they refuse but for to LIE, stating publicly, "God" would grant robbing from innocent others, to enrich their great unholy tyrannical demon liar. They know easily that the bushmob did 911, and they like it. No, they crave it. The chance of murdering their own "loves" to enslave the human race for the antichrist, sounds great, just as long as they can get themselves in on the take.

/ / Idiot General Says Dead U.S. Troops Best Reason To Keep War Going And Kill More U.S. Troops

[Option B: More Dead U.S. Generals And Fewer Dead U.S. Troops ?] \ \

If the sacrifice of soldiers lives is going to mean anything, it going to mean how long it took, Americans to care for themselves as really worth something. When, or if that day should come, it will be the day where Iraqis victims are seen, as just you or me. Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and

America.

Just look at that my friends of Earth just look at that. Americans speak only contempt for the value of human life. Every day, INNOCENT Iraqis die by the criminal actions of the demonic neocon enemy forces of EVIL, and our deaths as the god loving mean nothing. A small few die in a bridge ACCIDENT, and every corporate channel devotes the entire day's news as it. Allawi confesses to killing children for "CIA" money, and there, as with the soldiers who braggingly, beat innocent children to death for sexual pleasure, bomb people indiscriminately, or steal all the humanitarian aid, don't command your slightest concern as impartial paying for it TV viewers. They say, US people who aren't "Americans", do not deserve due process, the freedoms they claim to own exclusively, of which WE, are granted nothing of. See?, by not using evidence to from your guilty verdicts, how can it be therefore possible, to know, you've arrested, tried, then executed a mass murdering NEOCON war criminal? I don't think Americans could possibly be more disrespectful to God and country, Johnny and Justice right now, do You?

http://existentialistcowboy.blogspot.com/2007/06/911-culprits-why-towers-really-fell.html

/ / We know that a crime was committed on 911. George W. Bush, of course, quashed all investigations before they could begin. Since when are crimes not investigated? [...] It is not too late, however, to begin such an investigation. There is no statute of limitations on mass murder. \ \

We, as Humanity, have to rise against the neocon LIAR enemies who forsake the value of Human life. Death to the bushite, death to the enemies of America's America.

/ / Army Secretary Pete Geren asked a military review panel to decide whether Lt. Gen. Philip Kensinger, who led Army special forces operations in Afghanistan after the Sept. 11 attacks, should also have his rank reduced. \ \

A bushite demon CAUGHT aiding and abetting the crime of FIRST DEGREE MURDER of a trying to be Patriot Soldier, is made to fear in bushite amerka, he might face a reduction in rank! MURDER~!

/ / Congressman Dennis Kucinich, a member of the House oversight and government reform committee, which has been investigating war contractors. "Theres no democratic control and theres no intention to have democratic control here." \ \

Right. The demonic lawless actions of Aegis posing as al-Qaida killing police officers undermine freedom for Iraqis and Americans, alone with ALL the rest of US. All criminally gotten assets of lawless mercenaries will be hunted by every

police service; those that complain as traitors to Freedom as Justice, WE, the real Patriot warriors, committed to defensive measures, will be rewarded to bill for. IF! Johnny is recognized a Mythical King with money to spend better than a neocon saboteur. Your call... Reminder: The neocons in YOUR power, were never elected, nor, was Bush the demon enemy of all Human Life. A demon that says if you disagree with his blind blanket statements against innocent Life, YOUR a terrorist. At least with GOD, we'd be only killing criminals we couldn't otherwise defend ourselves from with evidenced conclusion through practiced Law judged fairly.

do the math - do the math - do the math - do the math

42 billion. 42 thousand million. Or, hiring maybe twenty or thirty bushite LIAR enemies, who blindly giving Americans pay not only billion dollar saleries, but also with their forsaken lives as unworthy of real protections. CNN, CBC, and FOXNEWS knows the bushmob did 911.

So, million dollar saleries? I doubt. Likely a neocon enemy or two robbing from an undefended America. Remember, Peter Power wants US to believe ALL of Scotland Yard would murder Brits for stolen bucks. Frankly chaps, I just refuse to believe such bullocks.

The part where pro-bush "American" soldiers drive over children to kill them for fun, all because they say our Humanity let's those responsible escape retribution for being Satanically evil as enemies to Christ, left me angered beyond words. While CNN, CBC, and FOXNEWS couldn't care less for those children, but will tell us, these 9 accident victims must rule, so far, two full days of wall to wall coverage. "Pro-Western" Allawi blowing up school buses for "CIA" money? Who cares? Really who cares in TV America for defending OUR children's lives I'm saying? Get me in the

We Have A Problem Here

Look, Bush closed investigations on 911 immediately, then started firstly on Iraq, for war mongering thieves, with General Ahmad escaping un-accosted for the neocon enemies. Not relevant? Your Constitution is laying undefended, a National act that can not be done by any other terrorist group but those who claim your freedom rights denied by bushite command. Not treasonous? Look Condi, the demon 911 nazi

witch PERSONALLY assisted in dropping more than seven million land-mines on Lebanon indiscriminately in Your terrorized dying names. Hate Life and God as yourself do You?

Don't anyone be deceived that the neocon enemies minimally assisted these crimes by refusing to allow US pursue the evil doers by following the actual crime scene leads, but we lack REAL leadership skills that are naturally required to see molten Iron flowing like water from the 911 towers on YouTube. Oh golly gee, who is that theatrical man from Canada with all the answers on Justice for Peace with Freedom Ruling Supreme? with atheists and everything? A brilliant man given next to no chance at receiving acknowledgment in Bushite media amerikan impires.?

Ray McGovern on 911 broadcast nation-wide on the coast to coast radio network "What we need here is an investigation. There are answers out there, but no one has pursued the answers." Similarly, there are questions that we isn't [allowed] figuring.

Death to the bushite instead of the innocent loved in God

/ / IntelCenter issued a tacit warning that the footage may be re-hashed when they released the "new" tape to the media, but they failed to mention the fact that they released portions of the exact same clips in October 2003. \ \ amazingly - I witnessed blurred-out faces of those they claimed al-Qaida in another instance just recently. (Then, look at the dog fight vids that CNN and CBC refuse to show the dog haters faces in..)

I say American taxing payer folks, flip me some dollars, and I'll pay out rewards - after a moderate lunch - all to take these IntelCenter AL-QAIDA! - AL-QAIDA! - AL-QAIDA! straight to public trial, then public execution for high treason - like holy fuk mon let's get real here People. Or don't and we die further for bin Laden's fear of cameras. Offer a 500,000,000 dollar reward for Zawahererri's crew to get the rest of this done quick like. I wanna rock! Death to the neocon enemy LIARS, death to those who WAR - WAR - WAR innocent Humanity for the continuing bushmob's escape plan from nowhere. See? Heaven or Hell? YOU DECIDE.

Don't EVER forget, the private company Aegis has been officially found dressing up as AL-QAIDA! - AL-QAIDA! - AL-QAIDA! to murder pro-western forces in Iraq, while desecrating Elvis. Elvis Presley. If you don't love Elvis, there is something seriously wrong with America. Now yous messing with a real son-of-bitch. HeY!, question: why don't Americans kill a bushite for Yourself bud? - because Bushites insist "we're" willingly being led by the antichrist enemy of all human life as Satanic LIARS who intend to cheat ourselves of freedom through self respect. Pro-neocon-media enemies are nazi savages, and I don't like it..How about you?

Time is Up

Al-Qaida Kagan "Al-Qaida, their whole strategy revolves around generating sectarian violence, because that is how they embed themselves within local communities "

What?? For friendship?

What is the demon TRAITOR to HUMANITY in America saying about the reasons he embeds an Iraqi under 50 odd divergent NEOCON labels? Wouldnt most Al-Qaida take great joy in killing a bushite nazi grunt like any real Family man would also? These LIAR dumfuk grunts who cheer "whore yeah", routinely, can barely read or write, so, how possibly does this FOXNEWS expert, expect such ungodly antichrist forces to delineate Al-Qaida from the local communities they PROVABLY indiscriminately bomb as Satanic?

Kristol and Kagan: Put Everything Behind Escalation So We Can Bomb Iran and Syria

Kristol and Kagan MUST be put to death for treason against America, treason against Life, treason against GOD. They both have continued to Publicly advocate murdering more innocent peoples indiscriminately they call, "Al-Qaida", all to rob further monies from an undefended America. It is easily learned by any as all, the victims of bushite tyranny are exclusively, US, The People, guilty of nothing but our shared love of GOD. Remember forever: there was NO JUSIFIED REASON for bombing PEACEFUL Samara, NONE! that bombers confess was done as ordered by Allawi INDISCRIMINATELY, all for getting killed Marines sent in later for more stolen cash from America. P2OG. [hundreds of bushited Marines died rightly almost immediately - (wow eh?)] A Satanic action, Kistol and Kagan, both blame without thought to question on "Al-Qaida".

The action of Satanic bushite bombers targeting Samara as war criminals is FULLY documented.

Death to the bushite neocon LIARS, death to the enemies of Freedom for Humanity. My beloved friends of GOD, please, when you see the mute bushite, kill it for Christ, kill it for Love, kill it to defend your loved family. (Any soldier who doesn't proudly talk of how it hunts those British soldiers who kidnapped barefoot children and victimized them on video, is a soldier worth destroying NOW to defend GOD and Life from needless death.) / / The US has also been backing some pro-western politicians like Iyad Allawi \ \

Do you know who Allawi is? Allawi confesses to blowing up school buses filled with children for "CIA" money. NOT THEORY. HE ADMITS IT AS AN ACTUAL SATANIC DEMON! Allawi, the truly insane mad man, confesses to having ordered the murder

of doctors and nurses that treated wounded god loving women and children from Fallujah. It was these DOCUMENTED acts that had him thrown out of 'the CBC, CNN, and FOXNEWS TV expert scene as workable', all for fears that US humans might actually wake the fuk up on WHO is Our True Enemies here. All three, pro-private-bank zionist news stations are well aware that the bushmob did 911, but lie to YOU as forsakenly dying for their growing riches and world wide broadcast fame.

CBC National Newz - July 11th 'tens of thousands have died in Iraq since the war against truth started.'

Anyway, these two Allawi incidences are fully documented, look it up, then demand the "The US" pro-western politician person quoted as supporting Allawi - be found guilty of CRIMES AGAINST HUMANITY, Demand publicly, having the neocon zionists EXECUTED by America, for America, as America. A Just America that defends America from criminal madness. Or don't. Death to the bushite, death to the enemies of Man I say.

ABCNEWS.com : FBI Called off Terror Investigations

A question Johnny Wizard has for America: Tell me, is this not a treasonous act - for Bush to close criminal investigations, immediately after the terrorist crimes of 911? Shouldn't the demon enemy be put to arrest for that godless act alone in this forsaken dying world? A world left instead suffering further the tyrannies of the war criminal ENEMY of all Human Life?

A refresher: the neocon will tell you openly, they live to lie to the Public for cheating and stealing by murder of US, innocent peoples purposefully enslaved by a made ignorantly entranced TV audience that is repeated reminded, we have no power worth respecting.

CNN, CBC, and FOXNEWS arent taking are calls presently, but just lie and tell US they do. Look to see, almost all political internet traffic condemns Bush straight to hell well he rightly belongs, but the polls still say no - WE, seeking for Just cause, are the minority.. just roll over and die for the neocon betrayers to god and country, life and loving.

-

George Bush "The same folks that are bombing innocent people in Iraq were the ones who attacked us in America on September the 11th"

George Bush 'Iraq has nothing to do with 911, you bunch of nazi dumfuk grunting LOSERS. Whore yeah - praise Satan - die America die. I mean... I love Jesus'

So it was as I thought too: the direct co-operation of the joint chiefs of staff assisting General Ahmad, in committing the murder of thousands in America on 911 for the neocon TRAITORS, as the same 'escaping' enemies today, responsible for 'secretly' ordering these indiscriminate terror attack bombings against YOUR Humanity for their continuing stolen pleasures as Satanic.

DEMON MURDERER PETER POWER TRIES TO LIE HIS SOCKS OFF ABOUT HOW HE MURDERS LONDONERS AS A FOR REAL TERRORIST RECRUITER

[letter written as signed by Peter Power to MSNBC et al.]

/ /It is confirmed that a short number of 'walk through' scenarios planed [sic] well in advance had commenced that morning for a private company in London (as part of a wider project that remains confidential) and that two scenarios related directly to terrorist bombs at the same time as the ones that actually detonated with such tragic results. \ \

Little Peter Power is threatening literally BILLIONS of US there. So.. what we a going to do my partners in living? Die or survive? Your call...

-

Petraeus quietly urged his commanders to "get the word out"

Homeland Security Committee Chairman Bennie G. Thompson

/ / Thompson continues by asking Chertoff to further explain what measures the country should take based on his instincts, "What cities should be asking their law enforcement to work double shifts because of your "gut feeling?" Are the American people supposed to purchase duct tape and plastic sheeting because of your 'gut feeling?'" \ \

Homeland Security Committee Chairman Bennie G. Thompson

NOTE: Americans are literally paying billions for Chertoff's THREAT of "gut feeling". Billions, while the neocon walk away from MURDERING Americans on 911 with the bushite on America's Coast to Coast radio network, claiming they don't know you know, nor, ever will. They'll tell you, blame the shadows in the New World Order, but don't rely on evidence to form your conclusions on who PERSONALLY is responsible for criminal actions against YOUR rights to be free as alive. Evil is real my friend, evil is real. Death to the bushite, death to the enemy LIARS of human kind. Death to the enemies of Love and God. Death to the enemies of Life.

OBSTRUCTING JUSTICE FOR AMERICA

Tony Snow "The executive branch is under no compulsion to
testify to Congress because Congress, in fact, doesn't have
oversight abilities."

IT LOOKS like they are going to attempt making the move of
BLATANTLY TREASONOUS war criminals acting to measurably now
destroy yOur Freedoms in godless America. The Satanic
neocon's 'faith', is in that YOU as an American, will watch
the same corporate drivel that offers next to nothing to
empower YOURSELF to speak Justly for a dying America. Instead
of demanding 24 hour, wall to wall news coverage, of war
criminals going down one by one by the will of Man to Justice,
CNN, CBC, and FOXNEWS will broadcast your blind 'belief' that
you are only a impartial viewer, who doesn't really care about
dying right in front of yourself for the zionist's riches, and
great worldly power of tyranny through lawless nazi bushite
censorship.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in

AMERICA HATES BUSHITE

Nationally broadcasted every day across America, Mr. George Norry publicly supports the murder of innocent Arab children, and I'm beginning to really hate a silent dying America for it. Speak to defend the innocent in this world American, or die yourself from self contempt.

Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man.

/ / "They can try to have their votes of no confidence," the president said, "but it's not going to determine - make the determination - who serves in my government."

MY government? Now that's entitlement. And you thought George Bush didn't have a vision for America \ \

Hitler, the mad man, wasn't as insane as our demon enemy George Bush Jr. is.

/ / The [BUSHITE ENEMY] US has said it would refuse any request by Italy to extradite the accused [satanic bushite torturers of completely INNOCENT PEOPLE]. \ \

Christ, The Son of Man, Begs the Godly Men of Earth

Christ, The Son of Man, begs the godly men of Earth, to judicially bill on sight, any neocon soldier who supports the carnage waged in Afghanistan as cop killing dope pushers. They shoot innocent women and children dead in the streets for humor, and bushite pirates at CBC and CNN, state bushite in Afghanistan are doing a good thing helping the bushmob escape the crimes of 911 by warring for Muslim fundamentalism, persecuting INNOCENT women and Christians, while for entertainment, bomb innocent families running for their lives from a Holy Church. Soulless child killing soldiers who CBC execs would tell are our DEMONIC heroes. Lawless dope pushing cop killers have got to go down dead screaming, instead of the innocent - YOU and me they target for MURDER. Death to the dishonorable bushite THIEVES, death to the enemy neocon LIARS of GOD and man.

We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt.

Kill a bushite LIAR, why don't you my brothers and sisters of the faith in something greater than bushite godless tyranny?

Brig. General David Fraser - former nazi commander of NATO who 'okayed' the bombing of defenseless innocent Afghan women and children for the Satanic enemies of Man, stated on CBC, he liked killing police officers, along with innocent women and children, (deliberately targeted for the pleasures of the demon antichrist) because, Afghanistan's children hope to learn. See? The bushite 'will' murder all our children and teachers on hope that we will never learn the Taliban, led by "Omar the Just", were loyal to Christ as REAL American Freedom, when publicly demanding evidence to form your conclusions. Thus is why the ENEMY to LIFE neocon state on YOUR TV and radio, WE must never be allowed to speak openly with the Taliban regarding the FACTS. Because if we did, neocon pension thievers would be hunted down in the streets for public trial, and then gloriously put to death by Christian values committed to TRUE freedom from lawless godless zionist LIAR tyrannies against Mankind - YOU included.

George Norry and Art Bell are the most evil of bushite, who as betrayers of the Human race, deny soldiers to know: General Ahmad funded Atta. They will both support the murder of Your American Son or Daughter for further zionist evils, before allowing true open line communications, to defend ourselves from the lawless demon enemies of Man. Do something about it, or don't. Let TRUTH set US free.

Instead of making an easy phone call today for your dying brothers and sisters, die as Satanic bad guy enemies of Life

on Earth, sacrificed in cowardice to the real demon
antichrist, and see if we, the true, strong, and free, care.
The Son of Man SCREAMS before coming home to GOD'S America:
We are coming to destroy Satanically lawless bushite enemies,
all for the love of God, we shall succeed my friends, we
shall succeed. I will not willingly live in a forsaken world
with LIAR zionist war criminals conning US to believe, God is
not Great, True, Strong and Just.

Die bushite die!

God is Great

Again, George W. bush did 911 with General Ahmad, but CBC
zionists, actual treasonous LIARS, actually smile to dying
Canadian soldiers with only true contempt. CBC kills Canadian
kids, with their intentional demon lies, trying to subvert

Justice for God and Johnny. In fact, yesterday, they did a special, all on how "God is NOT Great", giving that bush bitch demon LIAR, all the space to pontificate it's hatred for Wisdom, Science, and GOD, with only nods and smiles from the 'illiterate' hord. Blame innocent Jews the holocaust denying zionist shout, of which not one, is a Jew. Like me.

To Kill a Bushite, is to be Heroic

George Norry is a traitor to the FBI, who further plans more to die sacrificed under the censorship of the tyrant antichrist. Who cares I ask about America truly dying as neoCONNED, for George Norry has millions to not take your calls for protection, and honestly, 'Americans' couldn't care much less for Our Humanity's future. Love to God Gives US Strength

The Son of Man begs the Men of Earth to defend Ourselves from the unholy forces of our tyrannical enemies. Death to the ungodly bushite thieving LIARS, death to the ungodly enemies

of American children everywhere. GOD praises all Men, who kill the murderous bushite enemies of Just causes. The THIEVING satanic bushite forces, speak only contempt for GOD on our demandings of the public execution of the boastful terrorists, like the bushite who video taped the murderous assault of OUR kidnapped bare footed children, or murdered Iraqis while desecrating ELVIS, done all to please the "escaping" satanic demon antichrist zionist, Our Mr. bush Jr., who with his private business partner, General Ahmad, actually committed the ungodly treasons of 911 in a land of blind men sleeping., according to the eternally Honorable FBI anyway.

Death to the ungodly bushite thieving LIARS, death to the ungodly enemies of American children everywhere. GOD praises all Men, who kill the murderous bushite enemies of America's America. "The Liar" Hannity's America, can go it alone as treasonous liars, who boastcast a con to 'neutralize' America; 'finding' that we believe their demon lies about how one dies sacrificed 'Heroic' without any IMPORTANT questions answered. do we do?

To Kill a Bushite, is to be Heroic

To further murder as these ungodly bushite liars do today as our suffering Mankind, is to blindly swear public allegiance to the for real DEMONIC antichrist THIEVES. Bushite enemies are evil nazi dumfuk scum, liars who cowardly watch America in her weakness be high jacked, and squeak nothing for Just words in our REAL defense for dying. Play pretending their actually real men, because to really be so, requires real strength. Not bush bitch Marines "WHORES YEAH!" strength, where they cowardly can't figure to defend America from ungodly war criminals. War criminals who deliberately set them up with Satanic 'black magic' to be killed in criminal actions. P2OG. But see?, the bushite fodder, can't care enough for Life to read, because it already knows like the zionist, it's an ungodly coward and a thief, as siding to lying and censorship, this will out work for evil doers in the long run without any consequences to themselves as Our sworn eternal enemy.

Bushites 'think' that being Satanic brethrens for the LIAR neoCON, they'll die sacrificed not seen by all Patriot Warriors, as a dead coward - too fearful to stand as a godly Man for true accountability to living Life honorably. Cheney, McCain, and 911's gooliannie believe, You can only TV 'see' them protected Satanically by "Molech" [THEIR DEMON COG] Immune from REAL American Justice the bushite bray, We are told they believe so anyway. By Satanic command, 'inconceivable' to see the bushmob up on high treason charges... Oohh. Yeahhh.. I can see that going for real -

quite excitedly I am about saving innocent lives. So, let's get done what needs to be a doing to save ourselves, so we can get this talking all behind us now, and reach for something truly breath taking as awarding,

Your Servant,

Why should WE continue to silently die unjustly victimized?, for the bushite's contempt of Mankind censored?, the Eternal Son of Man to GOD forever answers correctly. We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt. Bushite tyranny is a dead end road paved with missed opportunity. change your evil ways in other words, and join the living side that's light to know what we are, in deed, looking at here under the dying spoils of bushite, "we pay" misfortune. To hell with Satanic demon devil worship by the President of the United States, We, the People answer, for now anyway, we have some really serious business just presently, and we really don't need to be any more reminded about Mr. Bush's satanic Devil, demon whoreship, of, "Molech", a religion practiced to deceive America into sacrificing our kids for cash with YOUR blood.... Tricked. Tricked. Tricked.

Nationless bushites who blindly war Life as the neocon enemies, war for the 911 perpetrators to escape American Justice. that is why I, as of GOD, cheer to hear the deaths of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

GOD, cheer to hear the deaths of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

The Haditha perpetrators, if convicted, are looking at serving, maybe, a couple of years, for freely confessing to the targeting MURDER, of innocent women, men, and infants.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man. - The Son of Man, as the Man of Men,

PEOPLE

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

Demon bush told us Saddam wouldn't let inspectors in, and that's why he irrationally started this war against God conflict. Impeach him, then have him PUNISHED for high treason against a further dying as truly unheard from America - for that lie alone - we ALL could/should stand together as equals demanding re-dress for the innocent murder victims who've suffered for such contempt, and belligerence for the basic precepts of freedom as Justice, or G-D as Johnny.

People of Earth, know, these bushite soldiers war Creation proudly with repeatedly committing aggravated felons, and South African death squad goons, all to war Love for the

neocon god haters. Who, as peenacking atheists, as their very own documents stress, would murder anyone of US for a stolen nickel.

Kucinich for President!
http://www.democracynow.org/index.pl?issue=20070524

Now, it's true, America's Alex Jones states Kucinich wants to take away all your guns, and is a communist, but, Alex as sometimes, is terrified of those who seek the requirements to defend freedom directly, as more specific. (Example: NWO isn't the name of the specific guy who financed 911 to murder America.) So, as a consequence, he gets near ridiculous with labels applicable to generalizations only dummies could believe blindly. With Kucinich campaigning on ACCOUNTABILITY, Alex Jones looks quite foolish. But, he's still trying. Thank god for that. Thank god for that. Talk radio in America should take open line calls on our ideas about how to actually plan to defeat these, found factually to be, traitors to God and Country.

McCain is some kinda demon enemy of God isn't he? To say publicly, he apposes torturing innocent people to death for the practicing Satanic bushite LIAR bad guys, leaves US thinking, shouldn't WE put McCain to death for OFFICIALLY sanctioning such criminality? I'd easily, without a second thought, put to death all those FOXJunkies in that debate audience who cheered from hell with JOY, the prospect of torturing innocent people to death, 'if it means' such IRRATIONAL action protects "American lives". See? the Magic TV and radio people refuse to allow me or anyone to think through such absent minded ungodly EVIL intent. Example: If you take FOXNews' word for it, and 'knew' your potential victim knows for sure of an impending terror attack... ... .. . How so? See? demon enemy f-cks, the ungodly bushite nazi vermin haters of Justice measured, [who steal in MY America as TRUE EVIL DOERS,] forbid such wisdom communicated as understood, for that would mean, we'd have to allow the real Victims more air time.

And wise poor men such as myself would command respect and gratitude.

and together, WE'D be hunting down those bushite liars who torture innocent people to death for their satanic pleasures. For, you know it does warrant the Death Sentence in America, right? (You can thank Reagan for that...)

Do you know how a crackhead finds itself? Lost by indifference to the ultimate, only goal, more dope. Freedom Fighter? or crackhead WHORE, who hopes to find a dollar 'somewhere' to stave off it's crackmaster, the "American People", led by the un-elected demon dictator, our criminal Mr. bush Jr., as the true enemies of all Mankind. Bushites are on serious dope to be so dumb as cowardly accomplices to a traitor of themselves, that they would die as, before actually defending God's America - that they gave an Oath to.

I guess a soldier's word doesn't count for much in bushville.

The bushmob did 911 as traitors to God and Country, don't you know anything worth living for? my dying unjustly brothers and sisters? My friends, please fear not wisdom communicated by a REAL Man, for, we explain ourselves to the best of YOUR ability to listen simply. G. W. Bush used no evidence to form America's "conclusion" on who did US wrong on 911. So, Please, stop forsaking yourself, for, we're going nowhere. Support Johnny's call to demand open debate without censorship from the magic radio and TV execs, who hide in darkness, pretending to be our friends, while refusing intelligent dialog to answer any of our big troubles easily. Why?

because largely, they're powerless without beating us down as giving 'Christ like' VICTIM so much - with their irrational ignorance for our survivals by the fittest. The fittest Ideas that rule this Universe, are the simplest, most easy to understand, but I digress about GOD'S greatness, for we know,. the corporate media elites as our voice, "Couldn't Care Less".

CBC just did a report about all the great heroin coming in from Afghanistan, that will still cause crime, and be illegal, (and maybe give you life in prison as an American,) but brought in with the help of the demonically evil bushite thieving murderous military, by the likely ton full to attack our direct family left un-protected, BY YOU PERSONALLY. And guess what? THEY, our media masters, couldn't care less if they actually tried to be our good guys. Reminder: the god guys is good, the demon liar antichrist demon enemies who thieve from Life with censorship is bad. If they hide ourselves too far, they loose all around, up and down. So get to it. Or don't. Your choice. Life lived Now, or damnable death by cowardly design brought forthwith under your own power to do nothing under such terrible costs against our suffering natures.

Typical tyranny for media control over all of Life for the beginners is this treasonous betrayal against our Nature, by refusing to be honest about our potential to be far greater than first considered. If they'd only allow US to have open communications, all our worlds would be better living for it.

Demand Coast to Coast hosts allow America to defend America.

I want air time with the one and only real man in these here parts, Mr. Johnny America, our glorious make believe creator of all we perceive religiously, self realized. He's a genius!

911 "truthers" don't want to address the hard evidence like the clear as day video of steel running like water from the WTC towers, for, as Humanity witnesses, they'd rather watch silently, children murdered indiscriminately, before, acknowledging wise godly men from our communities who speak ONLY facts on America's derision for real, open market Free communications - freedom fighters who ACTUALLY defend the innocent from the neocon bushmob traitors. Each day we hear of near hundreds of US murdered by the godless Satanic THEIVING "American" forces in Iraq. without near a peep of concern by "America". PRO-TORTURE Gonzales "I did not make decisions about who should or should not be asked to resign." [in mid-term]

As US State Attorneys?, whom have the most serious of American Justice Department Motions of Defense for REAL Freedom?, he's not concerned directly with?, nor would "like" democratic Peoples to be allowed to care either?. IF he gets HIS way he says - as minding for the criminal master. True, Americans are generally, extremely cowardly as Bush's freely giving PAYERS, led for more ungodly sacrifices in fascistic silence, but this continuing charade of incompetence gathering against our entire Humanity, is going way beyond acceptable to everyone concerning. Johnny Wizard conceivers and otherwise non-believers state together:

The Iraq war against Christ has no true justifiable cause.
Torture is against the law warranting immediate death sentences
The Zionist AIR FORCE bomb people indiscriminately as Satanic
The bushmob stole all the Development Funds for Iraq
The bushmob are stealing ALL of Iraq's oil
The bushmob stole 100s of billions from censored AMERICANS, while George W. Bush personally stole 50 billion from America in the first four months of stealing the initial election.

/ / "I grabbed her
little sister and put her in front of me . . as the bullets began to fly, the blood sprayed from between her eyes, and then I laughed maniacally." [, then were heard the cheers of

godless bushite dumfuk traitors obscening to God and Man as
the unholy enemy.]

What ever happened to butterfly kisses after evening prayers?

Are you telling me, an American Father, wouldn't gloriously
kill this lawless bushite enemy and his demonic ilk, for our
love of girls everywhere? Or, how about the UNARRESTED
soldiers we witnessed on video beat shoeless children
pratically to death while laughing and cheering? Or like
those that speak zero defenses for Haditha's confessed MASS
MURDERING irrational women and child killers? The REAL demons
CONFESS to going into a house, WITHOUT reasoned approach, and
slaughtering an entire INNOCENT family.. for nothing but
their lifeless SATANIC pleasures. The 'cause'? "The [mass
murdered unarmed innocent neighbor's] back door was open.."
To, for God, gloriously, with love, kill these unarrested
murderous continuing ungodly bushite nazis, is to war the TRUE
enemies of Humanity to save the lives of our precious loved
ones.

The Pentagon's Power to Jail Americans Indefinitely
http://www.jonesreport.com/articles/270307_pentagon_power_jail.html

Look, demon enemies of Christ torture innocent people for fun,
paid for by the silent American tax payer. Americans refuses
to bother making a simple phone call to Coast to Coast to
raise some concern. THEY don't. They refuse to hunt bushite
down in their streets for death to defend the innocent held
indefinitely against GOD'S will. Death to the bushite, death
to Johnny's godless, lawless, fascist enemies of FREEDOM.

Look, CNN, CBC, and FOx News know the bushmob did 911, but

CONNED by their demonic hatred for US freely communicated.
How do I know this? I made the effort of making the phone

pleasure of the president

US Attorneys don't serve "the pleasure of the president", they serve freedom lovers dedicated to defending America from willful criminality. But, americans are too stupidly weak to

demand Coast to Coast hosts allow open communications on America's highest of concerns. Bushite america would rather, in silence, thieve from God as our Humanity, than serve the protections of Justice as ourselves.

/ / According to the Islamic understanding of power, the Mujahideen don't compete for the positions in the leadership. \ \

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Hmmm. Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. The tribal strategy of Afghan fighters, where Allah is Oonerroh, seems to be not the only thing missing from the statements of this "Taliban" RELIGIOUS FUNDEMENTALIST top top top leader. Only "second" to Omar the Just. (Apparently an individual this current bushite incantation of "Dadullah" is totally un-familiar of.) Omar, the Just, whom Dadullah claims he receives his Top Secret nobody can see'im orders. In other winds: Bill a bushite for God and America, an all day long you'll have good faith in a world freeing ourselves of godless dumfuk tyranny implemented by the horribly foolish, as deeply ignorant of Allah, bushite demon liars for the traitor neocon. TRAITORS!

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. Omar the Just knew this to say so, as do I. And this is why corporate news professionals forbid me to speak openly without nazi censorship, ON OUR AIR-WAVES, because I am honorable, right, and true as believable. While America's fun guy, zionist George Norry, states to support PUBLICLY, the ungodly murder of innocent Arabic children for nothing but his personal contempt of YOUR DYING LIFE, while further wanting to invite thoughtlessly nuking places on Earth all for his secret hatred of US freely commutating. Typical bushite. Ending with to tell US again 'convincingly', that bin Laden did do 911 as a terror-ist bad guy in G's World!!?! How so? EH? How so? he don't care man, he don't care. He and his family have millions of dollars to sell you out, so why care for your struggle to survive in bushville soldiering? Frankly, George Norry is a total dickhead. True, he has lots of money in America, but he's still a dickhead nevertheless.

Alex Jones and me aren't on the best of speaking terms, but I will state, a desire to address every same challenge he has

adroitly addressed as publicly lacking. And when I am addressed 'officially', I will campaign to put US in the space to realize, we are the government, we are the people. We don't need to run to the hills and encamp ourselves away to defend ourselves to the max from the man, we are the man. I'm telling yeh, I know this to be so as the sea is we magically. Equal rights for all in God's name is self evident. Self evident to ME anyway... but well.. who am i?, right - I'll tell you as I have for more than a decade as a living fiction forsaken for lack of anybody anywhere understanding in totality what I am here on Earth as true Son to Man - a 'understandable' timeless stand in for G to gain recognition through as honest broker. [I've been everywhere around forever, and.. blahblah.. I know people really don't care to know of ancient wisdoms, truths that guide the order to the Universe, cause often they think I'm beyond their comprehension as a 'better than', when all power is in equal respect for others as our hurting brothers and sisters suffering with tyranny by our collective willful ignorance on Justice.[God's bestest is Just for every reason being thus]] I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really defend ourselves with.

Please my American friend, help US speak out freely Coast to Coast. So we together can start, on demanding Justice for all, as innocence in serious jeopardy. Dadullah is most likely an individual who holds at least some control over official military functions of NATO in the region. So, we're going to seed loyalties of the rare Patriots in the force to recognize our need to isolate who supports, not talking FREELY for peace easily in Afghanistan without question. No evidence was brought against Laden, therefore, the Taliban were True Patriots, and bushite traitors are pure racist nazi filth ridden, toxic, as being cowardly dishonorable as despicably evil, enemies to us all. Put US in Command.

Question the bushite, question to anyone who mumbles disagreement in the godly fact, that WE, as Humanity, will spend the better part of this next generation, hunting every last war profiteering nazi war criminal down for our real Freedom from their, so errorred "endless" tyranny of big money terror. Lawlessness with be outlawed, and ANY corporate american who mumbles otherwise, as an enemy totalitarianist, the clear ungodly, (as should be criminal,) will be put to challenge by their very own children, or parents, or bleeding dead brothers. Hannity must be tried for death as lying that the holocaust never happened from Iran. DEATH to the demon liar nazi fu-ker I say, DEATH to the demon liar nazi fu-ker.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

/ / "Those who negotiate in the name of the Taliban will be killed," he said. He did not elaborate. \ \ He's either with the proven cowards of JTF2, or the two or three "CIA" guys secretly hunting bin Laden in caves out there with tens of billions of dollars. SPENT EACH YEAR 'unknowingly'. (No reason why, but, they just can't tell You, as the paying for it really while DYING) Put US in Command.

/ / The Mujahideen aren't students of power and don't compete for power like others do. We are students of truth and work for establishing this truth and for this cause we sacrifice our power \ \

kill all of them

/ / In his testimony on Wednesday, Pfc. Bradley Mason of Company C said that on May 8, the night before the raid, Colonel Steele told soldiers to ``kill all of them.'' Three other soldiers gave similar testimony. \ \

I would offer rewards for more soldiers to come forward. Why? because there truly is, no honor among thieves. Every bushite soldier in Iraq for the liar neocon is minimum, a purposeless dumfuked cowardly thief. See? if you offer a reward, and they don't take it, their 'fellow' bushite, kill'em for it, right? why take the risk it'll cash in over your worthless life? For, who can trust a lying bushite nazi savage? certainly not a lying bushite nazi savage. In other words: speak against committing war criminal acts of lawless aggression in Iraq for Bush, as CLEARLY un-American, and I'll try to forgive you as human. Or, I guess you'll kill yourselves in mutually muted total contempt for this universal life as actually worth something.

When you see and hear on video, sexually dysfunctional, as sadistically satanic grunt puke pro-bush soldiers moaning, while deliberately killing innocent defenseless Family People running for our dying lives from a holy church, or as just simply anyone standing near the side of the road, then, my friend, you'll begin to understand what evil actually is. And, what needs to be done to seriously save ourselves. Seriously. Justice must be won sooner than later.

Five Star American General Johnny Wizard will train American Soldiers to recognize such demonic behaviors in combat as worthy of immediate frag to defend the lives of truly fellow honorable soldiers. Soldiers ACTually, committed to freedom from godless satanic dumfuk tyranny of the antichrist demon, Mr. evil personified, the UN-ELECTED 911 TERRORIST, George Walker Bush and CO..

/ / "He realized that they had killed these three [innocent] detainees, and in that moment, yes, he decided to help his [ungodly murderously nazi fascist] squad members, [escape Freedom through Law wisely practiced]" Gorecki said. \ \

There is much self evident truth hovering above the realities of such statements. For the exampled fact, that he did actually use a weapon against 'his' troops, 'to save them punishment', says a great deal more than they contend we hear. Now really, how ''we be dying as godless war criminals for demon LIAR Bush'' dumb is that? (and how does such an evil thing steal our military command in an un-defended Johnny's America? as a dying for bushite tyranny, irrational neocon war wanker? like holy fu-k..) Remember: evil is real.

The time is now.

Let Johnny Wizard on Coast to Coast everywhere god damn them man, get US on the PUBLIC radio to make something better of ourselves by communicating freely. Do it!

Praise Jesus, and pass the ammo forthrightly. I'm a hungry man.

YOU

"If the absence of violence is victory, no one will ever win."
http://cleveland.indymedia.org/news/2007/03/24652.php

I know, it's seems odd that I am, at the same time, offering
answers to any question on the science of God as is pertains
to Justice measured, but this is just who I am to be conscious
man. So, if we can get over the shock of me being so
especially normal, maybe we can then realize, I have some
simple good old ideas that transcend through time by rational
understanding communicable between any two people. I am not a
"miracle worker" to all those I advise to not eat Aspartame
because it's a poison that also makes your body crave
un-needed carbs, that will likely convert to more unless fat.
So, it slowly kills you, while making you fatter than you need
be along the dead end journey faithing in "the system". So,
why do some do it religiously? Who cares (for now) but to
say, our governments are failing US miserably. I spoke
personally with one of the head scientists in Canada at
"Health Food and Safety", and he told me the scientific
analysis done by reputable scientists I found freely available
repeatedly on the internet years ago, was completely true.
(It breaks down to formaldehyde, and methanol (a slow lethal
poison), among other shockers. Poison. P-o-i-s-o-n-s in our
food stuffs. Poisons.) However, he could take no action to
defend Canadians "officially" because we, Canadians, have our
corporate interest news departments completely refusing to
defend ourselves from corporate exploitation anywhere, and as
natural consequence, we, as the dying world, would together
unrepresented, probably lose a law suit from mutant Monsanto
through the self inflicted bounds of OUR censored WTO program.
- instituted through the top secretly mastered puppet people
persons of the 'unseen' NWO I guess.

I'm telling you, we need me as King.

Look: Aegis's workforce, for American PAYING profit, has been publicly disclosed through CNN to be shooting people in Iraq indiscriminately for your money, and when the Pentagon was contacted by Nick Roberts about what would be done, they responded, nothing would be done by Johnny's America but to increase the multi-hundred-million dollar contract with demon enemy Tim Spicer to continue. Now... why you ask? Because the neocon liars, steal money by lying to cowardly American kids about what they mindlessly, without thought, give their souls for. Tim Spicer openly hires South African goons to commit hardships for American GIs to die without end for, in lawless tyranny. Peace sells less money for the neocon war profiteers to murder the innocent American as. (Iraqis, along with the rest of Humanity's Men, WILL eventually learn this truth, or life for you will end.) As an Arab hating bushite, (like what you'd find as a publicly proud practiced hatred for all Humanity, by an Amerkan dumfuk soldier in Google's alt.religion.islam), they say nothing for Freedom by Justice, but root themselves to Spicer's monsters who like killing black guys, as world renown mass murdering racist nazi filth. That's why zionist Israel loves them so much.

Look: Somebody stole four trillion dollars out of the Pentagon.

Look: Greenspan STOLE four trillion American dollars for his international billionaire banker friends before 'leaving'. [Asian market chaos SCAM]

Look: Lotteries everywhere in North America are running the same PROVEN criminal scams that cost US ALL billions and billions of public dollars that, without question, (as MATHEMATICAL FACT), regressively destroy our dying communities. CRIMINAL. [Solution: 100 percent cash payouts.]

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played no part in 911. And video of iron running like water moments before the first tower fell is freely available for download all over the place. CBC, CNN, FOXnews et al. know the Bushmob did 911 in other words. I've spoken to most of those 'in control', and I'm telling you, they're losers, and they know it. Remember: they'll censor my voice to send YOUR child to die for no better good, or reason understood, while entertaining. Weekend TV in North America totally sucks. Now, why do YOU think that is brother? The more powerless they make US, the more money the neocon zionists can murder Humanity for, thinking they might just get away from this if we continue to take no action in defense of anyone as God would will. Let me be Your servant King, by backing me up some here. We need some dollars to eat, and I need it now before we starve to deaths.

Look: Barbra Bodine did the Cole bombing. [the Cole whose crew has been completely overhauled. Where are the many who served there NOW eh?]

Look: America has kidnapped countless thousands without evidence to be held against OUR will indefinitely. [Like the NOT Jewish Israel]

Look: innocent people are being tortured to death by those who hide OPENLY in America's uniform. [let US hunt them down for GOD, despite what demon lies they argue give them as Satanic to avoid "The Law".]

Look: the bushmob war profiteers STOLE the Iraqi Development fund

Look: the more than 10,000 security contractors for Bush are officially deemed lawlessly unaccountable to anyone - THINK ABOUT IT

Look: Negroponte PERSONALLY stole the Iraqi emergency water provision money

Look: Sattler OPENLY committed the worst war crimes of all Humanity's history

Look: I am a guy that is regularly denied public access to our national radio programs because I speak documented truths consistently on behalf of real honorable soldiers and police officers. I agree with most, if not all facts Alex Jones importantly brings to our attention, however, I almost as often, disagree with his conclusions.

Support my cause, which is your cause.

Senior Military analyst, Rob Riggle "In the field John, the soldiers are out there, every day, risking their lives, for a common Ideal: that none of the President's decisions be questioned."

This is more true than a bushite would admit before murdering a honorable father to rape his young child, like Lcpl Boudreaux freely confesses. Boudreaux will tell you, openly, you have to murder the Arab father of the Arab child your planning to rape, because if you don't, that Father will spend the rest of this life, hunting you down in the streets to rip you limb from limb for it.

Let US, me and the few, proud, and the brave, bring that Father's intent to bare on lancing Boudreaux, and any other who would sing in it's ungodly defense.

Zionist american media celebs do tell, everyday, soldiers for the neocon are all Heroes. (True Hero worship has long gone

dead, and simple common respect for the starving man of Johnny Wizard is almost entirely illusionary, but for the love of God has for me, the Son, to never stop caring religiously.) While McCainites advocate imprisoning any (chosen) man in America (with our familiar "Exploitation Units"), who has a picture anywhere on their computer of a fully clothed teen, while denying this following censored video of children being beat to death for fun and profit is real.

Please, my brothers, join me in hunting each and every bushite present in this video down for death. For a Love of God that will never end, until we have seen each and every responsible child killing bushite present brought to true Justice extreme.

George W. Bush:

"If the absence of violence is victory, no one will ever win."

But for those of us who would believe protection to be a heavenly good thing actually he means? What the. does he mean?? Find out!, in the new candid, let's talk politics interview, with no other than, PRESIDENT GEORGE W. BUSH.

Giuliani told ABC's Peter Jennings on September 11, 2001

'..and I was operating in there [75 Barkley St.], when I was told that the World Trade Center Towers were going to collapse.'

WTC TOWERS? "WERE"?

Did you know that the international Johnny Wizard comic book is out there? Don't miss out on picking up a copy for yourself, or your loved ones. And did you know, I'm trying to get on international radio without a censor to thunder my audience back into submission. I HATE HANNITY. All I want is free open debate to resolve this crisis, that doesn't have to be so ruining our dying worlds without questions forwarded by the dumfuks. Justice is Paramount through reason to be so. The Bush Administration have been up to no good, escaping for 911, that New York City should sue for. Hire me on as legal consultant buddies, cause I'm like near starving broke here, with supreme court challenges failing my cost factor, and hunger pangs slowing our progress on fighting unjust incarceration. I desperately need money, like now, as a gift, or an advance on a industry paid private consultant gig. Or, instead, maybe you'll idly watch some innocent person willfully be sent to prison by liars in your demonized name, to defend the ungodly evils of war criminal traitor, our Mr. Bush Jr. in foolish disguises. Your call Bud.

be Wiser,

Johnny Wizard - Patriot Liberator of Eternal Destiny
(i.e. REAL sustainability as self sufficiency)

(i.e. nothing is separate from existence ourselves, not even time, and Justice is binding to defend our lives if practiced fairly with it's elemental divisions through reason. Example: a person accused of a criminal offence, without any evidence, is INNOCENT. Those who say otherwise, are the actual terror-ists. Civilization's ancient Founder Hammurabi, suggested just to openly publicly have executed those who lay capital allegations without any evidence, while working to close outstanding criminal investigations. A made CRIME within ourselves Hammurabi claimed, and by thinking such ways, brought birth of 'Civilized' to an untamed till then, chaotic confusion. Old becomes again anew, because Americans are weak as polluted, and too cowardly to defend the rights of US innocent. Let's change that. Support my climb to international controversy, with my unchallenged claims of direct accountability being sought, for the 911's neocon war terror plot.

'A military judge ruled last week that Watada cannot base his defense on the war's legality.'

Telling US what?, that it is a crime to not commit a crime? It isn't only high treason against America the ungodly bushite

are guilty of, but of a madness held by those truly Satanic..

/ / 'Why are you taking pictures? You don't have permission."'
[...] the [bush whore] American, speaking through a translator,
warned him that he did not want to see any AP photos published
anywhere.\ \

No bushite was found gloriously killed for country, yet, they,
the godless bushite enemy, continued to shoot innocent People
indiscriminately for a distance of six miles, while likely,
secretly masturbating each other as bushite liars do always.

The pro-bush irrational military said only eight innocent
un-armed Afghans were counted as murdered deliberately, by
those who believe our Mankind, can not ever find themselves
accountable, without zionist controlled, corporate news
permission. See? The military counts mankind as zionist, but
I am a man of real men, committed to defend our world from all
enemies, foreign, or domestic. Unlike a bushite traitor to God
and America, who's word, as Oath, means as much to them, as we
do. Ungodly as they are loveless, the bushite, is Life's enemy.

See my friends, this is why I, as the Son of Man beg and plead
for all able bodied men, to kill treasonous bushite on sight,
for every time you love God by defending the innocent from
murder, (the innocent whom any pro-bush corporate professional
hold in total self contempt,) you save REAL peoples lives, and
you defend God's good name to love God as ourselves committed
to true Liberty. Bushites are enemies of freedom, enemies of
God, and worthy of death, before allowed to further bomb
people indiscriminately like the commanders of NATO order day
after day without risking instant frag because, bushites are
blind cowardly thieving nazi fascist savages, brain damaged,
who believe as satanic demon whores of Molech, they can con
all of US including me forever, just like dare dubya. Dumfuks.

promoted through the tyranny of censorship

Corporate News America's Terror Expert, Gaffney, who publicly advocates the rape and murder of the innocent in Iraq to thieve from for the 'escaping' neocons, (as the truly UNGODLY,) stated these words about why American Soldiers continue to lawlessly DIE sacrificed for no better good or reason understood, as total willing dumfuks under deep hypnosis:

"It is not George Bush, it is not the Neocons"

"," = swinging pocket watch

Don't let these neocon zionist bastards doe this to US.

Any Commander that doesn't support the arrest of those responsible for 911 and the subseqent neocon war crimes of Iraq, is a traitor to God and Country.

How much much God take as taken, before you people get on over this criminally empowered war monger Congress of an unelected lawless dictator demon, and call them out on the turning talk commercial radios, all to finally truly defend ourselves with a good media plan for results.

-

Sir Ken, head of the Crown Prosecution Service

"The fight against terrorism on the streets of [..] is not a war. It is the prevention of crime, the enforcement of our laws and the winning of justice for those damaged by their infringement."

You got that right. So, join US in demanding the quick trials, and public executions of known bushite enemies who murdered Americans on 911 with general Ahmad, and who with Peter Powers, murdered the innocent in Britain for more stolen goods against God. And anyone in the air force as bushite bombers should be a great joy for US all to hunt for prosecuting too. The bushite dumfuk is an enemy to our lives, with it's blatant naked contempt for the innocent, who like the demon liar THEIVES at CJOB, George Norry, or Hannity, will forbid ANY human defenses of the lawless dictate of the IRRATIONAL tyrannical demon antichrist, all so to victimize more of You as the censored forsaken.

REPENT. [from the Greek, meaning to think.]

The TRUE Son of Man Johnny Wizard Exists Born to this Eternal World to end permanently demonic bushite enemies of Creation. Help Life out by destroying cowardly America's greatest threat to the Species, the greatest threat against Humanity's Freedom to be Loved by God. Corporate nazi zionist bushlores at CBC, CNN, and criminal thieving from the desperately poor in Winnipeg CJOBers forbid open communications, and I can't 'take over', because then I'd be defeating my own, power to the Peoples argument. So, it really is up to YOU, yes you there... reader. Who.. really..? YOU, here, now. Life begs, takes a stand for your fellow man, and demand our voices heard for the defense of the entire human race. And be quick about it. Repuglicons don't want freedom from endless war where they kill your forsaken kids, for we all know, bushites would be publicly tried, then spend the rest of their treasonous lives behind bars broke, or dead from lethal injections made popular in America. Again, officer Bowman is responsible for letting 'escape' those from Fort Detrick, who attempted to murder the American Congressmen who thought going into lawless tyranny, !makes no sense! Where is corporate America on our issues when OUR free speech is ruled by the irrational evil minds of Limbaugh, Bell, and Norry?!?!! Back to Bowman: Bowman, also is responsible for sabotaging the Moussaoui warrant. And, how much you wanna bet, he's probably the same bushite who found Atta's passport, and likely had all 19 names of the high-jackers to give CNN, CBC, and FoxNews just like the neocon's "bin Laden" would have too. Take the

publicly prancing bushite enemy out for questions by yourself, if he doesn't plead his defense publicly on Coast to Coast by tomorrow. Remember, there ain't an "Intelligence" group worth their salt on the face of our Earth, that doesn't know exactly what I'm doing here honorably for a real Justice made through careful thought. So, support Johnny Wizard speaking for public challenges internationally, and with the 23 plus co-operating for life 'Intel' agencies, along with, anyone else who can join in on the call. as a growing number of Patriot Soldiers, who trust yourself to see, this wanting of Justice isn't complicated. A person accused of a terrorist event without any evidence, has our accuser a bushite, who should be watched carefully until verifiable conclusions are done by the understanding of fact. Not faith. With George W. Bush making real decisions in faith, expecting us to believe as corporately broadcasted unabashedly unbiased, that he is not a deliberate incompetent monster war criminal of unfathomable evil?, who is just too 'stupid' to understand why we are innocent until proven otherwise?, is really something we all need to scream about to save our dying lives.

"[..] just like the neocon's "bin Laden" would have too."

However, the real Laden, on video taped confession, claimed he played no part whatsoever in 911, then later, offered himself for arrest, confident he would be acquitted. Not corporately newsworthy though, so, few even know why their American child was later died in the terrorists act of corporate contempt for US living Freedom with something greater as real Justice wills

Yours again,

King Johnny Wizard

CONTACT

/ / IDEA: Let's get our show up and running, by allowing open public investigations To be conducted internationally, with open line challenges, so we can publicly isolate each and every bushmobster personally responsible for 911, and then, all of everything else still left outstanding murdering ourselves. Whatdoyahsay?? \ \

Art Bell, the zionist enemy of Life, wont allow free communications with the established facts though,

What do you think? Are you truly all alone on this?

Again, more than half of the money being spent on demon Bush's wars against life's reason for being, is completely left un-accounted for thieving. Not spent to offer dumfuk cowardly

soldiers help hunt to kill bushite rapists and torturers. Stolen American values Just like the bushite soldier on the ground, who after gunning down innocent people in the street, go through our pockets to steal the spared change. Kill a bushite for the love of God why don't you my American Patriot brother and sisters?, today!

Again, my friends, Art Bell and George Norry have thousands of bushite dumfuk in America that will phone them to tell US how greatly they are to have no care for dying freedoms in America. While when the humans call, Art Bell for example, between breaks, when privately screening his calls, just hangs up on anyone he fears might articulate things like Ahmad funded 911's Atta, according to the FBI, in defense of America. I say, we at LEAST, talk about putting them both to death for treasons against Your Life dying teen soldier, wannabe Patriot. Make sense?

Again, corporate nazi america states 30 percent of America supports the ungodly George W. Bush's demon antichrist action, when in truth, it's less than one in a thousand. it's just CBC, CNN, CJOB, and Art Bell the liars ain't taking our calls for enlightenment. just like they treat the innocent in Palestine for zionism's encouraged racist in-action. For what does a fan of 'we're the best' Coast to Coast radio network family know about nothing after we witness them froth at the thoughts of nuking countries, or calling for enemies, none of us here in North America have any real problems with?

People of Earth, know, these bushite soldiers war Creation proudly with repeatedly committing aggravated felons, and South African death squad goons, all to war Love for the neocon god haters. Who, as peenacking atheists, as their very own documents stress, would murder anyone of US for a stolen nickel.

5000lbs of radio-active toxic waste that will murder for years more like, while after, then striking again to get the god helpers and screaming children, then even, as in Fallujah, going house to house to murder every one, young and old as the truly Satanic. Just obeying lawless orders to thieve from Humanity as bushite for neocon zionist traitors of G-D doesn't fly in the big book. When anyone kills a bushite, all humanity benefits truly from the defense. You defend a real suffering God by ending a soulless bushite threat against our species.

Exit strategy to save the lives of dying Americans:

War bushite LIAR zionist repuglicons who did God wrong on 911

War bushite who LIE to American Sons and Daughters to not hunt those who stole billions with ear-marks, Social Security, no-bid contracts, Iraqi oil, ect.

War those who stole the Iraq Development Fund, and the emergency monies left to save the lives of our dying children

War bushite who feed soldiers radio-active toxic waste as harmless

War bushite who support torturing the innocent to death

War bushite who sing about the joys of murdering Iraqi children

War bushite who beat to death barefoot Iraqi children

War bushite who jokingly beat lamed dogs for fun

War bushite who claim they are lawlessly un-accountable as liars.

War bushite in the air force who target bombing innocent People like in Fallujah or Somalia with land mines and mini nukes

The godless as lawless bushite is the enemy to America, kill it proudly for freedom, as an undying love for a real God and Humanity.

How Bush misled the world

http://www.theage.com.au/handheld/articles/2004/02/05/1075853996640.html

/ / Once the document was declassified after the war it became
known that it contained 40 caveats - including 15 uses of
"probably", all of which had been removed from the previously
published version. Tenet further ingratiated himself by
remaining silent about the OSP. "That's totally unacceptable
for a CIA director," said Thielman. \ \

Thielman meant "totally unacceptable" as in HIGH TREASON.
Could it be any higher? Deliberately caught misleading
whore-dumb Congress to wage his immoral neocon 'escape' with a
unjustified criminal brutality against God as all of our
Humanity. A great deal more than a million innocent people
have been victims to the 'targeted' Zionist killings of the
irrational bushite enemy. Lawless enemies to Creation,
spreading their toxic waste who thieve, rape and murder
without reprimand from corporate news america, shall, I pray

daily, die justly in vengeances by the will of a real undying
Love for our victimized innocent family. Justice for Humanity.

Please, help US.

Let US demand open radio
communications on the mathimatical facts to save our own
selves further victimhood to their personal contempt for the
true value of YOUR life. Thanks.

Can you help us speak this outrage to your local media outlets?

thanks again bud.

AFFIDAVIT

AFFIDAVIT OF JOHNNY WIZARD

I, Johnny Wizard, in the city of Winnipeg, Province of Manitoba MAKE OATH AND SAY:

1.

Pakistani ISI Director General Ahmad orders an aide to wire transfer about $100,000 to hijacker Atta. Ahmad later resigns after the transfer is disclosed in India and confirmed by the FBI. [Dawn, 10/8/01, Times of India, 10/9/01, Wall Street Journal, 10/10/01, AFP, 10/10/01]

2.

On March 3, 2002, MSNBC's Jim Miklaszewski reported that he had received anonymously, top secret presidential war strategy documents dated September 9th, 2001, originating from Condolezza's office, outlining a strategy to invade Afghanistan premised on blaming bin Laden a terrorist, but providing no evidence to back up the allegations, thereby guaranteeing criminal invasion. Only workable if Laden pleads innocence to a crime that hadn't yet taken place, a crime serious enough to "justify" sacrificing American GIs truly for a liquefied natural gas pipe line for pension thieving Enron. ["The Dahbol Working Group" and Bridas] Any evidence for any offense would have been sufficient to have Muslim fundamentalists hand Laden immediately over, as they had offered [as others of other nations had also] repeatedly during the Clinton years.

CBC and CNN have still, to this day, consciously refused to do any follow up on the intelligence, deciding instead on behalf of dying people everywhere, our public devolvement of a just society.

3.

RTI News - US rejects Taliban bin Laden evidence calls

The White House has rejected requests from Afghanistan's
ruling Taliban for proof that Osama bin Laden was responsible
for last week's attacks.

The US Government said there would be no negotiations.

October 9 2001 - The Times of India

"While the Pakistani Inter Services Public Relations claimed

that former ISI [the "Pakistani CIA"] director-general Lt-Gen
Mahmud Ahmad sought retirement after being superseded on
Monday, the truth is more shocking.

8.

No evidence was brought against Laden for nine eleven, none. [So according to Bush's official top secret Presidential directives] While Laden himself claimed he played no part in 911. Still, to save the lives of third worlders on the brink of starvation,

9.

former FBI deputy director and murder victim John O'Neill

"the main obstacles to investigating Islamic terrorism were

U.S. oil corporate interests and the role played by Saudi Arabia."

10.

Alex Jones interviewing Former German Defense Minister Andreas Von Buelow

"Bush signed W199I months before 911 ordering the FBI not to stop Al-Qaeda. They threatened to arrest FBI agent Robert Wright if he tells us what he knows."

11.

Mr. Bush was quoted somewhere regarding Mr. Laden's guilt of complete innocence with "We don't need any evidence, we know he's guilty."

12.

www.govexec.com/column/forwardTodaysColumn.cfm?sectionID=14

" [FBI's] Edmonds concluded that documents clearly showed that the Sept. 11 hijackers were in the country and plotting to use airplanes as missiles. She said documents also included information relating to their financial activities. "

13.

The honorable Argentinean oil company Bridas' relationship can not be understated as the Bush Administration's primary motive on criminal invasion of Afghanistan to save his biggest corporate backers, the American pension thieving Enron.

33.

Blix nor Elbaradei, nor Kofi, suggested, implied, or stated, that Iraq had failed to comply with the newest U.N. resolution: 1441.

HANS BLIX: "And at this juncture, we are able to perform professional no-notice inspections all over Iraq and to increase aerial surveillance..."

With complete, one hundred percent access to go where ever the Bush Administration pleased without delay, left a situation of an unjust war only detrimental to an ability to bring about any good or better thing. American soldiers are being sacrificed for no better good or reason understood, for if progress will ever be made, it will be when they work to bring about a political situation that was there in Iraq before the Bush Administration starting murdering innocent people for nothing . Well, not completely, for Bremer shipped 19 billion to Greenspan early on, then, hundreds of millions were sent back.

The atrocities you mention will have to wait in line for an apology behind Dresden (hundreds of thousands of civilians firebombed to their deaths after the war was decided), behind Vietnam which is still being poisoned after the US saturated their land with the extreme toxin Agent Orange (bet you haven't seen the footage of Vietnamese children born without limbs etc. on US television), behind My Lai where rough tough US soldiers herded nearly 200 women and children into a ditch and mowed them down with M-16's and machine guns - gosh let's throw a another parade for our "heroes"!), behind Palestine who's people are slaughtered as a matter of course with US made arms, bombs and planes by US toady Israel (or more accurately, the US is the toady nation of Israel), behind Cuba whose nation and people have been destroyed by the vindictive economic warfare waged against it by the US, behind Iran whose people were forced to endure the terror of the totalitarian dictatorship of the Shah (who was a CIA puppet they placed into power their engineered coup), behind...oh hell I don't have the rest of the night to type so I'll stop there.

Don't hold your breath waiting for an apology. Tyranny doesn't apologize. What is really pathetic is Americans think their government really represents good.

Google "Smedley Butler's War Is A Racket" and in the few minutes it takes you to read it you will know more about American history than 99% of Americans. Like I said, truly pathetic.

The non-profit group Just Foreign Policy says the number of Iraqis killed since the start of the U.S. invasion will soon top one million. The group's estimate is a rough update of a scientific study conducted by researchers at Johns Hopkins University last year, which concluded that 601,000 violent Iraqi deaths were attributable to the invasion as of July 2006.

Hey, that is so many FEWER hearts and minds you have to worry about winning over and with the ever rising cost per heart, it saves the US taxpayer a huge bundle of money.

Sometimes you have to kill all the people in order to liberate them. In Vietnam they destroyed countless villages and their occupants in order to liberate them. We all now know what a great success that episode was.

Does it really matter? If my Degen 1103 works perfectly well... and
is supposedly/presumably the same as the Kaito 1103... should I be
aware (or gasp, worried) that Tecsun makes it/them?

In North America, department stores market electonics/appliances under
their own brand names that are manufactured by someone else (whose
name is generally kept obscured).

The Degen name apparently cannot be marketed outside China because of
some sort of German brand conflict.

So wot's the Big Deal?

I sense an American "Red Baiting" scare in the earlier part of the
thread.

I can understand why your "contacts" wish to remain anonymous
considering the absurdity of their lie. More than 2500 civilians died
in the first three days of the invasion. The carnage caused by the
thousands of cruise missiles launched by the US at the outset didn't
discriminate - killing more woman, chilldren and other civilians than
soldiers.

Of course at a cost of $1,000,000,000 per missile, manufactured by
General Electric a subsidiary of NBC, the corporate media didn't
bother to report that. Gee I wonder why?

by Anthony F. Kirkpatrick, MD

Dr. Daniel Greenwald, a plastic surgeon, and I have just received U.S. government approval to fly medications from Tampa to Cuba.

We are the first to be granted such permission.

I am certain the American people would be voicing their opinions loudly if only they were better informed about the U.S. blockade on food and medicine to Cuba.

Unfortunately, the U.S. government has corrupted the entire process of informing us and Congress about the Cuban embargo, as evidenced by the blatant lies coming from its ``official'' guardian of worldwide human rights. Each year the State Department is mandated by Congress to prepare a 1,000-page report on human-rights violations in every country on this planet except, of course, one -- the United States.

POLICY IS SINISTER

When the U.S. government is questioned about the consequences of its embargo, the responses have been troubling. For example, on May 12, 1996, Secretary of State Madeleine Albright responding to a question from Lesley Stahl on 60 Minutes stated that it is ``worth it'' to kill some 500,000 innocent children to eliminate a political opponent.

The State Department knowingly has made false and misleading statements to Congress and the public about the Cuban embargo to obfuscate its role in violating the most basic of universally recognized human rights.

The U.S. sanctions policy is sinister to its core. I've witnessed children vomiting several times a day, because the U.S. embargo blocks drugs required to treat the side effects of cancer chemotherapy. I have seen a child die of cancer because the embargo had blocked him from receiving a drug called pegaspargase, which is manufactured only in the United States.

The U.S. embargo on medical supplies is not the only evil inflicted on Cubans. The United States contributed to massive suffering in Cuba with its embargo on food through the implementation of the 1992 Cuban Democracy Act. This legislation was unambiguously calculated by the United States to hurt people in Cuba. The American Public Health Association testified against the bill warning of ``widespread famines.''

Five months after the passage, a food shortage contributed to the worst epidemic of neurological disease this century. More than 50,000 of the 11 million inhabitants of Cuba suffered from optic neuropathy, deafness, loss of sensation and pain in the extremities and a spinal disorder that impairs walking and bladder control. This was identical to the syndrome found among American POWs facing starvation in Japanese prisoner-of-war camps during World War II. The World Health Organization praised the Cuban government for its aggressive mass distribution of vitamins to curb the outbreak.

A WHO official who investigated the epidemic reported: ``Cuba has invested more in health services than almost any other country, and it has a higher health profile than the United States.'' He said that a humanitarian catastrophe was averted only because the Cuban government maintained a high level of budgetary support for primary and preventive health care to all its people.

The U.S. government counters that the embargo should be maintained because of human-rights violations in Cuba. Claims of massive abuse of human-rights are dishonest. A recent report by the prestigious international organization Human Rights Watch condemns U.S. exaggerations.

Rabid anti-Castroites need to find another excuse for maintaining the embargo. Logic tells us that the longer the United States maintains an embargo on the basic necessities of life, the more the world will rally to Castro's side, providing a crutch for any failures by his government.

Now is the time to push U.S. lawmakers for the truth about the medical embargo against Cuba.

Anthony F. Kirkpatrick, MD, Ph.D., is a physician at the University of South Florida in Tampa. He wrote this article for The Tampa Tribune.

Little bitty Japanese garbage trucks,,, (I want one! I can haul my Goodwll store junk around in it.My raggity old 1978 Dodge lonnnng wheelase van stays full of Goodwill store junk all the time) those great big garbage trucks around here, (sometimes, I have heard and seen them as late as 11:30 PM rolling down my street.One time, about four months ago, one of them garbage trucks broke down right in front of my house.I went out there and asked them if they needed any help, tools or whatever) you could put two or three of them little bitty Japanese garbage trucks in American big a.s garbage trucks, with plenty of room left over.

Back to the Dresden firebombing thingy, Hitler firebombed Coventry,England.Coventry was a very important manufacturing City, Aircraft and things.Churchill didn't let on to Hitler that he (Churchill and America) already knew Coventry was to be bombed because that would have let Hitler know about Bletchley Park, Enigma machines, reading/decypherying the Nazis code.

I figure we didn't do any worse to Dresden than what Hitler did to Coventry and London.

General Electric is a diversified technology, manufacturing and services company, which produces transportation equipment, aircraft engines, consumer and industrial appliances, lighting, nuclear reactors, medical equipment and plastics. It owns the NBC television network, a global media powerhouse with significant holdings in broadcast and cable television and the Internet. GE's financial and insurance divisions account for nearly half of the company's sales, making the company one of the largest financial services companies in the United States. The company has operations in more than 100 countries, a workforce of more than 315,000, and 2002 revenue of over $131 billion. GE ranks fifth in the Fortune 500.

Not surprising given its size, GE spends considerably to advocate its interests. In 2001 and 2002, the company spent more than $31 million lobbying Congress, federal agencies and the Executive Office of the President on issues touching on virtually all aspects of its operations: defense appropriations, environmental cleanup, energy, science and technology, aviation, banking and finance, telecommunications, domestic and foreign trade, foreign relations and taxation. GE spread its lobbying business among many individual lobbyists and lobbying firms, both in-house and outside. It spent $16 million on overall lobbying in 2000, twice what it spent in 1999.

GE was established in New York in 1892 when Thomson-Houston Electric Company merged with Edison General Electric. Inventor Thomas Edison was one of the company's first directors. Early products included light bulbs, elevators, motors and kitchen appliances. By 1980, GE had reached $25 billion in revenue. In the 1980s, under the stewardship of CEO Jack Welch, GE acquired NBC, Employers Reinsurance and CGR medical equipment. In the 1990s, GE began selling mutual funds, formed the MSNBC cable news channel with Microsoft, bought aircraft engine maintenance firms Greenwich Air Services and UNC, and acquired Lockheed Martin's medical imaging unit.
Iraq contracts

GE's reconstruction activities in Iraq were not disclosed in documents the Defense Department provided to the Center for Public Integrity in response to a Freedom of Information Act request. Media sources, however, indicate that GE has or had post-war business dealings in Iraq. For instance, it was reported in April 2003 that GE Energy Rentals Inc., a division of GE Power Systems, was supplying temporary electrical generators to the U.S. military in Iraq. GE Energy Rentals, based in Atlanta, rents power generators, heating and cooling equipment and light towers. It was launched as a separate division in June 1999. The company refused to divulge the value of the contract.

Afghanistan contracts

The documents the Center received from the Defense Department revealed that GE was awarded a contract worth $5,927,870 from the U.S. Army Engineer District, Philadelphia, for "gas services." News releases available on the Defense Department's Web site, however, go into greater detail. For example, the contract is a firm-fixed-price contract awarded in February 2003 to GE Energy Rentals Inc. to provide prime power services at Bagram and Kandahar airbases. The contract is to be completed by Nov. 30, 2004. Seven bids were solicited for the contract in December 2002, and two bids were received.
Government ties

Before joining GE in 1993, Kenneth V. Meyer, a vice president of GE Aircraft Engines, was a major general in the U.S. Air Force and served as director of Air Force contracting at the Pentagon and chief of staff for Air Force Systems Command.

Senior Vice President, General Counsel and Secretary Benjamin W. Heineman Jr. served at the Department of Health, Education and Welfare from 1977 to 1980, completing his tenure there as assistant secretary for planning and evaluation.

Sam Nunn, a GE director since 1997, was a Democratic U.S. senator from Georgia from 1973 until his retirement in 1997. He served as the chairman and ranking member on the Senate Armed Services Committee and the Senate Permanent Subcommittee on Investigations.

Francis S. Blake, a former senior vice president at GE, served as deputy secretary of energy from May 2001 until he resigned in April 2002. He played a key role in the formation of President Bush's controversial national energy plan, but resigned after less than a year on the job. He attracted criticism for holding a series of policy meetings that were dominated by energy industry representatives. Prior to joining GE in 1991, Blake had been general counsel at the Environmental Protection Agency during the final three years of the Reagan administration and, prior to that, deputy counsel to former Vice President George Bush and deputy counsel to the Presidential Task Force on Regulatory Relief.

Former CEO Jack Welch was a George W. Bush supporter and a major Republican contributor. Two weeks before his inauguration, Bush invited Welch and other CEO's (including Enron's Ken Lay) to Texas for a summit. Bush reportedly considered Welch for a Cabinet position and, in the summer of 2001, sent members of his administration to lobby the European Union in support of GE's proposed merger with Honeywell, which the EU ultimately rejected.

Throughout 2001, California Congressman Henry Waxman accused Welch of intervening in NBC's 2000 election night coverage and pressuring the network to prematurely declare Bush the winner. Welch admitted he attended an election night party at NBC's headquarters and that he

cheered for Bush but denied interfering with coverage decisions. When the major network and cable news division heads were called before Congress in January 2001 to account for the election night debacle, the president of NBC News offered Waxman access to internal videotapes made of Welch on election night, only to withdraw the offer just days later.

Around the time of the 2000 election, when the Environmental Protection Agency was deciding whether to order GE to clean a section of New York's Hudson River allegedly despoiled by waste products expelled from the company's industrial plants, GE spent millions on lobbyists, campaign contributions and advertising. GE's cadre of lobbyists included several former members of Congress, including George Mitchell and Robert Livingston.
Legal Action/Investigations

In 2002, the Project on Government Oversight released a study of misconduct by the top 43 government contractors. According to the study, GE ranked at the top of the list of "repeat offenders," with 63 instances of actual or alleged misconduct since 1990 resulting in more than $982 million in fines, judgments and out-of-court settlements. GE's reported acts included environmental violations, fraud in dealings with the government and consumers, workplace safety violations and employment discrimination.

In December 2001, the Environmental Protection Agency ordered GE to clean up a large section of the Hudson River in New York. The EPA ordered the company to dredge the river for suspected cancer-causing substances called polychlorinated biphenyls, which GE plants discharged in or near the river for nearly 30 years. The cleanup is projected to cost $460 million. In all, GE bears at least partial cleanup responsibility for 87 active "Superfund" toxic waste sites around the country.

In 1998, GE Capital agreed to a $97 million settlement for allegedly inducing consumers who filed for bankruptcy protection to pay debts they did not legally owe. In 1992, GE agreed to pay $165,000 to settle a suit alleging the company engaged in deceptive advertising with regard to its light bulbs. The Occupational Safety and Health Administration cited GE for at least 858 workplace violations from 1990 to 2001, including at least 98 that posed a substantial probability of death or serious physical harm.

In 1992, GE was forced to pay a $69 million fine-one of the largest ever for a defense contractor-after pleading guilty to defrauding the government in the sale of F-16 jet engines and support equipment to Israel. For this transgression, GE's Aircraft Division was suspended from doing business with the government for five days. In the late 1980s, the Inspector General of the Defense Department established a special office to handle the workload generated from GE defense contract violations. In three years, this office handled almost 400 cases and recovered more than $221 million from GE.

Updates

As of March 31, 2004
Per the Center for Public Integrity's FOIA request, dated June 30, 2003, the Center has recently received the Army Corps of Engineers contract awarded to GE Energy Rentals Inc., of Atlanta, for work in Afghanistan. The documents confirm that the GE's contract was awarded on February 4, 2003, at a value of $5.9 million and is to provide prime power services to U.S. airbases in Bagram and Kandahar, including the mobilization, installation and maintenance of generators, breakers and transformers. However, according to the contract, the completion date differs from that originally reported by the Defense Department. In fact, the contract stipulates a one-year period of work in Bagram from March 31, 2003, with four one-year option periods through 2007. The work in Kandahar was to begin simultaneously, but run only through May 31, 2003, with three three-month option periods. Due to "extreme weather delays," the start date of the contract was changed to no later than March 25, 2003.

On May 21, 2003, the completion date for work in Kandahar was extended through the first three-month option period, and the total value was increased by $605,043 to $6,532,913. On July 31, the monthly energy charge was adjusted for a net contract increase of $74,919, raising the total to $6,607,832. On August 28, energy charges were further increased and options extended for work in Kandahar. The fifth and most recent amendment to this contract, as indicated by documents provided to the Center, is dated September 12, 2003, and provides another increase of $193,661 for equipment requested by the government. At that date, the contract had reached a value of $6,801,493-a net increase of $873,623 from the original estimated contract value, six months after its initial award.

I'm not saying that the U.S. embargo on Castro's Cuba is right or wrong. But hell, there are over two hundred other countries in the world that Cuba can trade with and in fact is trading with many of them, including Europe and Canada, and the other Latin American countries. If Cuba is not getting medical supplies, it's not because the U.S. isn't sending them any.
The U.S. is far from being the only source of medical supplies and food in the world.
If I was Cuba, and the U.S. wasn't sending me something I needed, I would just go and deal with somebody else. How about Communist China, France, Canada, Germany, Spain, Venezuela, Columbia, Mexico, Argentina, India, Russia, Sweden, etc. etc. etc.
etc..... or one of the other 190 + some odd countries in the world???

Don't go blaming the U.S. for Castro's own failures. Castro has had more than forty years to adjust his economy and make trade arrangements around the world. But, like every communist country that refuses to open up the country to some economic freedom, Cuba is a economic basket case.

"Now is the time to push U.S. lawmakers for the truth about the medical
embargo against Cuba." Ha, Ha, Ha!! Well, the Miami Herald could try telling the truth.

You weren't quick enough! Randy beat you to them, and the cooler of
beer.

Tunnel diodes were supposed to be excellent mixers, with low noise
and good IMD characteristics. In fact, the IEEE proposed a sat TV
service in the late '60s, using 30 foot sat dishes, and a tunnel diode
mixer front end. I was so expensive that it was never built.

On the other side of the coin I had a GMC pickup that was sucked at
60,000 miles and it was always maintained properly.

The rocker panels rusted out at 45,000miles,even though it was
rustproofed at the dealer ship
Also had a Ford F-150 v-8 and the front end needed a rebuild at 8000
miles and no these vehicles were never worked , strictly recreation
and everyday drivers,so that put me off NA products and I drive
NOTHING but Toyota and Honda now and dont have these early bio-
degradeable problems anymore.....just normal wearout and
maintenence

And as far as buying Japanese cars is treason ?If you study the
archives in Washington D.C.you will discover that the US cut off the
oil to Japan in the far east thereby putting the Japenese backs to the
wall and forcing an attack on the US.

Ther are many hypothesis about Roosevelts actions and some say he did
this to get the US into the war to help out Great? Britain.

Otherwise the US public would NOT have approved of getting into ww11,
but Roosevelt needed something to fire up the populations anger....
thence their approval.

Yes, put it on ebay, you should get plenty of bids for it, if you keep your
turds for 14 days, I can't imagine what a filthy state your home must be in.
Advertise it something like, big turd from filthy turd horder, maybe even
put a buy it now on it.
Whats youe ebay ID? pigheaded_asshole or similar I expect

That's nice, but it's merely a Superadio III... I believe they're discussing the
Superadio+, (model 7-2882_).

Wrong model. It's not a 288*7*, but a much older *GE* 288_2_ and the 2882 was not an analog tuning radio, it was direct entry frequency synthesis.

World War Two officially ended in 1951 when Truman signed a peace treaty with Japan.

I was nine years old at the time.I remember an announcement on our radio and in the newspaper about that peace treaty with Japan.

I remember I had a crush on Elizabeth Brookham when I was in the sixth grade at school in 1951 too.

We cut off their oil for good reason -- we objected to their genocidal
slaughter of millions of civilians.

So, how did he do it? (if in fact he did/does) What frequency of radio waves does/did he use? How can I burn salt water with high frequency radio waves? Does it require a special high frequency radio waves generator, or what? The World will never run out of salt water.Well, it can, but thats another story.

Yep David,

In the Flat Lands of Oakland California there are at least
250, 000,000 Watts That's-250-Mega-Watts of Noise
Generators very near by -wrt- Salt Lake City.

Hello All.

You may wish to read the article on page 20 of the September 2007 issue of POPULAR MECHANICS. It discusses a new wireless approach for the transmission of electricity within your home. The article is entitled "Electricity Unplugged." The frequency being transmitted in 10 MHz. Does that sound familiar to you?

Best,

Joe

I have the Popular Mechanics magazine right here, it showed up in my snail mail box three days ago.I subscribe to that magazine and Popular Science magazine.(ever since 1949)

I will Quote the aricle, it says,,,,

Wireless Power Transfer Is Old News- more than a century ago, Nikola Tesla built magnetic coils that transmitted power without cables.But, Tesla's coils also tended to expel burst of superhot plasma.This past June, MIT researches announced their own coil-based breakthrough in wireless electricity-called WiTricity-that's mercifully plasma free.WiTricity exploits a phenomenon known as magnetically coupled resonance, which allows two objects resonating at the same frequency to exchange energy efficiently.The team was able to wirelessly power a 60-watt light bulb using a pair of 20-in.-dia.copper coils.Drawing power from an electrical outlet, the source coil created a magnetic field, which was 7 ft.in diameter, transmitting at a frequency of 10 MHz.(Many cellphones by comparision, operate at 2 GHz) Seven feet away, a receiving coil was also resonating at 10 MHz, pulling enough energy from the field to power an attatched light bulb.Because it transmits at such a low frequency, WiTricity's magnetic field passes through intervening objects, and doesn't appear to pose a threat to people or pets.Within five years, the team hopes to release a commercial product with better power efficienty, a larger field and more compact coils, capable of running multiple devices.
Unquote.

That's always been the standard assumption, but would a ground invasion have been needed?

I've always wondered why we couldn't just starve them into submission. We could have continued the incendiary and saturation bombing of Japan, continued to bomb their cities, airfields, factories and crops, bombed any ships trying to bring food into Japan. Japan had very little natural resources in general and virtually no petroleum in specific. We CONTROLLED the air and could have starved them into submission without landing a single ground troop.

It may have taken a few more months than the milliseconds of the bomb, but do you think it could have worked?

Bullshit. Thee were roughly 600 thousand deaths in Dresden in *one

Joe,
Thanks for the tip. Is this what was done at MIT? (Been out of town and
haven't had time to read the article yet). If it is the MIT "invention",
do they say how they get around the "Inverse-Square" law? You can
violate any laws you want -- except for the laws of physics...

VOA has mostly been gutted. What is left only plays music. There may be a handful of freqs using News Now, but I doubt they are very many. Right after the Soviet Union collapsed the VOA was eviscerated, with the institution of News Now and eventually a full switch to music only. The IBB is concentrated on the Middle Eastern music services Sawa (for Arabs) and Farda (for Iran) and the Al Hurri satellite channel that nobody watches. Their heart is in the right place, but nobody listens, so they're a failure. Even worse, Iran doesn't bother to jam Farda, but jams BBC Farsi-the final insult.

Churchill wrote he prayed the night before for the attack on Pearl Harbour to succeed because Roosevelt needed something to get public opinion on his side.

Excuses for war and power grabbing totalitarianism are everywhere. The Reichstag fire in 1933, the Polish attack on a German radio station in 1939 and more recently, 9-11, are only two examples. Note that these events don't even have to be genuine, just well presented.

I agree it could have worked

but the act of a single bomb doing that much was impressive

that I have have heard rumors that Hiroheto (phonecticaly) was enough
of scienceist himself (botnay to reconize dimmly the bomb for what it
was and when we drop the second belived his nations only days away

7-2880B is the model number of my General Electric ''Superadio''.

That chrome looking stuff that used to be on my radio long since went the way of the wilderbeast years and years ago.I used to take that radio to work with me when I worked at the auto/truck/lawn mower/MG batteries, battery factory that used to be in Florence,Mississippi.(the little bitty town of Florence is a thirteen miles drive South [[South is always best]] of doggy's couch, Highway 49 South.The town of Florence is growing, y'all would be supprised, new homes and roads are being built there all the time nowadays.A buddy of mine and his wife live in Florence) That battery vapor in that factory took almost all of the chrome looking stuff off of the radio.One time, Joyce Creel (at the factory) accidently knocked my radio over and bent the antenna.I strightened it out good enough.

AI,

In many Countries the new majority of the Population
is under age 25 and the VOA is going after the Next
Generation of Shortwave Radio Listeners : Who are
in-fact Internet and iPod Listeners. It is a 'trend' that
many former Government {Sponsered} International
Shortwave Radio Broadcasters are following.

(cramed full of old radios) Yes, I do own a General Electric Model P-780E radio.The radio is in nice physical and cosmetic condition.It is a radio that I bought at the Goodwill (I shop fashionably at the Goodwill store.In fact, I am going to stop off at the Goodwill store tomorrow afternoon on my way to the Wal Mart store, food department) years and years ago.Somebody had wrote their name on the inside of the battery cover thingy, it says, Dot Speed.

There used to be a Goodwill store down town on Palmyra Street.That store closed down about seven years ago.I used to cut around a different street which led over to another street.I used to see a sporty looking old 1960s or 1950s British convertible car that was backed into a garage by a house on that street.It was ovious that car haden't been driven in many years from the coat of dust on that car.I haven't been over in that part of down town Jackson in about seven years.Every once in a while, I tell myself I ought to go check on that car.I think it is an old Austin or Healy, or something like that.I know where there is an old Sunbeam convertible car near me, but that car is too far gone, bad condition.There is a guy who owns a Volkswagen shop near me, he deals with old air cooled engine Volkswagens.A week ago, I saw an old 1960s VW Karman Ghia car over there on my way back home from the food store.I might check on that car too.

Excuses for war and power grabbing totalitarianism are everywhere. The
Reichstag fire in 1933, the Polish attack on a German radio station in
1939 and more recently, 9-11, are only two examples. Note that these
events don't even have to be genuine, just well presented.

In hindsight, perhaps not (though it is hard to know for sure).

But conclusions based in hindsight were not a luxury available to the
US government in the summer of 1945.

We were going to try starving them too. In the period between the A-
bombings and the planned invasion, roughly 10 million Japanese
civilians would have starved to death had the war continued.

Unless they understood the futility of their situation, got wise and
capitulated after the first million or so. ;-)

America used to send the Vietnamese a lot of bleached white rice, it was one of our sekert weapons.Bleached rice has very little nutrition.When I buy rice at the food store, (I am going to the food store at about 1:00 PM this aftenoon, soon as this 13 Rue Madeleine movie is over) I always buy unbleached rice.

American Troops never lost a single battle in Vietnam.Congress cut off the funding.

Modern technology and all that stuff.I would like to see the steam engines make a big come back for cars/trucks/vans/suvs/whatever.Think about it,,, high frequency radio waves to burn salt water to create steam for steam engines.Steam engines only need forward, reverse, and neutral gears.Steam engines produce full power at start, very simple engines.

Hi all.
George is serving the remaining time that is due to Volusia County, FL
from his original arrest back in November.
It is in his Probation Judgment in January 2007 that he serves more
time. He was to report on August 1, 2007
He will be in for hopefully 20 days or so.

His old website (SlotCrap101.scam and Licensed4fun.CON), is updating
the "Buy Now By *DATE*" because of a HTML routine he coded way in the
past.
None of the Payment links are working and haven't for a long time.

MILAIRCON hasn't been updated since his judgment either.

I guess there are still some fools out there that sent him a check by
mail. That is their problem.
Again... No business on the Internet for George and he goes to jail
for a long time.

So long....

691. Eye-Ear Gauge of your Antennas Signal-to-Noise : Let Your Ears ans Eyes Decide

Eye-Ear Gauge of your Antennas Signal-to-Noise :
Let Your Ears ans Eyes Decide {Relative Merit}
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/14222
.
Here is a Ear-and-Eyes Measurement of Signal-to-Noise Ratio :
[Simply using your Radio and Two Antennas]
.
1 - Tune to your Target Signal {Frequency} and Record the S-Meter
Reading and your 'impression' of the relative quality of the Sound
that you are Hearing : Excellent; Very Good; Good; Poor; and Weak.
- - - Do this for Both Antennas.
.
2 - Tune-Off that Frequency by 10 kHz and Record the S-Meter
Reading and your 'impression' of the relative Noise that you are
Hearing : Loud-Roar; Roar; Normal Static; Soft-Hiss; and Quite.
- - - Do this for Both Antennas.
.
3- Repeat this process for Several Target Signals {Frequencies}
across a Shortwave Band and sort of Average-them-out for that Band.
.
4 - Next repeat this process for Several Shortwave Band that
you regularly Listen to.
.
NOW - You have your comparison to gauge for yourself the
"Relative Merit" of your Antennas Signal-to-Noise.
.
* * * EXAMPLE * * *
.
Antenna # 1 - Linear Two-Wire Windom
* Target Signal on 13800 kHz with S-Meter reading of S8 to
S9+10dB and Very Good Audio.
* -10 kHz Down S-Meter reading below S1 and Soft-Hiss.
* +10 kHz Up S-Meter reading below S1 and Soft-Hiss.
.
Antenna # 2 - Multi-Element (Rotor Cable) Horizontal Wire
* Target Signal on 13800 kHz with S-Meter reading of S9 to
S9+20dB and Very Good Audio.
* -10 kHz Down S-Meter reading of S4 and Normal Static.
* +10 kHz Up S-Meter reading of S3 and Normal Static.
.
Note - Both Antennas use a common TV type 300 Ohm to 75 Ohm
Balun and RG6 Quad Coax Cable.
.

FWIW - Antenna # 3 - GreerTech Coax Cable 13 Foot Loop
* Target Signal on 13800 kHz with S-Meter reading of
under S1 to S1 and Fair Audio.
* -10 kHz Down S-Meter reading of under S1 and very Soft-Hiss.
* +10 kHz Up S-Meter reading of under S1 and very Soft-Hiss.
However with the Icom IC-R75 Receiver's Pre-Amp turned "ON"
* Target Signal on 13800 kHz with S-Meter reading of
under S3 to S7 and Fair Audio.
* -10 kHz Down S-Meter reading of S2 and Hiss.
* +10 kHz Up S-Meter reading of S2 and Hiss.
.
- -
.
ALTERNATIVE - Another way of Gauging the relative Noise of
your Two Antennas is to Tune to your Target Signal {Frequency}
about 5-Minutes before it is ending the Shortwave Broadcast
on the Frequency. Record the Before and After Readings and
'impressions.

There were roughly 25,000 deaths in Dresden in one night -- due to a
firestorm started by UK bombers.

US bombers were focused on hitting the railyards, a legitimate target,
and had nothing to do with the firestorm.

Hi
I am looking for a decent portable sw radio, something with decent
specifications
I have as way of a trade-swap

Lowe HF-150

or a

Palstar R30

I would swap either one of them, they are both in as new condition and have
all that came with them when I purchased them new. including original boxes.
I will ship worldwide no problem, I live in England
reply via email if intersted please, to
raymond_harris11@msn.com
thank's
Ray

I choose Polesoft Lockspam to fight spam, and you?

An HF-150 or R30 in exchange for a portable? My guess is you won't
have any trouble finding someone to take you up on THAT offer!

699. PMA Micronesia soon back on 4755?

From the Pacific Missionary Aviation (Micronesia) homepage
http://www.pmapacific.org/ministries/radio/index.php

Our station has its official permit from the Department of Communications &
Transportation, FSM National Government. Both FM and short-wave
transmissions have been on the air for testing purposes during the months of
February and March 2007.

Since July 2007, the FM station is on the air permanently. The short-wave
station will be broadcasting the same program.

So possibly also SW 4755 will soon be back.
The logo on that page shows "The Cross" - maybe that
name is used as an ID.
Their current FM schedule seems to be 6 am - 12 pm
local (1900-1300 UT).

(Jari Savolainen, Kuusankoski, Finland via DXLD)

This is certainly very good news as Micronesia would be a NEW country on the
NASWA Country List.

In my opinion the Radio Shack 12-903 is similar in design, with very similar performance, but in a package that is far more solidly built. Its audio sounds at least as good and is powerful. Battery life is the same (250 hours). Provision for external antenna. Controls don't wobble around and the platic case is more substantial than the GE which feels 'cheap' in comparison.

My General Electric P-780E radio has two screws on the back for an external antenna.And it has a little round white push button that says LITE for dial light.I don't remember if the radio works or not.I will have to scrounge up some batteries and check it out.I think it does work though, it's been years since I tried it out.It really is a nice looking radio, and it is heavy.I only paid three or four dollars for it at the Goodwill store.Sometimes AM radios are better than AM/FM radios.

Excellent, the world needs a source of truth, we certainly aren't getting it from the corporate controlled media in the "LAND OF THE FREE AND HOME OF THE DECEIVED..."

Is Communism Dead?
Lee Wha Rang - 09/21/96
Some Western press and politicos have been saying that "Communism is dead" and that North Korea is the only remaining "Stalinist" country - which too is about to collapse.

The fact is that Communism is very much alive. Communism has not died, but it's main ideas have been absorbed into other political ideologies, just as pre-Christ religious beliefs were gradually adapted into Christianity and other religions (In fact, on e finds many Christian ideals in Communism.)

Where is Communism alive today? There are 'Communist' parties in many countries, but only few governments today are controlled by so-called 'Communists' (Cuba, China, N Korea, Vietnam, and a number of the former Soviet-bloc nations). It may sound stran ge but many Communist ideas are alive and well in the United States (there is 'Communist Party of USA' which has a presidential candidate for the November election) and other democratic, socialist and indeed, dictatorial nations.
Is America Red?

In the good old 'anti-Communist' US of A, one finds many Communist ideas in practice as expounded below: Ten Communist planks implemented in America.

Communism USA

1)Abolition of property (rights) in land and application of all rents (taxes) of land to public purposes Zoning, School tax (from Property "rents") Equitable interest in land, no alodial title. No free holders. Accomplished: 14th Amend U.S. Const. 1868. Title 17 health and safety code.
2) A heavy progressive or graduated income tax. 501 (c)(3) corporate churches/businesses. Income tax - IRS (Title 26) Fed. tax can take up to 88% of income. Social Security. Public Property (state police powers). Accomplished: 16th Amend U.S. Const. 1913. Social Security

Act 1936. JHR 192, 1933
3) Abolition of all right to inheritance. Limited inheritance via inheritance tax. Accomplished: Estate tax 1916
4) Confiscation of the property of emigrants and rebels. Confiscation of drug-merchant property "War on Drugs" IRS confiscation of private property without due process. RICO Act (Racketeering Influenced & Corrupt Organizations) Imprisonment of "terrorist" and those who write or speak against the government. Accomplished: Public Law 99-570 1986. Established 1970. Sedition Act 1798 also used in 1940's and 1988.
5) Centralization of credit in the hands of the state, by means of a national bank with state capital and an exclusive monopoly. Federal reserve Banks. All local banks use credit & are members of Fed. reserve System and regulated by the U.S. Govt. Federal Deposit Insurance Corporation (FDIC). Accomplished: Federal Reserve Act 1913. Federal Reserve Act 1933.
6) Centralization of the means of communication and transport in the hands of the state. Interstate Commerce Commission. Federal Communication Commission (FCC) US Civil Aeronautics. Federal Aviation Agency (FAA). Accomplished: ICC Act 1887. The Commissions Act 1934. Est 1938. Est 1958.
7) Extension of factories and instruments of production owned by the state, the bringing into cultivation of wastelands, and the improvement of the soil generally with a common plan. Anti-trust Acts. Department of Commerce and Labor. Dept. of Agriculture. Dept. of Interior (Bureau of Land Management, Forest Service, Bureau of Reclamation, Bureau of Mines, Nat'l Park Service, Fish and Wildlife Service). Accomplished: Established 1 902. Established 1903. Established 1862. Established 1849.
8) Equal liability of all labor (for the National debt). Establishment of industrial armies, especially for Agriculture. "Two income families" because of inflation and National debt. Woman's Suffrage. Affirmative action. Socialist Unions. International Workers of the World (Chicago). Accomplished: Women in the work place 1920's 19th Amend., U.S. Const. 1920. Civil Righ ts Act 1964. Established 1869. Established 1905.
9) Combination of agriculture with manufacturing industries, gradual abolition of the distinction between town and country, by a more equable distribution of the population over the country. Farms lost to "the suburbs" and manufacturing/commercialism. Perverted technology/ corporate farms. National farmers Alliance and Industrial Union. Accomplished: 1880-1990's (Title 17 "Zoning") Took hold 1910-1990's/ 1870's-1880's.
10) Free education for all children in public schools. Abolition of children's factory labor in its present form. State run, tax financed schools. Socialized/progressive education. Child Labor Act, Pennsylvania. Children now work with State approval. Abolition of private education. Accomplished: Horace Mann 1837-1848. John Dewey 1870-1910. Established 1848.

Communists or Nationalists?
It should be noted that not all 'Communists' practice the Communism in the 'pure' form envisioned by Marx and Engels. Stalin used Communism to enslave and hold together the Soviet Union. Mao Zedong used it to obtain funds and support from Commintern unt il his excommunication, Gen. Li Tong Whi (a Korean anti-Japanese partisan leader) joined the Party in order to be eligible for Lenin's rubles, Ho Chi-min joined the Party to feed and equip his anti-French troops. Both Mao and Ho hated Stalin's haughty at titude toward the 'fraternal Communist Parties', and both men had approached Uncle Sam for money and weapons, only to be rebuffed by the 'anti-Red' State Dept.

North Korea's Kim Il Sung joined the Communist Party in his teens and worshipped Stalin. The S Korean troops which occupied Pyongyang in 1950 found Kim's office adorned with numerous portraits and statues of Stalin. But Stalin's lukewarm support for his war efforts and even less support from Stalin's heirs put dampers on Kim's love for the Soviets. Kim realized that the Soviets were just another breed of imperialists looking for suckers.

After the Korean War, Kim became more nationalistic and less Communistic. He purged pro-Soviet Koreans and the old-guard Communists from S Korea and devised his own political ideology - juche. This earned him much scorn and derision from the 'authentic' Communists who broke ties with N Korea. For example, the Japanese Communist Party opposes N Korea, and the former Soviet Communist Party shunned Kim Il Sung.

While Communism was used by various nationalists and dictators, the 'anti-Communists' used it to their advantage. Communism has never been the monolithic evil Empire out to enslave every one. Domino theories and 'evil empires' existed only in the minds o f politicians who were more interested in protecting their dung hills than facing the truth.

Those who talk about Hiroshima and Nagasaki because there were
"Atomic" do not understand the truth about the Fire Bombing of Tokyo.

Fire Bombing of Tokyo in World War II
http://en.wikipedia.org/wiki/Bombing_of_Tokyo_in_World_War_II#Firebombing
"The death toll was at least 80,000, and perhaps exceeded 100,000.[4]
This may have been the most devastating single raid ever carried out
by aircraft in any war including the atomic bombing of Hiroshima, and
the firebombing of Dresden."

- What are the lengths of the horizontal wire and windom

Steve,

End-Fed-Windom Antenna :
- - - 63 Feet Long and 18 Feet High
http://groups.google.com/group/rec.radio.shortwave/msg/4fd01f0524bceec0
Linear Two-Element Horizontal Wire Antenna 63 Feet Long
Laid-Out : South-East to North-West (Far End) from the
Back of he Roof of the House to the Backyard
TV 'type' 300 Ohm to 75 Ohm Matching Transformer
RG6 Coax Cable Feed-in-Line about 25 Feet Long
- - - a la John Doty
.
? Why ? Two End-to-End "Linear" Horizontal Wires ?
MT:============----------------------------o
24 Feet Twin Lead and 39 Feet Litz Wire
.
* The 24 Feet of 300 Ohm Twin Lead is connected
across the 300 Ohm Side of the Matching Transformer.
* The 39 Feet of Litz Wire [50-Strands of # 41 AWG]
is connected to one side of the Twin Lead. - Note the

other side of the Twin Lead is not connected at the
Far-End it Floats in Parallel.
* The Total Length is 63 Feet for the Longer
* Note the Shorter Wire is 24 Feet and it's Far-End
is not 'connected; and this "other' Side of the Twin
Lead Floats in Parallel to the Longer Side.
.
Sort of : Acts like One Wire -and- Acts like Three Wires :
* 63 Feet ~ 1/4 WL for 75m Shortwave Band ~ 3.9 Mhz
* 39 Feet ~ 1/4 WL for 49m Shortwave Band ~ 5.9 Mhz
* 24 Feet ~ 1/4 WL for 31m Shortwave Band ~ 9.4 Mhz
.

- - - - - - -
.
Multi-Element (Rotor Cable) Horizontal Wire Antenna
- - - 25 Foot Long and 22 Feet High
http://groups.google.com/group/rec.radio.shortwave/msg/7332309d2eacf536
Four Element Flat 5-Wire TV Rotor Cable 25 Foot Long
Horizontal Wire Antenna - - - a la John Doty
Laid-Out : South-West to North-East (Far End)
22 Foot Up about Two-Feet above the Back Roof
TV 'type' 300 Ohm to 75 Ohm Matching Transformer
RG6 Coax Cable Feed-in-Line about 25 Feet Long
.
o---X 50 Feet Two
X---X Wires Folded
X---o 25 Feet Wire
X---X 37.5 Feet 1 1/2
X----------------------o o---------------------X Wires Folded

The preparations for war were made far in advance of Pearl Harbour. The
US needed the attack in order to make an excuse for war.

==========
And, in early 1941, under instructions from FDR, a plan was designed for
initiating an aggressive war involving the firebombing of Japanese
cities in 1942. In the fall of 1941, the Japanese tried to offer a
variety of peace plans to the U.S. to forestall war, but the president
refused to consider any of them, including an offer by the Japanese
Prime Minister to meet FDR, anywhere the president chose, to find a way
to prevent war.

Fact: On January 27, 1941, the American ambassador to Japan warned
Washington that the Japanese were planning an attack on Pearl Harbor, if
negotiations broke down. Later in 1941, a Korean lobbyist, considered a
reliable source of information, twice warned that an attack on Pearl
Harbor was being planned during November and the first week of December
1941, including December 6, the American code-breakers had intercepted
Japanese messages that clearly pointed to an imminent attack on the
Hawaiian Islands. These intercepted messages were seen by FDR and other
cabinet members.

Exactly. If I recall, Spain accepted all the US demands and war STILL
happened. Randolph Hearst had seven million acres in Mexico, some of it
oil producing, so he had a huge interest. He may well have blown up the
ship to help his cause.

As for Tonkin, RHF and 'Ace' call the government admission of lying as
merely a media fabrication. None are so blind as those who will not see.

Point-of-Fact the Circuits may be simular
BUT they are NOT the same [.]

Some have 'claimed' the the RadioShack Radios are
GE Suoeradio IIIs packaged in a RadioShack Shell :
This is NOT the Case [.]

For the time period that their were make the RadioShack
Radios were most likely made by Sangean and are a
Sangean design to 'approximate' a GE Superadio III at
a much lower cost.

As not so 'super' as the GE Superadio III is : It "IS"
better then the Radioshack 'want-to-bees' ~ RHF

KUDOS TO THE ELCA!!!

A.W.S.
President
Gay, Lesbian, Transgendered Shortwave Club

CHICAGO (Reuters) - Homosexual Lutheran clergy who are in sexual relationships will be able to serve as pastors, the largest U.S. Lutheran body said on Saturday.

The Evangelical Lutheran Church in America (ELCA) passed a resolution at its annual assembly urging bishops to refrain from disciplining pastors who are in "faithful committed same-gender relationships."

The resolution passed by a vote of 538-431.

"The Church ... has just said 'Do not do punishments'," said Phil Soucy, spokesman for Lutherans Concerned, a gay-lesbian rights group within the church. "That is huge."

The ELCA, which has 4.8 million members, had previously allowed gays to serve as pastors so long as they abstained from sexual relations.

The conference also instructed a committee that is developing a social statement on sexuality to further investigate the issue. The committee is scheduled to release its report in 2009.

Since the ELCA was founded in 1988, the group has ordered three pastors in gay relationships to be removed from their ministries. The most recent case was decided in July when the ELCA's committee on appeals voted to remove an openly gay pastor from St. John's Lutheran Church in Atlanta.

The gay clergy issue has become a flashpoint in other faiths, including the Anglican Church. AP

Dear Telamon,

If it is indeed a joke on someone's part, it is not funny to me. Were this technology, with the parameters mentioned in the article, to become commonplace, that would mean the end of shortwave radio reception.

Dear "RHF,"

There were two variants of the original GE Superadio Model 7-2880: the first one without a strap to hold the batteries in place (they fall out if the battery cover is even loose) and no antenna screw terminals, and the second one with both of those improvements. Otherwise, the two variants are identical and carry the same model number.

I have a Degen 1103 SW Radio that is in very good condition with all accessories.
Only thing missing is the flipped down plactic stand on the back. Looking to trade for an older SW radio with SSB ability. Will consider the DX-440, DX 392, DX 390, DX 394, Drake SW 1, or any similiar radio. I use to own the DX-440 and miss the larger size for my radio shack. Look to ship only in USA. Thanks.

Mexico Says Hang on a Minute!

Mexico wants U.S. radio regulators to re-think their decision to allow AMs to go IBOC at night and FMs to operate on the extended hybrid digital carriers.

Our neighbors to the south say they are not happy the FCC authorized its recent "final" IBOC rules governing broadcast transmissions without first coordinating those through international treaties.

In a letter to Chairman Martin filed in the IBOC docket, the Mexican Federal Telecommunications Commission, which regulates communications in Mexico, states that "until technical criteria" have been established between the agencies to allow "optimal and efficient development of analog and digital radio broadcasting along our common border," the commission should hold off on the two points made earlier.

Sources tell me they believe Mexico filed the letter so it would have standing in any proceeding on IBOC and to have a way to adjudicate interference claims for the border area. Indeed, the group also refers to possible interference from U.S. IBOC stations to Mexican stations as a reason to have the coordination completed according to treaties first.

The FCC handles coordination with the State Department, so perhaps the timing isn't all up to the FCC.

Interesting development. As we recently reported, Mexico has agreed in principle to allow border stations to use FM IBOC, and that decision needs to be finalized and printed in Mexico's version of the Federal Register.

Say no to institutionalized interference.
Just say NO to HD/IBOC!

I really wanted one after reading all the stuff written about it when I first got bit by the higher end SW bug, it really sounded great. I had nothing even approaching it though, so it would have been a major step up, equipment wise.

But I was severely disappointed in it when I actually used one the first time, then even more so a few minutes later when I played with a JRC NRD-515. At that moment, every desire I had for a 6800 "Orange" was dead. It took me almost two years before I bought my NRD-525, and another year after that before I finally got my NRD-515. I still have it, but the 525 has been replaced with a much later, improved one.

On top of it not being all that great of a receiver, the 6800 is pretty damn ugly.

Nice video though. Miles ahead of the NRD-535 ones.

Cuba has recently been using higher frequencies, which is weird because stuff above 10 Mhz usually doesn't go anywhere in sun weather conditions like we have now. I always thought that their odd use of 11760 was to tweak Britain's nose (11765 is one of the few BBC freqs audible in NAm at 0500) but maybe not.

For One and All,
.
The Shortwave Listeners (SWL) AM/FM Antennas Groups
Main webpage has a simple diagram of a Multi-Element
1/4 Wave Length Shortwave Listening (SWL Antenna
using individual 1/4 Wave Length Wires. Message # 14230
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/14230
.
OK for those who can not find or do not want to use Rotator
(Rotor) Cable for a Shortwave Antenna -and- Want the greater
challenge of building a Multi-Element 1/4 Wave Length Antenna.
.
This Shortwave Listening (SWL) Antenna is less than 50 Foot
Long and can be rigged as a Horizontal of Sloper Antenna.
.
The 'individual' Wires are :
.
* Insulated Hoop-Up Wire or Antenna Wire from RadioShack; or
what every wire or wires that you have available for this
Antenna Project.
.
* Separated by Three Inches (3" Spacing)
.
* Rigged with Mason Line or Parachute Line or other
Nylon-Poly Rope; depending on the Size of Wire used.
.
Rough-Cut the 'inividual' Wires to Plus 3 Feet of the Cut Size.
-Example- The 47.7 Feet Wire becomes a 51 Foot Rough-Cut
project wire.
.
The Feed-Point End is either a piece of 1" PVC Pipe or 1/2"
Copper Pipe Bus-Bar with a Wood Dowel inside it for extra
strength. This Pipe should be about XX Inches Long. Why "XX"
well that depends on the Number of Antenna Elements you will
be building into your Multi-Element 1/4 Wave Length Antenna.
3-Elements = Two 3" Spaces plus 1"-2" on each end = 8"-10"
4-Elements = Three 3" Spaces plus 1"-2" on each end = 11"-13"
5-Elements = Four 3" Spaces plus 1"-2" on each end = 14"-16"
6-Elements = Five 3" Spaces plus 1"-2" on each end = 17"-19"
7-Elements = Six 3" Spaces plus 1"-2" on each end = 21"-22"
.
* If you use a 1" PVC Pipe use a Clove-Hitch and 6-8 Wraps
back around the Antenna Wire for each Wire. Secure the Wires

to the PVC about 3-Inches apart with an Epoxy Glue. Coat the Clover Hitch and the Wraps with the Epoxy Glue. Leave a Tag-End for each Wire as long as the PVC Pipe to be joined together later.
.
* If you use a 1/2" Copper Pipe Bus-Bar : Strip 4"-5" of Insulation from the end of the each Antenna Element Wire. Then use a Clove Hitch around the Pipe spacing the Two Loops 1/8"-1/4" apart on the side away from the Knot. Solder the Two (2) Loop Wires to the Pipe on the side away from the Knot; let the Solder flow along the Wires about Half-way around the Pipe. Next Wrap the Tag-End of the Wire with 6-8 Wraps back around the Antenna Wire. Secure the 6-8 Wraps on the Antenna Element Wire with an Epoxy Glue. Repeat for the remaining Antenna Element Wires; and ensure that the Wires are positioned on the Pipe about 3 Inches apart.
.
Rig a Nylon-Poly Rope at the Ends of the Pipe using Clove Hitches. The Rope should form two legs of a Triangle with the Pipe with a 60* to 90* Corner away from the Pipe. Mark this Corner-Point. Use the Tag-Ends of the Rope to tie 3-4 Overhand Knots around the Rope to finish off the Clove Hitches; and use Epoxy Glue to secure these Knots. Also use some Epoxy Glue on the side of the Clove Hitches away from the Knot; to cover half-way around the Pipe.
.
NOTE - Try and do all the Epoxying at the same time and let the Epoxy Set-Up and Harden for 24 Hours.
.
TIP - I recommend using a Matching Transformer with this Antenna. A so-called 9:1 Magnetic Longwire Balun (MLB) will work well.
.
Rigging the Rigging-Line; Coax Cable feed-in-line and the Matching Transformer.
* Use the same size Nylon-Poly Rope that you used to Rig the Pipe.
* Form Three 6" Diameter Loops about Half the Length of the Pipe as a Tag-End from the End Connector of the Coax Cable and wrap several times with Electrical Tape and use a Clove Hitch to secure them together along the Pipe Rigging Rope at the Corner-Point.
* Loosely {temporarily} Connect the Matching Transformer to the Coax Cable.
* -IF- You are using the PVC Pipe then take the Tag-End from the {Longest} Antenna Element and Trim it so that it can easily reach (a little slack) the Antenna Connector of the Matching Transformer. Strip-off about 2 Inches of Insulation from the Wire. Tin (Solder) this Wire and Temporarily connect this Wire to the Macting Transformer. Take the rest of the

Wires and Trim them so that they too can eaily reach the
Matching Transformer. Tin (Solder) each of these Wires.
Remove the {Longest} Wire from the Matching Transformer and
indivdually Wrap the other Wires to the Longs Wire starting at
the point closest to the Insulation the with Three Wraps and
Trim the Tag-End of this Wire. Repeat by following with the
next Wire wrapped tightly next to the first Wire; until all
Wires are Wrapped on the {Longest} Wire. You should have
about 1/2"-1" of the Tinned End of the {Longest} Wire still
un-wrapped. Solder all the other Wires to the {Longest} Wire.
Connect the Tag-End of the {Longest} Wire to the Antenna
Connection of the Matching Transformer; ensure that it is
Tight and Seal the Connection.
* -IF- You are using the Copper Pipe then take a short 12"-18"
'piece' of the Wire that you are using for the Antenna Elements
(Strip the Ends if needed) and Wrap a Clove Hitch so that the
Clove Hitch is opposite the Antenna Element Clove Hitches; and
Solder it and Secure the same way as the other Clove Hitches.
Take the other end of this short Wire and Trim it so that it
easily reach (a little slack) the Antenna Connector of the
Matching Transformer. Strip-off about 1/2 Inch of Insulation
from the Wire. Tin (Solder) this Wire and Connect this Wire
to the Matching Transformer; ensure that it is Tight and Seal
the Connection.
* Tighten the Coax Cable to the Matching Transformer and Seal
the Connection.
.
Using the Pipe as your Zero-Point for Measuring : Measure out
from the Pipe each of the individual Wire Antenna Elements
and mark the End-Point with a small piece of Tape. Next Trim
the Wires 4" beyond the Tape. Form two very small 1/4" to 1/2"
Loops right next to the Tape; carefully remove the Tape and
Wrap the Tag-End of the Wire around the Wire Antenna Element
main body for 6-8 Wraps. Feed the 6" of the Rigging Rope
through the Two Loops and Wrap 4-6 Wraps of the Rigging Rope
around the Wire Wraps and then feed the End of the Rigging
Rope back through the Two Loops; secure the End of the Rigging
Rope with 2-3 Overhand Knots. Important - Pull the Wire-Rope
Joint Tight. Use some Epoxy Glue to Secure the Wraps and Knots.
.
Individual 1/4 Wave Length Wire Antenna Elements :
60 Meters ~ 47.7 Feet - LA
49 Meters ~ 38.7 Feet - - sa
41 Meters ~ 32.4 Feet - LA
31 Meters ~ 24.2 Feet - - sa
25 Meters ~ 19.7 Feet - LA
22 Meters ~ 17.1 Feet - - sa
19 Meters ~ 15.1 Feet - LA
"LA" = Long Alternating Three Shortwave Bands : 60m/41m/25m/19m
"sa" = Short Altenating Three Shortwave Bands : 49m/31m/22m

.
You can then use a piece of PVC Pipe as the Far-End-Piece to
Rig the individual Wire Antenna Elements. The Longest Wire
should have at least 3-5 Feet of Rigging Rope between it and
the Far-End-Piece; and the other Far-End Rigging Ropes will
be longer.
.
NOTE - The Far-End-Piece is constructed the same as the
Feed-End Pipe; except no Soldering is Required since it is
just PVC Pipe and Rigging Rope. Rig the Back-End of the
Far-End-Piece with the same Rigging Rope as the Feed-End
Pipe.
.
Hoisting the Antenna into the Air. -IF- You are Working Along
One End at a Time starting with the Feed-End Pipe; and the
carefully hoist the Far-End-Piece into place ensuring that the
Wires do-not-tangle.
.
TIP - You can use a second smaller Rigging Rope on the Down
(Bottom) Ends of both the Feed-End Pipe and the Far-end-Piece
to keep the Wires laying in order and prevent tangling.
.
-IF- You are working with someone Rigging can be a lot easier.
.
TIP - Get Help when you are ready to Hoist the Antenna in the Air.
.
All that is left is to connect the other end of the Coax Cable to your
Radio / Receiver.
.
Enjoy building the Multi-Element 1/4 Wave Length Antenna.

Actually, Marx took his inspiration from Jewish philosophy and
thought. This isn't antisemitic libel-Israeli journalist Gershom
Gorenberg has noted that ideas found in the writings of Rabbi Yitzhak
Luria, known to his followers as "The Sacred Lion", are echoed in
Communism. Hints of kabalism and its sacred text, the Zohar, are also
found in Marx's work. Marx came from a long line of rabbis-his family
had converted to Christianity two generations before his birth to
escape persecution, but Marx's German government ID cards said he was
a "Jude". Marx was extremely well read and likely read Luria's works,
the Zohar, and many others before formulating Communism. Jews have
always been attracted to Communism-everybody from Trotsky (who changed
his name from Bronstein) to Emma Goldman (once the most hated woman in
America because of her total challenge to Victorianism) had Jewish
roots. David Horowitz has written several books about growing up in a
family and community of Jewish Communists.

A stretch. In true Communism, all land is owned by "the people", which means the state. Taxing land is not the same as seizing it, as Communists have always done.

This was the main plank of the Populists in 1896. You get this one.

> 3) Abolition of all right to inheritance. Limited inheritance via
> inheritance tax. Accomplished: Estate tax 1916

Inheritnace taxes only apply to big estates. Usually, Communists have abolished ALL inheritance, with people forfeiting all possessions to the state upon death. A tax on monetary inheritance isn't exactly the same, with the rich keeping their land and homes, and everybody keeping personal possessions such as cars and other knick knacks of everyday life. In some states people who go bankrupt can keep a "homestead", which can be any real property, even a multimillion dollar mansion. Texas is one notable example. Florida also has lax property laws.

> Established 1970. Sedition Act 1798 also used in 1940's and 1988.

ALL governments imprison those who get to be a big enough threat. It depends on how you define "rebel" or in Communist parlance "counterrevolutionary" but Communists typically have a broader usage

than Western governments.

> 5) Centralization of credit in the hands of the state, by means of a

> Federal Reserve Act 1933.

The weird thing is that national banks predate Communism. Read up on
The Bank of the United States sometime. If you want to point to the
Bank of England, that goes back even farther. Again, it's semantics.
Since individual depositors do not open accounts with the Fed, it's
technically not an exclusive monopoly. It is tightly regulated.

This has usually meant state owned media, which is not the case in
America, unlike everywhere else. It is arguable that some media is not
regulated at all, such as shortwave radio and the internet. America
does not have a state airline or a nationally owned rail or telephone
system, which is also unique. (There is Amtrak, but freight is far
more important, and that is private. Amtrak leases track usage from
the corporations.)

The Bureau of Reclamation really fits here-their intention was to make
the Nevada desert bloom, specifically the Churchill and Lahontan
Valleys in western Nevada near Reno. Agriculture did take hold in the
Lahontan Valley, giving birth to the town of Fallon, which still
produces renowned canteloupes. The rest of the agencies cited are
really stretching it though.

I'm not sure what an "industrial army" is, but something like it
existed during World War 2. I don't know where unions fit in-unions
haven't espoused socialism for 90 years.

> 1870's-1880's.

The weird thing is, America fits more than Europe, where the
distinction between city and country is more abrupt. During the height
of the Cold War, something like equal population distribution was
seriously proposed in America, to negate the impact of a nuclear war.
Science fiction writer Robert Heinlein even wrote a short essay on how
it might work. Chillingly, his vision looks a lot like what the Khmer
Rouge tried to do. Whether Frank Lloyd Wright's "Broadacre City"-the
inspiration for the modern suburb-was based on Communist theory is
unknown. But suburbanism was proposed as the answer to the lure of
Communism by none other than William Levitt, who created the first
real suburb. Levitt's idea was that if every man was made into a
property owner, and kept busy with the demands of caring for land, men
would be less willing to go for Communism's total abolition of private
property and land rights and forfeiture of all land to the state.

Yep. The founders of public education were devoted to socialism, and
to public education's equalizing qualities.

Yours must have been badly out of alignment. Properly set up, it's one of the most sensitive as well as one of the quietest radios you'll ever have the pleasure of using. It didn't get the reputation it did for nothing.

And some of us love the way it looks.

I have a "very" little Suzuki 4x4 pickup with noisy tires & a 660cc 12
valve. I get 28k to the lit.
It's called a "Multicab" van and a Toyota Diesel Van 2.0.

Do you recommend it for MWDX, or is it just inexpensive? Is it
selective and sensitive enough for DX? Audio good enough for solid QRZ?
Will an external outdoor antenna overload it?

JDaR,

Read the RadioIntel Report/Review -by- Dr Phil :)
RADIO INTEL => http://www.radiointel.com/

"The Sony ICF-S10MK2 is an "FM/AM 2-Band Pocket Radio"
GOTO => http://www.radiointel.com/review-sonys10mk2.htm
Question - "Can this inexpensive Radio be used to pursue the
hobby of AM Distance Reception (AM DX) ?"

imho - it is design as a low cost am/fm pocket radio
and it is simply that ~ RHF

And to me it is clear, that I not trust CRI and other chinese media as long
as China jams foreign radio stations like BBC, VOA or Voice of Tibet.
A state, who blocks the availbility of foreign media for its own citizens,
has much informations and opinions to hide.

Well, it was brand new, about two days out of the box, and worked
exactly (As far as I could tell) like the one they had at Universal
Radio. The guy who bought the 6800W sold it when the 6800 Orange fever
kicked in for a small profit.

IMO, it got it's reputaion because at the time it was released, there
were few halfway decent new under $1000 receivers that were available
worldwide, and the Sony name. A name that has sadly been tarnished the
last few years. Deservedly so, IMO.

If you liked it, great. There are tons of receivers that I would have,
and still would pick over one, unless it was super cheap.

I think a lot of people like me think it's ugly because the front panel
is very "uniquely" laid out. Kind of like, "Put this knob here, and that
dial there...whoops, we forgot to put those buttons in! Oh crap, where
are we gonna put that other knob?"

I've decided to coin a new term describing a "belief in failed technology"... I'm calling it "Frackeltonian Thinking" in honour of 'Eduardo', head Univision shill for HD/IBOC.

The 6800 Orange model isn't a bad receiver. It would have been nice if they would have had more selectivity at the 1st I.F. If it wasn't so hard to work on, I would probably put a crystal filter in that area, but not in this century.
It is not quite my worst receiver.....my Magnavox D-2999 is the worst, with all of its birdies on the MW band. I got stuck with it as part of a trade with the McKay Dymek Dr-22C that I picked up in the same deal.
The Dymek is a pretty good receiver; it uses a Mini-Circuits SRA-3H mixer as the 1st mixer. This mixer is rated down to 40kHz, but unfortunately, the phase noise from the synthesizer limits the usable sensitivity below 100kHz. They should have used a post mixer amplifier instead of putting the RF amplifier ahead of the 1st mixer. It could be that the low-pass and high-pass filters in the preselector have such high insertion loss that they needed to have that RF amp just to make up for the insertion loss.
I remember the DR-33.....they decided to "roll their own" with the 1st mixer on this unit. Sensitivity wasn't as good as the DR-22 receivers, at least with the unit that I played with. I ended up replacing that mixer with a TFM-1H and both sensitivity and IMD performance improved quite a bit.

I like to listen at night to the group on 3.805,
but, now after listening for an hour or so the
my receive goes dead, below 8.000MHz.

I shut the radio off and after it cools down,
the receive returns.

I bought the radio new in 1986. It has every filter,
remote, even the "High Stability Crystal"

Never had a problem until now.

What could be the problem ?

I have a handful of these - from Maryland I pick up most of the 50KW AMs at night up to 1000 miles (WHO and WWL). Considering the possibility of HD/IBOC being approved for nighttime (but, that seems less likely now that Mexico has objected, as HD/IBOC violates international treaties, and Canada may follow-suit), I wouldn't spend too much for a good AM DXing radio. Ther radio is an excellent, cheap but good quality radio. For more on the HD/IBOC violations got here:

There are a number of problems with R-71A that develop as it ages. Many of them heat related. Solder joints begin to crack around the voltage regulator in the power supply. Oxidation causes chassis ground connections to open....there is quite a list.

Very likely, something has simply aged to the point it falls out of tolerance as internal temps rise, or a mechanical connection opens due to expansion of an oxidizing metal contact.

I had similar problems with mine.

Two recommendations. Open it up, and touch up the solder joint around the regulator. That's an enormous source of trouble on aging ICOM rigs of this vintage. ICOM does it as a matter of course on all incoming ICOM rigs in Bellevue. Then check all points where a mechanical connection is made from a circuit board to the metal chassis. Remove screws, clean any oxidation you may find there. It might be smart to put a star washer under the screw when you replace it. Verify that all internal connections are tight. Some are made using springs. A little oxidation here, and you'll be in a strait jacket before the weekend.

For specific troubleshooting, ICOM maintains a database of problems/solutions in the form of an FAQ for older receivers. Give that a look at ICOM.com.

The second recommendation is to consider going the full distance and sending it back to Bellevue for a makeover. ICOM service is very good. VERY good. If you get them on a good day, a phone call may get you a quick solution you can implement fairly easily. You're a ham, you've certainly got the technical know how. Then again, Bellevue has both the technical knowledge AND the knowledge of the indiosyncracies of this rig, ready access to parts, and tooling and hardware to not only diagnose problems, but to return the rig to factory specifications. Those trimmers on the PLL board, for instance, become sources of problems for low level SSB listening, and eventually need to be replaced. If you still have the original memory board, they can replace the battery for you and reflash the memory as needed. You know, little crap.

Bellevue's service is relatively quick, very good, and because they know what they're doing a lot less expensive than someone who isn't factory trained. I sent my R-7000 in for a makeover and it came back as new, for less than $200 including express shipping both ways.

Give it some thought.

A friend bought a D-2999 at a hamfest, it was in new condition about 10
years old or so, and it went for a really cheap price. He kept it for a
while, but was very unhappy with it in general, except the audio was
pretty decent.

Ny friend's dad had an amazing collection of receivers, from the super
common Yaesu FRG's, to some German and Asian ones I have never seen
except for pics. I sure wish I could have grabbed a couple of them when
he died, and my friend sold most of them and his insanely huge
collection of parts. He had a mint Hammarlund HQ-180A that I wanted so
damn bad, but my tranny blew up on my truck and my dog was going in for
surgery, so I had to pass on all of them. He had some really great stuff
that I would really love to have now.

The fact is that more an more stations are adding HD, and it has actually
been authorized for use in Mexico, where multiple stations are on the air.

The fact that the information is attributed to the entity that does not
(exist) and issue licenses makes the whole thing suspect; Mexico is
authorizing HD broadcasting and XHTY put it on the air two weeks ago.

826. Adding DRM downconvertor to ICOM receivers

I am interested in adding DRM to an ICR-71 and ICR-9000. Can anyone
recommend at what IF tap point to tap off for each of these receivers?
Generic advice is certainly welcomed, but would also like to hear
specifics from those who have it working on these receivers.

KPFK is protected only to the extent of a conforming class B radio station. Grandfathered "over power" or "over height" operations are not protected to the extent of the actual contours, but to the extent of the contours of a conforming station of the same class.

KPFK has no right to any coverage in the San Diego metro, and XHLNC is a legally licensed station in conformance with the treaty matters concerning border area broadcasting.

As an example, another grandfathered "Super B's" is KLVE 107.5 in LA, 29,000 watts on Mt. Wilson... it was a top 10 station in Santa Barbara's ratings. But because all the coverage in that area was beyond that of a conforming Class B, the FCC licensed a new station on the adjacent channel, 107.7, and KLVE became unlistenable in Santa Barbara. This is because KLVE had no legal right to that extended coverage.

Thanks for posting Jari's tips, dxAce!

I've been watching for this one while on DXpeditions this year. I'll be back at the WA coast later this month, and again for a full week at the Queen Charlotte Islands in September. The latter DXpedition will be near the famed Wullenweber Array receiving antennas used by the Canadian government. With a lot of luck and good propagation, maybe I'll hear the PMA station.

Three years ago this month I had one of my best-ever medium wave DX catches... V6AJ in Kosrae, Micronesia. It would be neat to catch this country on shortwave, too.

A Chicano is a US born person of Hispanic culture of Mexican heritage,
something I am not...

And, speaking of things that are "not" you can not change the fact that KPFK
does not have a protected signal in SD County, and the operation of XHLNC is
100% legal. There is also no right to being able to receive any particular
format, or the 13 reggae fans in Duluth would have a station for them.

KPFK barely gets listening in Los Angeles. Were is different, we would have
similar formats on commercial stations. In LA, KPFK is 43rd out of all
stations, while the combination of KFI, KABC, KRLA have 15 times more
listening. Despite having one of the two or three best FM signals in LA,
nearly nobody is listening.

How many more tragedies am I going to have to post before you contact your Senator and Congressman to demand immediate action?

As I've pleaded repeatedly for IT'S TIME TO END THE INSANITY AND CONFISCATE GUNS! Guns have no place in a civilized society. How many more innocent people are going to have to die before this nation finally wakes up and does the inevitable - BAN GUNS!!!

A.W.S.
President
Gay, Lesbian, Transgendered Shortwave Club

NEOSHO, Mo. - A gunman opened fire in the sanctuary of a southwest Missouri church Sunday, killing three people and wounding several others, a city spokeswoman said.

About 25 to 50 people were briefly held hostage at the First Congregational Church until the gunman surrendered, Neosho spokeswoman Desiree Bridges said.

Fewer than 10 people were also shot and wounded, Bridges said.

The shooter was being held at the Newton County Jail, but police were not releasing any information about him.

Bridges said he was related to someone in the church, but declined to elaborate.

Bridges said the shooter had three firearms, but wouldn't say what type. The shooting followed the 1 p.m. service.

If some of those folks had been carrying guns they might have taken the shooter out after or even before they had killed one, let alone three people.

I just bought one two weeks ago to try out. First, it is a $10 radio, so it won't match up to larger radios like the GE Super Radio. It is the best $10 portable I have own. On AM, for some reason it is a
more effective at night than daytime. At night, it pulls in tons of stations up to 500 or so miles away and holds it own.
I suspect under good conditions it may pull in stations 1000 miles away. In the daytime, it actually is respectable with stations up to 50 miles from me. Two stations I consider DX material at 100 miles and 250 miles away it is mediocre...though a SelectAntenna would likely pull them in strong used with this radio. That being said, the GE Super Radio does a fair job on these distant stations without help. On the FM side, it is somewhat impressive for a $10 radio. It outdoes some of my other FM radios that cost $40 or so. Decent FM reception, slightly below the GE Super Radio though.
So in summary, for $10 it is worth the price and does decent AM DX at night, and worthwhile for daytime stations upto 50 miles away. FM is pretty decent.
A very good carry around portable for ball games and stuff.

Hi, all.

I have to take the General Test in September. I have the ARRL book -- probably not the latest version - but think that would be ok. But I'm having a tough time getting through it.

I have heard there is a website - or book - that gives you all the questions and the answer choices. Then it tells you the correct answer and why.

Anybody know what the name of this is or what the website address is??

thanks.

And if just one of those church people had been carrying a gun - this
would have been over a lot quicker and with a lot less loss of
life.!!!

In the area I live in, the mayor just ran a big gun collection. Got
loads of weapons. But there are still shootings and killings and the
gang's are still strong -- so who did the gun collection help??

one I hear the neest q pool is knda a break from the one that receeded
it the new took effect in jun or hjuly this year (a couple of months
ago

Gordo West w6noa book through W5YI gruop gives the question and answer
and either the reson the right is right or the reasons all the wrong
ones are wrong (depends on the question) and can be ordered through
W5YI or AES or many of the big ham outlets

there are a couple of website with the Q pool although I don't any
right off I understand QRZ.com ihas practice tests on line

I susges getting gordos current book for the exam and then reading the
ARRL book to figure out how to exploit the preveledges

note the new book from Grodo will the new bandchanges the older ARRL
book willl not

It was a nice radio for it's time, and it ranked above the Panasonic
RF luggables in terms of performance but below a good tabletop. But
like the Panasonic units it is an outdated analog reveiver that relies
on fiddly tuning and a tacked on digital display. After 30 years the
many electro-mechanical contacts are likely to be less than reliable
in terms of performance.

That is pretty much the stock answer by stations... or partisans of
stations... that do terribly in the ratings.

It's amazing that forty-some other stations have listeners, and many more
listeners, who do participate in ratings polls.

And, even if it had listeners, which it does not, KPFK has no "entitlement"
to protection from interference in the San Diego market area.

Huh? The "bomb drop" as you call it, was in Hiroshima/Nagasaki in 1945;
Cuhulin was in Tokyo during the Viet Nam era, the mid sixties. The Ginza
is a popular upscale shopping/restaurant district of Tokyo.

Maybe they did remove 3 feet of radioactive top soil in
Hiroshima/Nagasaki, but why would you think they hauled it to the
Ginza??? To bring new meaning to the phrase "Shop 'til you drop"? :-)

And then you can start some radio stations which you can claim to "own", even
though they are not really in your name!

IIRC, that's because when the sun isn't hitting it, the ionoshpere is a
better reflector of radio waves. I think it's called the "F layer". I'm
too lazy to wiki it right now, and I'm sure someone here will correct

My last visit to Oakland had some hours had a
S9 Noise Level across the Bands below 10 MHz.

My next door neighbors kids had a Band practicing
in their backyard garage. Their Amps and Equipment
were the Source.
* Three Reversed Two Prong {Only} Electical Outlets
plus they were using a Power Strips with the Round
Pin Cut-Off - Rewired the Outlets with Three Prong
Receptacles and gave them two new Power Strips.
* Installed Snap-On Ferrite Cores (10+) on all the
Power Leads and Equipment Cables.

This dropped the Noise Level down to below S3.

DX Ace,

Example of the Anti-Gun Liberal Media {News} Hysteria :
Dave McCracken, Neosho Police Chief is attributed to this
statement : "The gunman had two small-caliber handguns
and one 9 mm semi-automatic machine pistol with a large
magazine," McCracken said.

OMG - It's a Killing Machine ! - 9mm Semi-Automatic
"Machine" {Machine Gun} Pistol with a LARGE Magazine.
* Another Liberal Media Distortion About Guns.

Most members of the Anti-Gun Political Cadre believe
that the use of anything greater then the old Six-Shot
38 Police Revolver is Police Brutality and any 9mm
Semi-Auto with a 10-13 Round Clip is a Weapon of War.

Smith & Wesson M&P Standard 9mm Pistol
http://www.gunslot.com/guns/smith-wesson-m-p-standard-9mm
That's "M&P" as in Military and Police.

The terms 'Semi-Automatic' and "Machine Pistol" are mutually
exclusive terms.

Actually so are "Machine" and "Pistol."

Semi-Automatic--for those not up to speed, means that one bullet is fired every time the trigger is released, the cartridge casing is ejected and a fresh cartridge chambered. In the context of a shoot, there is no technical difference between the outcome of squeezing the trigger on a revolver and a semi-auto.

One squeeze, one shot.

Nothing more.

To be a "Machine Gun," a weapon must fire fully automatically AND must fire rifle cartridges. One squeeze and the weapons empties the magazine of RIFLE cartridges.

The reason the Thompson Automatic (Eliot Ness's Tommy Gun) was called a sub-machine gun, is because it fired pistol cartridges. Specifically .45 ACP.

The only pistol of which I have experience firing a rifle bullet is a Thompson Center Contender....which is single shot only.

Now, there are automatic pistols. Extremely hard to handle, and virtually impossible to aim after the first cartridge is fired. But those are not 'Machine Pistols.' And they are most certainly not semi-automatic.

There were no "Machine Pistols" in the inventory taken after this event.

The speaker is using the most inflammatory language to create fear and motion in favor of an agenda.

It's the most reckless kind of yellow journalism.

The shooting itself is reprehensible enough. It does not require embroidery.

And, since this is Rec.Radio.Shortwave....where did I learn all of this? On shortwave radio.

Back when BBC was still a news organization.

I'm shocked at how much stuff from back then still works fine. I
recently, for no real reason, bought an old cassette deck to replace the
almost identical one I bought in 1971 and used for over 30 years. One of
the direct drive motors died on it, and I couldn't find a replacement
for anything close to a sane price, so I finally dumped it after a year

of looking. A few weeks later, there was a nasty looking, but 100% working one at the local Goodwill store. Price was $10. Damn.

The one I bought recently looks brand new, just like mine did, and it works great. Even all the bulbs still work. Not bad for 36 years young.

I recently fixed a Yaesu FRG7 that had died due to solder joints cracking. They were really easy to find with a Jeweler's Loupe and I had it fixed and 100% operational in less than one hour.

My own project radio is an old Allied SX190 that works, but not great, on all bands, except for 9.4-10MHZ, it blasts in, to the point of overloading. There's something really obscure wrong with it in the preselector someplace that I haven't found yet.

Neither do gangs, drug runners, or people who shout on street corners. Nor is there a place in civilized society for those who create fear and hysteria by distorting the facts.

And yet,.....

Specifically referring to the Neosho Deputy who spoke before the cameras, but referring in general to anyone who shouts distortions to create sympathy for an unpopular agenda, the Deputy is heavily trained in the technical knowledge, and proficient use and understanding of firearms. For him to say what he said, publicly, is the most clear and present reason why the people in this country fear police: What comes out of their mouths is often not the truth.

But in a more general sense, anyone screaming for confiscation of anything as a national policy has to do so through the same kinds of distortions...and their credibility becomes, as well, suspect.

There is no place in a civilized society for such persons.

How many
> more innocent people are going to have to die before this nation
> finally wakes up and does the inevitable - BAN GUNS!!!

It's interesting how the same people who screamed until there was a statutory requirement for smoke alarms and fire extinguishers in every home are the first to scream about banning firearms.

Consider...the reason for the smoke alarm is to warn the family early enough to take meaningful action to save home, hearth and lives. The reason for the fire extinguisher is to help contain damage while the fire department is in route.

And yet, when an armed soul wanders into a building known to be unarmed, the fault is on the authorities who didn't arrive in time?

That's bullshit. If you're going to have a fire extinguisher in every home to hold back the flames while the fire department is enroute, you'd be irresponsible not to have an accessible weapon on the grounds to hold off unimpeded killings while the SWAT team is enroute.

Having a weapon accessible and in play INSIDE when such an event breaks out, does two things immediately....1) it diverts attention of the gunmen from killing the unarmed and innocent, to taking cover and

focussing on those who are shooting at him, and 2) it presents the only real and immediate opportunity to stop his activities at the earliest moments possible.

Banning guns, as the a number of Chicago suburbs have discovered is the only way to a guaranteed certaintly to boost armed home invasions.

And sadly, nationwide, school shootings.

That's always a good way to go to jail - sign an agreement to get out of jail or avoid jail and then go back on it. That has worked for quite a number of people. It tends to raise the judge's blood pressure.

This is a $10 radio. I have one and do NOT use it. It is terrible.

The radio generates its own noise which limits the useful sensitivity on AM.

The dial markings provide very little detail. You don't really know what
frequency you are receiving unless you get an ID from the station.

The AM band does not cover up to 1700 kHz.

The stiffness and the backlash in the tuning make it a bit time consuming to accurately tune in a station.

Is it sensitive enough? - No. When compared to a Rf-2200 or 7600GR, the ICF-S10MK2 falls a distant third. Stations that are barely audible on the $10 radio are load and clear on the 2200.

When compared to a Sony ICF-SW10 and Realistic DX-380, the ICF-S10MK2 still falls in 3rd place.

There are much better radios for MW DX.

If you are serious about DX, then start with a decent radio.

The comparisons were made during daytime hours with no additional antenna other than what the radio has built in. Batteries are new.

With a icf-s10mk2 and a 4 ft loop, mutually coupled, you can pick up some great DX.

Most likely, those paying hundreds more are a bit pissed they didn't get more for their money ... now they are into another hobby and a 10 buck radio would just be fine.

With a decent tuned antenna for MW, and mutually coupled to the loop in the radio with a few turns, you could probably hear more than you ever thought possible.

Besides, once you are bored (and find you can do with just listening to local talk shows) you don't have $500 to $1,000+ tied up in something that has just about become worthless to you and is destined for ebay. Where did you think all those radios on ebay came from in the first place? Krist, I swear, some of those radios on ebay are probably going there for their 10th time!

JS

The audio is decent for a small portable. No trouble hearing it. I think it is a bit above average for audio at this size. One posting mentioned using a loop with this radio. And I agree with him, it likely will pull it lots on AM. I suspect daytime signals would be pulled out well also. I am about 200 miles from Boston and WBZ faintly comes in during the daytime with the S10MK2. I suspect a loop would really pull it in. A Selectatenna likely would work wonders.
Also, on FM I am able to pull a faint TV station signal in on the very lower FM band of this radio..the station is about 90 miles away and usually if I hear that station on the FM band the radio is above average in FM sensitivity. But, remember..this radio can't stand up to the GE SuperRadio as the GE is a much bigger radio with a much larger ferrite rod and specially tuned for AM Dxing. That saying the S10 still is a decent cheap DX addition.

It really depends on how it was used and stored. But I agree, some radios can work like little 30 year old wonders and others can be a real PITA because of noisy controls or band switches that only work at one position 1/64 inch away from the detent.

I had great luck with a Realistic DX150B and speaker. A simple realignment of the tuning dial resulted in a hot little radio for $10.00 Same for a 1970 Panasonic RF5000b. OTOH a Kenwood R300 was a lot of fun on the bands that worked but frustrating on the ones that didn't.

So, while you're on the subject, is there a place for government fear-mongering? Like Secretary of Homeland Security Chertoff, with access to -every- law enforcement agency in the US and probably the Western world, and the best he can come up with is ..."Gee, I have this gut feeling". :-(

Now that you mention it (creating fear and hysteria by distorting the facts), sounds a lot like the Iraq "war". Just ask Colin Powell if you don't believe it. He's sorry he distorted the facts and apologized publicly.

And yet, as it turns out, things uncovered in Iraq, and reported even by the mainstream media suggest that Powell may have been premature in his apology.

With the progress we're making in this war, and the volume of information we're uncovering as we wade through records kept by Hussein and others, as well as the information surrendered by captured enemy, it seems that all the palaver about misrepresentation is so much distortion in and of itself.

Now, back to the topic of the thread. But thanks for playing the fear and distortion game and demonstrating by example precisely that which is being discussed.

Some of the greatest scientific discoveries have come as a result of a gut feeling. Ask anyone who's been in combat if they don't develop a 'spidey sense' of impending engagement while on patrol. Ask anyone who's served in law enforcement if they've not developed a gut feeling about a suspect based on very slightly discernable behaviours. Ask anyone who's ever worked in Customs if a gut feeling hasn't led to an arrest and confiscation of contraband.

The hard reality is that gut feelings can be inaccurate. They can also be abused, like anything else. But they develop as a result of front line experience and are right more often than not. To disparage a gut feeling in this circumstance and require compelling dispositive proof before taking action is precisely how 9/11 came to happen. It's precisely how the Cole grew the hole in her hull. It's precisely how party goers died in a disco in Germany. Had more gut feelings been followed, the heightened state of vigilance would have prevented engagement in this instances by permitting more proactive defensive postures.

Give me a Marine with a gut feeling over a so-called scientific approach any day. ANY DAY.

In other words, I'll walk into a hot zone with a Marine at my side before I'd walk into a public school with you.

It's real easy to armchair quarterback the guy sitting in the big chair. And it's real easy to criticize someone charged with responsibility based on your politics and his colloquial speech. But I've noticed your criticism does not come accompanied with an alternative practical solution other than "Impeach Bush."

Forgive me for saying this, but paper tigers are made of these.

I'll stick with the Garand I purchased from the DCM program (now CMP). I had to put a but pad on it so I would not get bruised firing it. .30-06 is one mean round.

<http://www.odcmp.com/Services/Rifles/m1garand.htm>

.30-06 is one mean round. The M1 is one awesome rifle.

Out of the box one gun was good but another needed a little polish on
the trigger parts for a smooth pull. They are a Canadian firm.

Border stations have always been a gray area. Mexico has never been very keen on FCC style radio regulations, and since the border stations are a long ways away from Mexico City, they do whatever they want. In the 1930s MW border stations operated with hair curling wattage levels. In one case, a border station regularly blew away Philadelphia's KYW at night. After WW2, the border blasters mostly shut down. Today, border radio is mostly a problem in California and Texas's Rio Grande Valley, the only places with significant numbers of people living on the line. Stations regularly set up antennas in Mexico and broadcast in English. They're effectively beyond any regulation-the Mexicans don't care, and the US can't touch them. If Pacifica Radio wants to get out of XHLNC's shadow, I would suggest they move. But practical solutions are beyond libs, they'd rather whine.

To be precise, the Chinese are jamming Radio Free Asia, a US
propaganda station. RFA is similar to the Radio Free Europe/Radio
Liberty station that operated during the Soviet era. I personally find
CRI dull. Most stories are China-specific, and the few international
news stories presented are done with a slant that makes them boring.
At least Cuba has an interesting perspective, and a good selection of
news that tends to be ignored by everybody else. The Chinese have
plenty of money, and CRI is simply the overseas service of CPBS/CNR,
so comparing them to American stations is not fair. American stuff is
absolute bottom of the barrel-mostly offbeat religion and various
weirdos with an ax to grind against the government. The stations don't
have government resources behind them, so they're constantly in a
desperate race to keep ahead of the power company and keep the juice
on. Thus the constant begging. Anybody with altruistic motives quickly
gets hammered by the money issue, and either gives up or becomes a
slave to whoever will pay them. This happened to Allan Weiner, who
wanted to be a legal pirate and instead became just another kook
station trying to stay afloat. The only station that makes it work is
WWCR, which seems to be doing ok, and the single source of income
stations like Family Radio. Other than that, there's very little
market.

Mexico, like Edweenie, can make all the claims they want.

Edweenie has claimed that he/she/it actually owned radio stations in Ecuador.
However, there is no documentation to prove that.

He/she/it has claimed to have had an Amateur Radio License in Ecuador. However
there is no documentation to prove that.

At age 55 or so, he/she/it decided to become the fake Hispanic, 'Eduardo'.
He/she/it discovered around that time that he/she/it could check a box on the

census form, and voila, he/she/it is Hispanic.

Previous to the year 2000 there is no evidence what so ever of he/she/it using the name 'Eduardo', nor is there ANY existence of the name David 'Eduardo' Frackelton Gleason on ANY official documents, contrary to ANYTHING he/she/it will try and tell you.

He/she/it has had trouble with the truth, and reality, ever since he/she/it was a young lad/or little girl, and this is just the latest manifestation of the problem.

I was the only shareholder of Radio Musical, Cia. Ltda. which had many radio stations. Call the commercial attach of the US Embassy in Quito and have them look it up.

The are 50 kw in two lobes, so they actually behave like about 100 kw over
LA. Same facility that they had in the 60's and 70's, in fact.

I can give you the addresses of many people who worked with me... and who know I owned stations in Ecuador, starting with Jaime Nebot, the mayor of Guayaquil today...

The rest of the crap you posted is similarly incorrect, starting with the fact that in 1980 and 1990, the census taker filled in the form, not the respondent.

I'd kick myself in my ass if I could. I should have never sold my
M-1 Garand. But I make do now with a Swedish Mauser M-38 Short Rifle,
a Lee-Enfield No. 4 Mk I* - Longbranch, and a Sturm-Ruger .45 Old Army
in stainless steel. Hell of a lot of hoops to jump through up here fo
me to keep my .45. Although once in a while I fire a Glock 17 9mm in
competition, but I don't own it. Fired a C-7 (our Canadian version of
the M-16) in auto burst fire, didn't care for it. Waste of ammo in
my opinion, the way the barrel climbs. Careful single shot is the way
I've always gone. The Afghans did a damn good job against the Soviets
using old Lee-Enfields. And some of those old Lee-Enfields where cheap
copys made in shops in Pakistan.

Those lithium batteries are dangerous.They cause cellphones and laptop
puters and radios to catch fire and blow up.Don't use them.
I stick with good old Ray O Vac Alkaline Batteries.

I've emailed a couple of SX/AX-190 gurus and they seem to agree, since
my radio works like it's supposed to on the one band, it's almost
certainly the preselector, but I can't seem to find the problem. I
changed out all the old electrolytic caps to fix a bad hum problem, a
couple of the "styrol" caps and got it going well enough to barely pick
up stuff on every band, and then spent one night hitting every off
looking joint I could see, and it came alive on the 9.4-10MHZ band, but
remains semi deaf everywhere else. I kind of put if off to the side for
a while, but one of these nights I'll mess with it until I get it
working, and then it will go on the "look at a lot, don't use much"
shelf with my shockingly great modded to the max Hammarlund HQ-100.
